## INDEPENDENT AUDITORS' REPORT

To the Members of the Board of  
Metropolitan Transportation Authority

We have audited the accompanying consolidated balance sheets of the Metropolitan Transportation Authority (the "MTA"), a component unit of the State of New York, as of December 31, 2011 and 2010, and the consolidated statements of revenues, expenses and changes in net assets, and consolidated cash flows for the years then ended. These consolidated financial statements are the responsibility of the MTA's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the MTA's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the respective consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the MTA, as of December 31, 2011 and 2010, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in the notes to the financial statements, the MTA is a component unit of the State of New York. The MTA requires significant subsidies from, and has material transactions with, The City of New York and the State of New York and depends on certain tax revenues that are economically sensitive.

The Management's Discussion and Analysis on pages 3 through 28, the Schedule of Pension Funding Progress on page 107, and the Schedule of Funding Progress for the MTA Postemployment Benefit Plan on page 108 are not a required part of the basic consolidated financial statements, but are supplementary information required by the Governmental Accounting Standards Board. This supplementary information is the responsibility of the MTA's management. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

Our audits were conducted for the purpose of forming an opinion on the MTA's consolidated basic financial statements. The schedule of financial plan to financial statements reconciliation, schedule of consolidated reconciliation between financial plan and financial statements, and schedule of consolidated

subsidy accrual reconciliation between financial plan and financial statements are presented for purposes of additional analysis and are not a required part of the basic consolidated financial statements. This supplementary information is the responsibility of the MTA's management. The schedule of financial plan to financial statements reconciliation, schedule of consolidated reconciliation between financial plan and financial statements, and schedule of consolidated subsidy accrual reconciliation between financial plan and financial statements, have been subjected to the auditing procedures applied by us in the audit of the basic consolidated financial statements and, in our opinion are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

A handwritten signature in black ink that reads "Deloitte & Touche LLP". The signature is fluid and cursive, with "Deloitte" on the first line and "& Touche LLP" on the second line.

**MANAGEMENT'S DISCUSSION AND ANALYSIS  
YEARS ENDED DECEMBER 31, 2011 AND 2010  
(\$ In Millions)**

---

**1. OVERVIEW OF THE CONSOLIDATED FINANCIAL STATEMENTS**

***Introduction***

This report consists of five parts: Management's Discussion and Analysis ("MD&A"), Consolidated Financial Statements, Notes to the Consolidated Financial Statements, Required Supplementary Information, and Supplementary Information.

***Management's Discussion and Analysis***

This MD&A provides a narrative overview and analysis of the financial activities of the MTA Group for the years ended December 31, 2011 and 2010. This management discussion and analysis is intended to serve as an introduction to the MTA Group's consolidated financial statements. It provides an assessment of how the MTA Group's position has improved or deteriorated and identifies the factors that, in management's view, significantly affected the MTA Group's overall financial position. It may contain opinions, assumptions, or conclusions by the MTA Group's management that must be read in conjunction with, and should not be considered a replacement for, the consolidated financial statements.

***The Consolidated Financial Statements***

Consolidated Balance Sheets, which provide information about the nature and amounts of investments in resources (assets) and the obligations to Metropolitan Transportation Authority and its consolidated subsidiaries and affiliates (the "MTA Group") creditors (liabilities), with the difference between the two reported as net assets.

Consolidated Statements of Revenues, Expenses, and Changes in Net Assets, which provide information about the MTA's changes in net assets for the year then ended and accounts for all of the year's revenues and expenses, measures the success of the MTA Group's operations during the year, and can be used to determine how the MTA has funded its costs.

The Consolidated Statements of Cash Flows, which provide information about the MTA Group's cash receipts, cash payments and net changes in cash resulting from operations, noncapital financing, capital and related financing, and investing activities.

***Notes to the Consolidated Financial Statements***

The notes provide information that is essential to understanding the consolidated financial statements, such as the MTA Group's accounting methods and policies, details of cash and investments, employee benefits, long-term debt, lease transactions, future commitments and contingencies of the MTA Group, and information about other events or developing situations that could materially affect the MTA Group's financial position.

### ***Required Supplementary Information***

The required supplementary information provides information concerning the MTA Group's progress in funding its obligation to provide pension benefits and postemployment benefits to its employees.

### ***Supplementary Information***

The supplementary information provides a series of reconciliations between the MTA Group financial plan and the audited consolidated statements of revenues, expenses and changes in net assets.

## **2. FINANCIAL REPORTING ENTITY**

The Metropolitan Transportation Authority ("MTA" or "MTA Group") was established under the New York Public Authorities Law and is a public benefit corporation and a component unit of the State of New York whose mission is to continue, develop, and improve public transportation and to develop and implement a unified public transportation policy in the New York metropolitan area.

### **MTA Related Groups**

- Headquarters ("MTAHQ") provides general oversight, planning and administration, including budget, cash management, finance, legal, real estate, treasury, risk management, and other functions to the related groups listed below.
- The Long Island Rail Road Company ("MTA Long Island Rail Road") provides passenger transportation between New York City and Long Island.
- Metro-North Commuter Railroad Company ("MTA Metro-North Railroad") provides passenger transportation between New York City and the suburban communities in Westchester, Dutchess, Putnam, Orange, and Rockland counties in New York State and New Haven and Fairfield counties in Connecticut.
- Staten Island Rapid Transit Operating Authority ("MTA Staten Island Railway") provides passenger rail transportation on Staten Island.
- Metropolitan Suburban Bus Authority ("MTA Long Island Bus") provides public bus service in Nassau and Queens counties.
- First Mutual Transportation Assurance Company ("FMTAC") operates as a captive insurance company to provide insurance coverage for property and primary liability.
- New York City Transit Authority ("MTA New York City Transit") and its subsidiary, the Manhattan and Bronx Surface Transit Operating Authority ("MaBSTOA") provide subway and public bus service within the five boroughs of New York City.
- Triborough Bridge and Tunnel Authority ("MTA Bridges and Tunnels") operates seven toll bridges, two tunnels, and the Battery Parking Garage.
- MTA Capital Construction Company ("MTA Capital Construction") provides oversight for the planning, design, and construction of current and future major MTA system expansion projects.

- MTA Bus Company (“MTA Bus”) operates certain bus routes in areas previously served by private bus operators pursuant to franchises granted by the City of New York.

### 3. CONDENSED FINANCIAL INFORMATION

The following sections discuss the significant changes in the MTA Group’s financial position as of and for the years ended December 31, 2011 and 2010. An analysis of major economic factors and industry trends that have contributed to these changes is provided. It should be noted that for purposes of the MD&A, the information contained within the summaries of the consolidated financial statements and the various exhibits presented were derived from the MTA Group’s consolidated financial statements. All dollar amounts (except where otherwise expressly noted) are in millions.

#### Total Assets, Distinguished Between Capital Assets, Net and Other Assets

Capital assets include, but are not limited to: bridges, structures, tunnels, construction of buildings and the acquisition of buses, equipment, passenger cars, and locomotives.

Other Assets include, but is not limited to: cash, restricted and unrestricted investments, State and regional mass transit taxes, and receivables from New York State.

	December 2011	December 2010	December 2009	Increase/(Decrease) 2011 - 2010	Increase/(Decrease) 2010 - 2009
(In millions)					
Capital assets — net (see Note 6)	\$ 51,837	\$ 50,133	\$ 47,229	\$ 1,704	\$ 2,904
Other assets	<u>10,662</u>	<u>10,082</u>	<u>9,012</u>	<u>580</u>	<u>1,070</u>
<b>Total assets</b>	<b>\$ 62,499</b>	<b>\$ 60,215</b>	<b>\$ 56,241</b>	<b>\$ 2,284</b>	<b>\$ 3,974</b>

#### Capital Assets, Net

***Significant Changes in Assets Include:***

**December 31, 2011 versus 2010**

- Net capital assets increased at December 31, 2011 by \$1,704. The major net increase of \$1,490 is related to other assets, while assets related to building and structures, passenger cars and infrastructure increased by \$484. In addition, construction work in progress decreased by \$271 due to the capitalization of completed projects (See Note 6).
- Some of the more significant projects contributing to the net increase included:
  - Continued progress on East Side Access, Second Avenue Subway and Number 7 Extension Project.
  - Station improvements with concentration on the Elevator Replacement Program. Major improvement occurred at Jamaica, Penn and Moynihan Stations.
  - Station improvements – American Disability Act (“ADA”) – platform edge, street ceiling on the 7<sup>th</sup> Avenue line, canopy replacement on 62<sup>nd</sup> Street and brick repair at 168<sup>th</sup>, 181<sup>st</sup>, Jay and Lawrence Streets and ventilation facilities at Jackson Avenue in Queens.
  - Infrastructure work included a deck replacement at the Bronx-Whitestone Bridge, and tower structural rehabilitation at the Throgs Neck Bridge, rehabilitation of the retaining walls and bridge abutments for six bridges and pedestrian underpass on the Port Washington branch line.
  - Track rehabilitation and switch replacement on main subway lines and communication systems improvement with replacement of antenna cable, modernization of the data network and ventilation facilities on tunnels.
  - Various signal and communication projects incurred by the MTA Long Island Rail Road and related Centralized Traffic Control System and Positive Train Control System.
  - Rehabilitation of line structures and subway tunnels including the Rockaway Viaduct and Ocean Parkway. Depot rehabilitation and constructions of parking at four depots.
  - Purchase of 328 articulated buses, 90 standard diesel buses – Nova T – drive pilot and 382 B division subway cars. Purchases of buses by MTA New York City Transit and MTA Bus continue in 2011 while MTA Metro-North Railroad acquired train cars including the New Haven M-8 cars.
- Other assets increased by \$580. The major items contributing to this change include:
  - Net increase in receivables in the amount of \$82 due largely to an increase in other receivables of \$73. This increase was attributable to MTA New York City Transit, MTA Bridges and Tunnels, MTAHQ, MTA Long Island Rail Road and MTA Bus with increases of \$23, \$14, \$20 and \$17, respectively.
  - An increase in other noncurrent assets of \$149, attributable mainly to MTAHQ. Unrequisitioned funds for capital expenditures for MTA New York City Transit and MTA Bus were higher at the end of December 31, 2011 due to increased requisition processing during the current year.

- An increase in deferred outflows from derivative instruments of \$352 offset by a decrease in derivative hedge assets of \$13 due to year over year changes in the fair market value (See Note 7).

December 31, 2010 versus 2009

- Net capital assets increased at December 31, 2010 by \$2,904. The largest increase of \$1,626 is related to construction work-in-progress and land. Assets related to infrastructure increased by \$834; buses increased by \$163; buildings and structures increased by \$743; new passenger cars and locomotives purchases increased by \$425; bridges and tunnels by \$276; and other capital assets by \$668. These increases were partially offset by additional accumulated depreciation of \$2,000. Some of the more significant projects contributing to the increase included:
  - Rehabilitation of the East River Tunnel, safety and substation improvements, ventilation projects and mainline corridor improvements.
  - Rehabilitation of the Atlantic Avenue Viaduct and the Powell Creek and Hog Island Channel as well as various other line structure projects for a total of \$109.4.
  - Interagency security projects at Penn Station, Jamaica Station and 63rd Street Tunnel for an additional cost of \$4.8.
  - Various signal and communication projects incurred by the MTA Long Island Rail Road and related to the Centralized Traffic Control System, the installation of the Fiber Optic Network and microprocessor upgrades at various interlockings.
  - Rehabilitation of line structures and subway tunnels.
  - Purchase of 202 R160 cars and 163 buses all placed in service in the current year.
  - Power substations modernization and rehabilitation for 70<sup>th</sup> and Green Streets and the Interborough Rapid Transit (“IRT”) lines.
  - Hudson Line and Tarrytown Station improvements continue with installation of precast platform and removal of old platform. At the Poughkeepsie Station the roof replacement continues with work near completion. On the New Haven Line, Port Chester and Rye Stations improvement continue with replacement of station building sidewalk and lighting installation on the inbound platforms.
  - System-wide track replacement, train shed repairs and bridges rehabilitation.
  - Improvements in infrastructure, including replacement of main lines switch, equipment ventilation, lighting and signal communication.
  - Work on the East Side Access project continued in 2010.
  - The replacement of the decks of the Bronx-Whitestone Bridge, and Robert F. Kennedy Bridge was completed as well as the suspension spans at the Verrazano-Narrows Bridge and deck replacement and structural rehabilitation at the Throgs Neck Bridge.

- Other assets net increased by \$1,070. The items contributing to this change include, but are not limited to:
  - Increase in current and noncurrent investments and investments held under capital leases of \$1,078 as a result of:
    - The net increase of \$974 in current and noncurrent investments is derived mainly from an increase in MTAHQ funds in the amount of \$904, FMTAC by \$42 and MTA Bridges and Tunnels by \$28. The MTAHQ's increase is directly related to capital funds available from the issuance of Transportation Revenue Bonds, Series 2010A for \$364, Series 2010B for \$657, Series 2010C for \$510 and Series 2010E for \$750, during January, February, June and December of 2010, respectively. Dedicated Tax Fund Bonds, Series 2010A for \$503 were issued in March 2010. These increases were partially offset by capital expenditures and redemption of bonds (See Notes 3 and 7), while operating funds were applied to cover current year operating losses.
    - Investments under capital lease obligations increased by \$104 due to an increase of collateral funds related to The Bank of America capital lease in the amount of \$10 and the reinvestment of securities that matured in December 2009 in the amount of \$63.
  - Net increase in receivables in the amount of \$68 due to:
    - Other subsidies including Urban Tax, New York State and New York City School Aid receivable increased by \$62, while the New York City subsidy receivable to MTA Bus increased by \$34.
    - Other receivables decreased by a net of \$38. The decrease was derived mainly from FMTAC due to collection on outstanding receivable balances.
  - Material and supplies decreased by \$2. The decrease reflects the usage of parts and supplies for agency operations.
  - Decrease in other noncurrent assets of \$239 was derived mainly from MTAHQ. Unrequisitioned funds for MTA New York City Transit and MTA Bus capital expenditures accrued at year-end were lower in the current year.
  - Deferred outflows from derivative instruments increased by \$360 and derivative assets increased by \$14 due to the implementation of GASB Statement No. 53 in which hedges are classified as either effective or non-effective following one of the methods proposed by the statement (See Note 2). Period to period changes in the fair market value of effective hedges are reported as deferred derivative inflows/outflows (See Note 7).

## Total Liabilities, Distinguishing Between Long-Term Liabilities and Other Liabilities

Current liabilities include: accounts payable, interest payable, salary, wages, vacation, payroll taxes and other employee benefits payable. The current portion of long-term debt and deferred revenues are also included in current liabilities.

Long-term liabilities consist of retirement and death benefits payable, accruals for liabilities arising from injuries to persons, post-employment benefits payable, obligations under capital leases and the non-current portion of long-term debt.

(In millions)	December 2011	December 2010	December 2009	Increase/(Decrease) 2011 - 2010	2010 - 2009
Current liabilities	\$ 4,444	\$ 3,962	\$ 4,427	\$ 482	\$ (465)
Long-term liabilities	<u>42,039</u>	<u>39,377</u>	<u>34,373</u>	<u>2,662</u>	<u>5,004</u>
Total liabilities	<u><u>\$ 46,483</u></u>	<u><u>\$ 43,339</u></u>	<u><u>\$ 38,800</u></u>	<u><u>\$ 3,144</u></u>	<u><u>\$ 4,539</u></u>

### Total Liabilities

### Significant Changes in Liabilities Include:

#### December 31, 2011 versus 2010

Current liabilities increased by \$482. The major items contributing to this change include:

- An increase in accounts payable of \$152 due to timing.
- An increase in accrued expenses of \$121 due largely to:
  - An increase of \$34 in the current portion of retirement and death benefits due to actuary calculations.

- An increase of \$51 in accrued salary and wages comprised of increased accruals for MTA New York City Transit of \$41, and net increased accruals for other agencies of \$10.
- An increase of \$25 in accrued vacation and sick benefits due to a higher number of days accumulated by the employees at the end of the current year.
- An increase of \$29 in the current portion of estimated liabilities from injuries to persons (See Note 10) due mainly to an increase in actuarially determined insurance reserves.
- An increase in other current liabilities of \$209 due largely to:
  - An increase of \$100 in the current portion of obligations under capital lease due to adjustments on the debt service requirements.
  - An increase of \$34 in deferred revenues due to an increase in unredeemed fare cards sold by MTA New York City Transit.
  - An increase of \$63 in the current portion of long-term debt due to debt service payments due on January 1, 2012 and the issuance of new bonds in 2011.

Noncurrent liabilities increased by \$2,662. The major items contributing to this change include:

- An increase of \$1,705 in postemployment benefits other than pensions (“OPEB”) due to an increase in the per capita claims cost assumption for MTA New York City Transit and MTA Bus, the impact in health care reform legislation, and a decrease in the discount rate to 4.0% from 4.2% (See Note 5).
- An increase of \$460 in long-term debt due to new bond issues offset by retirements and debt refundings in 2011 (See Note 7).
- A decrease of \$88 in obligations under capital leases due to principal and interest payments in 2011 and lower lease payment requirements compared with the same period in 2010 (See Note 8).
- An increase of \$239 in noncurrent portion of estimated liabilities arising from injuries to persons due to 2011 actuarial calculations.
- An increase of \$214 and \$101 in derivative liabilities and derivative liabilities-off-market elements, respectively, due to changes in the fair value of derivative instruments (See Notes 2 and 7).
- A decrease of \$88 in obligations under capital leases due to principal and interest payments in 2011 and lower lease payment requirements compared with the same period in 2010.

#### December 31, 2010 versus 2009

Current liabilities decreased by \$465 due to a decrease in accounts payable and accrued expenses in the amount of \$245 and an decrease in other current liabilities by \$220.

- Accounts payable and accrued expenses decreased by \$245 which was derived from:

- A decrease in accounts payable of \$150 due to accelerated payments on invoices prior to December 15, 2010 related to conversion to a new shared service payment system on January 01, 2011.
  - A decrease in accrued expenses of \$95 due to:
    - A decrease in the current portion of retirement and death benefits decreased of \$108. This decrease was derived mainly from MTA New York City Transit in the amount of \$83 attributable to a lag in pension payment at the end of 2009.
    - An increase in the estimated liability arising from injuries to person increased by \$27. This was due to the annual actuarial valuation.
    - An increase in interest payable of \$11 due to the issuance of bonds in 2010 by MTAHQ and MTA Bridges and Tunnels (See Note 7).
    - An increase in vacation and sick benefit costs of \$9 as a result of higher number of days accumulated by the employees at the end of the current year.
    - A decrease in other accrued liabilities of \$36, of which \$20 was derived from the MTAHQ and \$30 from FMTAC. The decrease at MTAHQ was from a reduction in capital accruals due to accelerated payments on invoices during December 2010. Revenue recognition of \$30 in unearned premiums accounted for the decrease in FMTAC's accrued liabilities. These decreases were offset by an increase in MTA New York City Transit liabilities in the amount of \$8.
- Other current liabilities decreased of \$220 was derived from:
  - An increase in deferred revenues of \$33 due to an increase of unredeemed fare cards sold by MTA New York City Transit in the amount of \$18 and unredeemed MTA Bridges and Tunnels tolls of \$12.
  - A net decrease of \$252 in the current portion of long-term debt, consisting of an increase of \$39 for MTAHQ and a decrease of \$291 in MTA Bridges and Tunnels debt.
- Noncurrent liabilities increased by \$5,004 due to:
  - An increase in postemployment benefits other than pensions ("OPEB") of \$1,170. The increase represents the annual OPEB cost per the interim actuarial valuation provided in March 2011 for the year 2010.
  - An increase in long-term debt of \$3,230 (See Note 7 for additional information on long-term debt) are as follows:
    - An increase in MTA Bridges and Tunnels bonds in the amount of \$302 is due primarily to the issuance of the General Revenue Mandatory Tender Bonds in January 2010 for \$150 and the remarketing of the mandatory tender Series 2009A-1. On September 29, 2010, MTA Bridges and Tunnels remarketed General Revenue Variable Rate Bonds, Series 2001C of \$140. In October 2010, MTA Bridges and Tunnels also issued General Revenue Bonds, Series 2010A in the amount of \$347.

- An increase in MTAHQ bonds in the amount of \$2,928 due primarily to the issuance of new debt in 2010 as follows:
  - Transportation Revenue Bonds, Series 2010A was issued in the amount of \$364; Series 2010B for \$657, Series 2010C for \$510 Series 2010D for \$754 and Series 2010E in the amount of \$750 in January, February, July, November and December 2010, respectively.
  - Dedicated Tax Fund Bonds, Series 2010A of \$503 in March 2010.
- Obligations under capital lease increased by \$12 due primarily to principal and interest payments in future years.
- Noncurrent portion of estimated liabilities arising from injuries to persons increased by \$188 as a result of 2010 actuarial calculations.
- Noncurrent liability for pollution remediation project costs decreased by \$6 due to payments and adjustments to remediation costs.
- Other long-term liabilities decreased by \$19 due to:
  - A decrease in FMTAC's RCAMP deposit of \$35; and
  - An increase in MTAHQ's liability due to additional collateral fund requirements of \$17.
- Derivative liabilities increased by \$373 and derivative liabilities-off market elements increased by \$42. GASB Statement No. 53 requires state and local government entities to disclose the fair value of derivative instruments including hedges (See Notes 2 and 7).
- Contract retainage payable increased by \$27 due to new capital projects undertaken by various agencies.

**Total Net Assets, Distinguishing Among Amounts Invested in Capital Assets, Net of Related Debt, Restricted Amounts, and Unrestricted Amounts**

(In millions)	<b>December 2011</b>	<b>December 2010</b>	<b>December 2009</b>	<b>Increase/(Decrease) 2011 - 2010      2010 - 2009</b>	
Invested in capital assets, net of related debt	\$ 20,172	\$ 19,264	\$ 18,779	\$ 908	\$ 485
Restricted for debt service	1,214	1,279	1,161	(65)	118
Restricted for claims	159	146	127	13	19
Unrestricted	<u>(5,529)</u>	<u>(3,813)</u>	<u>(2,626)</u>	<u>(1,716)</u>	<u>(1,187)</u>
Total Net Assets	<u><u>\$ 16,016</u></u>	<u><u>\$ 16,876</u></u>	<u><u>\$ 17,441</u></u>	<u><u>\$ (860)</u></u>	<u><u>\$ (565)</u></u>

***Significant Changes in Net Assets Include:***

**December 31, 2011 versus 2010**

At December 31, 2011, total net assets decreased by \$860 when compared with December 31, 2010. This change includes net non-operating revenues of \$4,070 and appropriations, grants and other receipts externally restricted for capital projects of \$1,841. The increase is offset by operating losses of \$6,771.

The investment in capital assets, net of related debt, increased by \$908. Funds restricted for debt service and claims decreased by \$52 while unrestricted net assets decreased by \$1,716.

**December 31, 2010 versus 2009**

At December 31, 2010, the total net assets decreased by \$565 when compared with December 31, 2009. This change includes net non-operating revenues of \$3,787 and appropriations, grants, and other receipts externally restricted for capital projects of \$1,938. The increase is offset by operating losses of \$6,290.

The investment in capital assets, net of related debt, increased by \$485. Funds restricted for debt service and claims increased by \$137 and unrestricted net assets decreased by \$1,187.

*Revenues and Expenses, by Major Source:*

Year ended December 31, 2011 versus 2010

- Total operating revenues increased by \$520.
  - Fare revenue increased by \$413. The increase was due mainly to the fare increases that took effect on December 30, 2010, partially offset by lower ridership because of a relatively weak local economy. Toll revenues increased by \$85 principally due to the toll increase which also became effective on December 30, 2010.
  - Other operating revenues increased by \$22. This increase derived from MTA New York City Transit is due primarily to student and paratransit reimbursements of expenses expected from New York State and New York City.
- Total non-operating revenue increased by \$346.
  - Total grants, appropriations, and taxes were higher by \$236 for the year ended December 31, 2011. The increase was derived mainly from an increase in the Urban, and Mortgage Recording in the amounts of \$150. Payroll Mobility Tax increased by \$49. The Build America Bond subsidy also increased by \$34 due to higher interest paid.
  - Other non-operating revenues increased by \$110. The increase is derived from other nonoperating income of MTA New York City Transit Authority in the amount of \$81. Other increases are reflected in CDOT subsidies of \$13 and an increase in New York City operating subsidies recoverable for MTA Bus of \$12.

Total operating expenses increased by \$1,001.

- The labor costs increased by \$804. The increase was due to:
  - Increased salaries and wages of \$93 as a result of increased overtime costs of several agencies, primarily MTAHQ due to implementation of the Business Service Center.
  - Increased retirement and employee benefits of \$137 as a result of increased pension costs of \$50 and increased health and welfare costs of \$84 due to higher health insurance rates.
  - Increased postemployment benefits other than pensions of \$574 as a result of a new actuarial valuation for 2011.
- Non-labor operating costs increased by \$197. The increase was due to:
  - Increased fuel and propulsion power of \$77 and increased maintenance and other operating expense of \$54.
  - Increased claims expense arising from injuries to persons increased by \$54.

- Total non-operating expenses increased by \$63 due to increased interest expense of \$130 as a result of new bond issues in 2010 and 2011 offset by favorable changes in the fair value of derivative instruments of \$66.
- Appropriations, grants and other receipts externally restricted for capital projects decreased by \$97 due to delay in Federal grants availability.

Year ended December 31, 2010 versus 2009

- Total operating revenues for the year ended December 31, 2010 were \$353 higher than for the year ended December 31, 2009.
  - Fare revenue increased by \$236. The increase was due mainly to the fare increases that took effect on June 17, 2009 partially offset by lower ridership because of a relatively weak local economy. Toll revenues increased by \$85. The additional revenues were primarily the result of a full year at the higher toll rates implemented on July 12, 2009. Paid traffic totaled 291.6 vehicles in 2010, which was 0.1% more than the prior year's level.
  - Other operating revenues increased by \$32. This increase is due primarily to student and elderly reimbursements for paratransit expenses.
- Total non-operating revenue increased by \$921.
  - Total grants, appropriations, and taxes were higher by \$825 for the year ended December 31, 2010. The increase derived mainly from the Mobility Tax, which was introduced in 2009 by the State of New York for the benefit of the MTA. During the current year, the amount allocated to the MTA was \$1,662 or an increase of \$790 over 2009. Build America Bonds subsidy provided by the Federal Government was \$49 higher than the prior year. Other taxes, specifically, Mortgage Recording Tax, Urban Tax and Mass Transportation Trust Fund receipts continued to decline with a total decrease of \$14.
- Total operating expenses for the year ended December 31, 2010, were higher than the year ended December 31, 2009 by \$208. This increase reflects an increase in labor costs of \$53 and an increase in non-labor expenses in the amount of \$155.
  - The labor costs, including retirement and other employee benefits, increase relates to the following:
    - Salaries and wages decreased by \$47 due to reductions in headcount and overtime costs.
    - Retirement and employee benefits increased by \$13. This unfavorable variance was accounted for by an increase in health and welfare of \$59 primarily due to higher health insurance rates.
    - Postemployment benefits other than pensions increased by \$87. A revised 2010 actuarial annual health cost trend assumption is responsible for the decrease reported.

- Non-labor operating costs were higher by \$197. Major increases include: claims with an increase of \$90, pollution remediation by \$11, fuel and propulsion power by \$17 and depreciation costs by \$60 due to the additional facilities coming on line. The favorable variance is reflected primarily in materials and supplies with a decreased cost of \$19, paratransit and other service contracts by \$14 and insurance by \$9.
- Total non-operating expenses increased by \$85
  - Interest expense on long-term debt increased by \$45 due to the issuance of new bonds in 2010.
  - Change in fair value of derivative financial instruments increased by \$41. Hedges that are regarded as ineffective because the effectiveness test is not met are recognized as investment derivatives and the changes in fair market value from period to period are reported as non-operating revenues or expenses in the statement of revenues, expenses and changes in net assets (See Note 2). GASB Statement No. 53 requires state and local government entities to disclose the fair value of derivative instruments including hedges.
- Appropriations and grants increased by \$653. The increase was derived mainly from an increase in Federal funding, New York State Bond funding and fixed assets purchased with bond proceeds.

#### **4. OVERALL FINANCIAL POSITION AND RESULTS OF OPERATIONS AND IMPORTANT ECONOMIC CONDITIONS**

##### ***Economic Conditions***

Metropolitan New York is the most transit-intensive region in the United States. A financially sound and reliable transportation system is critical to the region's economic well-being. The MTA's business consists of urban subway and bus systems, suburban rail and bus systems, and bridge and tunnel facilities, all of which are affected by many different economic forces. In order to achieve maximum efficiency and success in its operations, the MTA must identify economic trends and continually implement strategies to adapt to changing economic conditions.

In 2011, MTA system-wide utilization was 0.1% higher (2.6 more trips) than ridership for 2010; a result of steadily improving employment in the city. At the same time, vehicle crossing levels at MTA Bridges and Tunnels facilities declined by 2.8%. Bridge and tunnel crossings were adversely affected by gasoline prices that remained higher in 2011 than 2010 despite modest price declines beginning in the second quarter. System-wide utilization was also adversely affected by Tropical Storm Irene, which resulted in the suspension of MTA subway and bus operations during the last weekend of August.

For the fourth quarter of 2011, seasonally adjusted non-agricultural employment in New York City showed an increase of 23.0 thousand jobs (up 0.6% compared with the fourth quarter of 2010). Since the fourth quarter of 2010, employment trended strongly higher in spite of temporary but sharp reversals in the early spring and early fall of 2011. Every quarter of 2011 also showed job growth: employment improved in the first quarter (relative to the prior quarter) by 7,700 jobs; in the second quarter, by 4,200 jobs; in the third quarter, by 8,500 jobs; and in the final quarter, by 2,700 jobs. Taking a broader perspective, by the end of the third quarter, New York City had regained 78,000 of the 135,000 jobs that were lost between the third quarter of 2008 and the fourth quarter of 2009.

The employment gains for New York City in the fourth quarter indicate continuing economic expansion relative to 2010, and are consistent with national economic trends. Real Gross Domestic Product (“RGDP”) improved in each quarter of 2011, at rather slow rates in the first half of the year but at a slightly higher pace in the third quarter; following the second quarter of 2009 – the last quarter in which RGDP contracted – the U.S. economy has now experienced ten consecutive quarters of real GDP growth. While RGDP growth in the first and second quarters of 2011 slowed to 0.4% and 1.3%, respectively, it accelerated to 1.8% in the third quarter and to 2.9% in the fourth quarter.

The New York City Metropolitan Area’s price inflation was lower than the national average in the fourth quarter of 2011: while the CPI for the New York City Metropolitan Area grew at 3.01%, the average for all U.S. cities was 3.29%. Energy was a main driver of overall price inflation in the metropolitan area, rising much faster than the general price level. While the CPI exclusive of energy was only 2.7% higher in the fourth quarter of 2011 than in the fourth quarter of 2010, energy inflation was 7.4% over that period. The New York Harbor spot price for conventional gasoline increased more dramatically, rising 18.2% between the fourth quarters of 2010 and 2011, from an average price of \$2.266 to an average of \$2.678 per gallon. Between September 2010 and April 2011, the price per gallon rose continuously, producing three consecutive quarters of price rises in excess of 15%. After April, by contrast, gasoline prices trended downward, and fourth quarter gasoline prices contracted 6.8% compared with the prior quarter.

In December 2011, anticipating a moderate pace of economic growth and inflation at or below what it deemed consistent with its mandate to foster maximum employment in a context of price stability, the Federal Reserve Bank maintained the Federal Funds rate target at the 0% to 0.25% range, leaving unchanged the rate that prevailed throughout all of 2010 and 2011. From the first signs of the impending economic downturn more than two years ago, the intention of the Federal Reserve Bank was first to forestall a recession and, having failed that, to mitigate its consequences by loosening the tight credit conditions that resulted from the national mortgage crisis. Consequently, the Federal Reserve Bank’s expansionary interventions since the third quarter of 2007 have contrasted sharply with the measures it took to keep inflation under control as the economy emerged from the recession of 2001-2003. In the third quarter of 2007, the Federal Reserve Board elected to lower the Federal Funds Rate by a half point, from 5.25% to 4.75%, the first rate reduction since the end of June 2003. Confronting a deepening contraction in housing markets and mounting insecurity in financial markets, the bank further subjected the Federal Funds Rate to a series of downward adjustments throughout 2008, resulting ultimately in a targeted rate between zero and one quarter percent. There obviously remained little opportunity for the Bank to lower the rate through further open market operations, and it currently remains in the zero to one-quarter percent range. The Federal Open Market Committee’s decision to maintain such a low funds rate was based on continuing high unemployment and slowing global growth, as well as the depressed national housing market.

The influence of Federal Reserve monetary policy on the mortgage market is a matter of interest to the MTA, since variability of mortgage rates can affect the number of real estate transactions and can thereby impact receipts from the Mortgage Recording Tax and Urban Tax, two important sources of MTA revenue. Between the fourth quarter of 2010 and the fourth quarter of 2011, Mortgage Recording Tax collections followed a slightly downward trend, showing no obvious signs of improvement. Consequently, MRT revenues of \$57.4 in the fourth quarter were 8.8% lower than the \$63.0 of one year ago. Monthly receipts have nevertheless shown a remarkable consistency over the same period, exceeding \$23 only once, and falling below \$18 only once since October of 2010.

MTA's receipts of Urban Taxes – those based on commercial activity within New York City – demonstrated a dramatic rise throughout 2010; and in January of 2011, the MTA benefited from the purchase by Google of 111 Eighth Avenue, an extraordinarily large real estate transaction that, by itself, generated \$15.9 in Real Property Transfer Tax revenue and contributed to the strong first quarter rise in Urban Taxes. Second quarter Urban Tax receipts of \$67 were 20% higher than receipts in the best quarter of 2010. In the third quarter, receipts of Urban Taxes rose to \$131.9, and the \$52.1 in July was the highest monthly collection since August 2008. While fourth quarter receipts fell to \$75.6, 2011 fourth quarter receipts were 34% higher than one year ago.

### ***Results of Operations***

MTA Bridges and Tunnels' paid traffic for the year ended December 31, 2011 operating revenues increased by \$83.7 compared to December 31, 2010. Toll revenues increased by \$84.5 mainly due to the toll increase effective December 30, 2010.

The E-ZPass electronic toll collection system experienced year-to-year increases in market share. Total average market share as of December 31, 2011 was 79.4% compared with 75.8% in 2010. The average weekday market shares were 81.3% and 77.9% for 2011 and 2010, respectively.

MTA New York City Transit's total revenue from fares was \$3,629 in 2011, an increase of \$309 or 9.3%, due mostly to the annualized effect of the December 2010 fare increase. Total ridership was 2,315, an increase of 5 or 0.2% from 2010. Subway ridership was 1,640, the highest annual subway ridership since 1950, and an increase of 36 or 2.2% from 2010. Bus ridership was 665, a decrease of 32 or 4.5% from 2010, due mostly to a continuation of an ongoing negative trend.

In 2011, The MTA Long Island Rail Road continued to experience a decline in ridership as a result of the weak economy, poor job market and a combination of unexpected events – including an Amtrak derailment, a blizzard, an ice storm and a hurricane. Ridership stood at 81.0 on passenger revenues of \$571.7, which represents 94% of total revenues. Ridership of 81.0 represented a decrease of 0.7% from 81.6 riders in 2010 for both commuter and off-peak markets.

MTA Metro-North Railroad's operating revenue during the year ended 2011 increased by \$41.8 or 7.3% compared to the year ended 2010. Passenger fares account for 92.2% and 91.8% of operating revenue in 2011 and 2010, respectively. The increases in revenue occurred on the Hudson, Harlem and New Haven Lines for monthly and weekly commutation as well as non-commutation ridership. This increase is primarily a reflection of improved economic conditions in the New York metropolitan market and a full year of revenues earned from the fare increase implemented on December 30, 2010.

The MTA receives the equivalent of four quarters of Metropolitan Mass Transportation Operating Assistance ("MMTOA") receipts each year, with the state advancing the first quarter of each succeeding calendar year's receipts in the fourth quarter of the current year. This results in little or no Metropolitan Mass Transportation Operating Assistance receipts being received during the first quarter of each calendar year. The MTA has made other provisions to provide for cash liquidity during this period. During 2011, the State appropriated \$1.2 billion in MMTOA funds. There has been no change in the timing of the state's payment of, or MTA's receipt of, Dedicated Mass Transportation Trust Fund ("MTTF") receipts, which MTA anticipates will be sufficient to make monthly principal and interest deposits into the Debt Service Fund for the Dedicated Tax Fund Bonds.

The total MRT collected as at December 31, 2010 declined by 3.5% compared to December 2009 from \$244.6 to \$236.1. The total MRT collected as at December 31, 2011 increased by 3.7% compared to December 2010 from \$236.1 to \$244.8.

### ***Capital Programs***

At December 31, 2011, \$5,037 had been committed and \$1,370 had been expended for the combined 2010-2014 MTA Capital Programs and the 2010-2014 MTA Bridges and Tunnels Capital Program, and \$22,785 had been committed and \$17,549 had been expended for the combined 2005-2009 MTA Capital Programs and the 2005-2009 MTA Bridges and Tunnels Capital Program, and \$21,453 had been committed and \$20,431 had been expended for the combined 2000-2004 MTA Capital Programs and the 2000-2004 MTA Bridges and Tunnels Capital Program.

The MTA Group has ongoing capital programs, which except for MTA Bridges and Tunnels and MTA Long Island Bus are subject to the approval of the Metropolitan Transportation Authority Capital Program Review Board (“CPRB”), and are designed to improve public transportation in the New York Metropolitan area.

*2010-2014 Capital Program* — Capital programs covering the years 2010-2014 were originally approved by the MTA Board in September 2009. The capital programs for the Transit and Commuter systems were subsequently submitted to the CPRB in October 2009 for (1) the commuter railroad operations of the MTA conducted by MTA Long Island Rail Road and MTA Metro-North Railroad (the “2010–2014 Commuter Capital Program”), (2) the transit system operated by MTA New York City Transit and its subsidiary, MaBSTOA, the MTA Bus Company, and the rail system operated by MTA Staten Island Railway (the “2010–2014 Transit Capital Program”). This plan was disapproved by the CPRB in December 2009. A revised 2010-2014 Capital Program was approved by the CPRB in June 2010. The capital program for the toll bridges and tunnels operated by MTA Bridges and Tunnels (the “2010–2014 MTA Bridges and Tunnels Capital Program”) was approved by the MTA Board in September 2009 and subsequently submitted to the CPRB in October 2009. This plan was disapproved by the CPRB in December 2009. The MTA Board approved the revised plan on April 28, 2010 and CPRB approval of the five year program of projects was obtained on June 1, 2010. The approved CPRB program fully funded only the first two years (2010 and 2011) of the plan, with a commitment to come back to CPRB with a funding proposal for the last three years for the Transit and Commuter Programs. On December 21, 2011, the MTA Board approved an amendment to the 2010-2014 capital program that fund the last three years of the program of projects through a combination of self-help (efficiency improvements and real estate initiatives), participation by our funding partners and innovative and pragmatic financing arrangements.

As approved by the MTA Board in December 2011, the 2010–2014 MTA Capital Programs and the 2010–2014 MTA Bridges and Tunnels Capital Program provided for \$24,274 in capital expenditures, of which \$11,649 relates to ongoing repairs of, and replacements to, the transit system operated by MTA New York City Transit and MaBSTOA and the rail system operated by MTA Staten Island Railway; \$3,860 relates to ongoing repairs of, and replacements to, the commuter system operated by MTA Long Island Rail Road and MTA Metro-North Railroad; \$5,739 relates to the expansion of existing rail networks for both the transit and commuter systems to be managed by MTA Capital Construction; \$335 relates to a multi-faceted security program including MTA Police Department; \$315 relates to MTA Interagency; \$297 relates to MTA Bus Company initiatives; and \$2,079 relates to the ongoing repairs of, and replacements to, MTA Bridges and Tunnels facilities.

The combined funding sources for the MTA Board-approved 2010–2014 MTA Capital Programs and 2010–2014 MTA Bridges and Tunnels Capital Program include \$10,503 in MTA Bonds, \$2,079

in MTA Bridges and Tunnels dedicated funds, \$6,303 in Federal Funds, \$167 in MTA Bus Federal and City Match, \$762 from City Capital Funds, and \$1,490 from other sources. Also included is a \$2,200 Railroad Rehabilitation & Improvement Financing (RRIF) loan to support East Side Access, administered by the Federal Railroad Administration, and \$770 in State Assistance funds added to re-establish a traditional funding partnership.

At December 31, 2011, \$5,037 had been committed and \$1,370 had been expended for the combined 2010-2014 MTA Capital Programs and the 2010-2014 MTA Bridges and Tunnels Capital Program.

*2005-2009 Capital Program* — Capital programs covering the years 2005-2009 were originally approved by the MTA Board in April 2005 and subsequently by the CPRB in July 2005 for (1) the commuter railroad operations of the MTA conducted by MTA Long Island Rail Road and MTA Metro-North Railroad (the “2005–2009 Commuter Capital Program”), (2) the transit system operated by MTA New York City Transit and its subsidiary, MaBSTOA, and the rail system operated by MTA Staten Island Railway (the “2005–2009 Transit Capital Program”), and (3) the toll bridges and tunnels operated by MTA Bridges and Tunnels (the “2005–2009 MTA Bridges and Tunnels Capital Program”). The 2005–2009 MTA Bridges and Tunnels Capital Program was effective upon adoption by the MTA Board in April 2005. The 2005–2009 amended Commuter Capital Program and the 2005–2009 Transit Capital program (collectively, the “2005–2009 MTA Capital Programs”) were last amended by the MTA Board in July 2008. This latest 2005-2009 MTA Capital Program amendment was resubmitted to the CPRB for approval in July 2008, and was approved in August 2009.

As last amended by the MTA Board, the 2005–2009 MTA Capital Programs and the 2005–2009 MTA Bridges and Tunnels Capital Program, provide for \$23,717 in capital expenditures. At March 31, 2011, the 2005-2009 MTA Capital Programs budget increased by \$666, primarily due to the receipt of new American Recovery and Reinvestment Act (“ARRA”) funds and additional City Capital funds for MTA Capital Construction work still underway. At December 31, 2011, the 2005-2009 MTA Capital Programs budget increase by another \$220 mostly due to additional City funding to complete the extension of the #7 subway line. Of the \$24,603 now provided in capital expenditures, \$11,597 relates to ongoing repairs of, and replacements to, the transit system operated by MTA New York City Transit and MaBSTOA and the rail system operated by MTA Staten Island Railway; \$3,775 relates to ongoing repairs of, and replacements to, the commuter system operated by MTA Long Island Rail Road and MTA Metro-North Railroad; \$495 relates to a security program throughout the transit, commuter and bridge and tunnel network; \$186 relates to certain interagency projects; \$7,177 relates generally to the expansion of existing rail networks for both the transit and commuter systems to be managed by the MTA Capital Construction Company (including the East Side Access, Second Avenue Subway and #7 subway line); \$1,221 relates to the ongoing repairs of, and replacements to, bridge and tunnel facilities operated by MTA Bridges and Tunnels; and \$152 relates to capital projects for the MTA Bus.

The combined funding sources for the MTA Board-approved 2005–2009 MTA Capital Programs and 2005–2009 MTA Bridges and Tunnels Capital Program include \$9,379 in MTA and MTA Bridges and Tunnels Bonds (including funds for LaGuardia Airport initiative), \$1,450 in New York State general obligation bonds approved by the voters in the November 2005 election, \$9,598 in Federal Funds, \$2,816 in City Capital Funds, and \$1,360 from other sources.

At December 31, 2011, \$22,785 had been committed and \$17,549 had been expended for the combined 2005-2009 MTA Capital Programs and the 2005-2009 MTA Bridges and Tunnels Capital Program.

*2000-2004 Capital Program* — Capital programs covering the years 2000-2004 were originally approved by the MTA Board in April 2000 and subsequently by the CPRB in May 2000 for (1) the commuter railroad operations of the MTA conducted by MTA Long Island Rail Road and MTA Metro-North Railroad (the “2000-2004 Commuter Capital Program”), (2) the transit system operated by the MTA New York City Transit and its subsidiary, MaBSTOA, and the rail system operated by MTA Staten Island Railway (the “2000-2004 Transit Capital Program”), and (3) the toll bridges and tunnels operated by MTA Bridges and Tunnels (the 2000-2004 MTA Bridges and Tunnels Capital Program”). The 2000-2004 MTA Bridges and Tunnels Capital Program was effective upon adoption by the MTA Board in April 2000. The 2000-2004 amended Commuter Capital Program and the 2000-2004 amended Transit Capital Program (collectively, the “2000-2004 MTA Capital Programs”) were most recently amended by the MTA Board in December 2006. This latest 2000-2004 MTA Capital Program amendment was submitted to the CPRB for approval in April 2007, but was subsequently vetoed.

As last amended by the MTA Board, the 2000-2004 MTA Capital Programs and the 2000-2004 MTA Bridges and Tunnels Capital Program, provide for \$21,147 in capital expenditures. By March 31, 2011, the 2000-2004 MTA Capital Programs budget increased by \$610, primarily due to the receipt of ARRA funds, transfers from the 2005-2009 Capital Program, and MTA operating sources required to fund cost increases for work still underway. At December 31, 2011, the budget decreased by \$30, mostly due to transfer of CPRB reserve funds to the 2010-2014 Capital Program. This revised budget now provides \$21,727 in capital expenditures, of which \$10,447 relates to ongoing repairs of, and replacements to, the Transit System operated by MTA New York City Transit and MaBSTOA and the rail system operated by MTA Staten Island Railway; \$3,994 relates to ongoing repairs of, and replacements to, the Commuter System operated by MTA Long Island Rail Road and MTA Metro-North Railroad; \$5,354 relates to the expansion of existing rail networks for both the transit and commuter systems to be managed by MTA Capital Construction; \$204 relates to planning and design and customer service projects; \$244 relates to World Trade Center repair projects; \$982 relates to the ongoing repairs and replacements to MTA Bridges and Tunnels facilities; and \$502 relates to MTA Bus.

The combined funding sources for the MTA Board-approved 2000–2004 MTA Capital Programs and 2000–2004 MTA Bridges and Tunnels Capital Program (with revisions through the July 2008) include \$7,897 in bonds, \$6,940 in Federal funds, \$4,575 from the proceeds of the MTA/MTA Bridges and Tunnels debt restructuring in 2002, and \$2,315 from other sources.

At December 31, 2011, \$21,453 had been committed and \$20,431 had been expended for the combined 2000-2004 MTA Capital Programs and the 2000-2004 MTA Bridges and Tunnels Capital Program.

The federal government has a contingent equity interest in assets acquired by the MTA with federal funds, and upon disposal of such assets, the federal government may have a right to its share of the proceeds from the sale. This provision has not been a substantial impediment to the MTA’s operation.

## **5. CURRENTLY KNOWN FACTS, DECISIONS, OR CONDITIONS**

During the twelve months of 2011, deteriorated credit quality of bond insurers continued to put pressure on the auction segments of the MTA’s variable rate portfolio. Auctions for all of the \$327.625 of auction rate bonds outstanding (the interest rate for such bonds is determined based on a multiple of the London Interbank Offered Rate) as of the end of December 31, 2011, had been failing. MTA continues to closely monitor the performance of its auction rate bonds, insured variable rate

demand bonds and variable rate demand bonds for which liquidity is provided by the lower rated banks.

## **Recent Developments Affecting MTA**

### ***The Financial Plan 2012-2015***

**General.** The 2011 November Forecast, the MTA 2012 Final Proposed Budget and November Financial Plan 2012-2015 (collectively, the November Plan) was presented to the MTA Board for review at its November 16, 2011 meeting. At its December 21, 2011 meeting, the MTA Board approved the November Plan with certain modifications described below under the subheading “December Modifications to the Plan” (as so modified, the December Plan).

At its February 27, 2012 meeting, the MTA Finance Committee was presented with the MTA 2012 Adopted Budget—February Financial Plan 2012-2015 (collectively, the February Financial Plan), which incorporates Board approved actions and technical adjustments, previously set forth “below-the-baseline” in the December Plan, into the Financial Plan budgets and forecast and establishes a 12-month allocation of the 2012 Budget included in the December Plan. These changes are described below under the subheading “February Modifications to the December Plan”.

The February Financial Plan reaffirms the MTA’s commitment to establishing fiscal stability for the MTA’s finances. The Plan continues a focus on cost cutting to achieve \$850 annual recurring savings by 2015 without budget-driven service cuts; continued receipt of dedicated taxes and subsidies; implementation of biennial, moderate fare and toll increases; and agreement with labor unions for “net zero” wage savings of more than \$300 annually by 2015. The Plan will protect the revenues budgeted for capital pay-as-you-go, so that they will be available to pay debt service on new debt critical to funding the final three years of the MTA 2010-2014 Capital Program (the MTA 2010-2014 Capital Program). The capital funding proposal, approved by the MTA Board on December 21, 2011, was sent to the Capital Program Review Board (“CPRB”) on February 23, 2012 for its review and approval (the Amended Program). On March 27, 2012, the Amended Program, in accordance with State law, was deemed approved as submitted to the CPRB.

**MTA Building Blocks of Fiscal Stability.** In early 2010, the MTA responded to a loss of \$900 in dedicated taxes and subsidies by beginning a process that would reduce its cost structure. Those efforts, which included administrative reductions, paratransit efficiencies, overtime efficiencies, departmental consolidations, and service reductions, produced annualized savings of over \$500. In November 2010, the MTA identified additional new processes for reducing expenses. At that time, efficiency targets were proposed that would save an additional \$75 in 2011, increasing to \$200 in 2014 through streamlining, downsizing, the elimination of redundancies, and improved procurement practices. In the case of the latter, the MTA has re-examined its planned purchases of both goods and services and has found ways to generate significant savings while still meeting its goals.

The November Plan incorporated the MTA’s increased efficiency targets that were established in July, 2011 and significantly reduced the portion of the future targets that are unidentified. The total targeted savings in the November Plan were increased to \$96 in 2011 and savings are targeted to grow to \$241 in 2014 and \$266 in 2015. The MTA has identified all but \$36 of the specific components of the targeted November Plan 2014 savings; as recently as a year ago, most of those components had not yet been identified. These combined efficiencies are now anticipated to generate recurring savings that will annualize to approximately \$850 by 2015, with a cumulative total efficiency savings in the November Plan alone of almost \$4 billion.

The November Plan includes savings from paratransit efficiencies, health care contract re-bids, non-revenue vehicle fleet reductions, and further consolidations. Savings in paratransit costs, which have been growing at an annual rate of 17%, will be derived by building upon efficiencies implemented in 2011.

Approximately 60% of the MTA's expenses constitute labor-related costs. The MTA's November Plan includes three years of "net zero" wage savings which are in line with the collective bargaining agreements negotiated by the State and its two largest unions, the Civil Service Employees Association and Public Employees Federation. As of the end of 2011, non-represented employees have gone three years without a wage increase.

Consistent with the 2009 State consensus on the MTA financing that resulted in the passage of the MTA financial assistance legislation (Chapter 25 of the Laws of 2009), the November Plan includes 7.5% fare and toll yield increases in 2013 and 2015.

**Weather Impacts.** Three significant weather events took place during 2011 that affected the MTA operations and finances. The MTA experienced lower revenues and higher expenses due to record breaking January snowfalls, including one major blizzard. In early September, Tropical Storm Irene resulted in more than three inches of rain throughout the MTA's service area. To ensure the safety of customers and employees, service on the entire system was suspended in advance of the storm; service was restored as soon as the damage was assessed and operations were deemed safe. The third event was an unusually early, heavy snowfall on October 29, 2011.

Tropical Storm Irene caused extensive infrastructure damage to some of the MTA properties and in particular Metro-North's Port Jervis line, with projected capital costs of \$27. Repairs to the Port Jervis line were completed in November 2011 ahead of schedule and under budget.

In the November Plan, the MTA estimated the operating financial impact associated with January's record snowfalls and Tropical Storm Irene at approximately \$90. (Additionally, in the November Plan, the MTA general reserve was maintained at \$8 to cover the October snowstorm and potential storms through the remainder of the year.) Recoveries from insurance and the Federal Emergency Management Agency for damage resulting from Tropical Storm Irene are anticipated in 2012.

**November Plan Out-Year Projections.** The November Plan projected a \$179 ending cash balance in 2011 that will be used to balance 2012 and an ending cash balance of \$96 in 2013. Projected deficits of \$122 in 2014 and \$206 in 2015 reflected a slight worsening from the deficits projected in the July Plan for those years. These projected out-year deficits are largely driven by costs that increase at a rate greater than inflation. For example, while CPI is projected to grow at approximately 2% annually over the November Plan period, retiree and employee health care costs will each increase 10% annually and pension costs will increase by 7% annually. With the projected fare increase in 2013, the November Plan anticipated a modest \$96 surplus, serving to reduce the size of the projected 2014 deficit to \$122, as noted above. By 2015, the budget for these categories of expenses will grow by \$880 offsetting more than 90% of the projected increase in revenue from the proposed 2013 and 2015 fare and toll changes.

The November Plan projected the elimination of most of the remaining general reserve in 2011, and a significant shift in the timing of expenses from 2011 to 2012 permitted the MTA to repay an inter-agency loan of \$135 in 2011 rather than in 2012, as was assumed in July 2011. Such loan was repaid in 2011. In 2012 and beyond, the general reserve is projected by the November Plan to increase to approximately one percent of the MTA's operating budget. The November Plan projects the continuance of the fuel hedge program through 2015.

**December Modifications to the November Plan.** Subsequent to the November Plan, (i) the MTA made several important re-estimates, (ii) certain legislative and State actions have occurred, and (iii) the MTA responded with certain management actions, each of which are described below:

- **MMTOA Operating Assistance.** Discussions with the State Division of the Budget (“DOB”) caused the MTA to change its estimate of State operating aid to the MTA from Metropolitan Mass Transportation Operating Assistance (“MMTOA”) by an amount that is \$87 lower in 2012 than was forecast in the November Plan. For 2013 through 2015, revised MMTOA estimates, when compared with the November Plan, are unfavorable by \$58, \$45, and \$47, respectively. The downward revisions are attributable to lower revenues, updated allocation projections and an increase in the amount that the State will reserve (and therefore, not pay out) to hedge against economic risks.
- **MTA Aid.** These taxes ran \$13 favorable in 2011, with the increase attributable to the auto rental tax and the taxi surcharge; the majority of this variance reflected receipts since the preparation of the November Plan. Based on discussions with DOB, \$7 of this favorable variance is likely to be recurring. While the improvement in MTA Aid offsets a small portion of the reduced MMTOA projections, the net 2011-2012 subsidy impact is \$67 unfavorable.
- **Payroll Mobility Tax.** On December 9, 2011, Governor Cuomo signed into law legislation (the December Legislation) that makes significant changes to the payroll mobility tax. The December Legislation further expressly provides that any reductions in transit aid attributable to these reductions in the payroll mobility tax “shall be offset through alternative sources that will be included in the state budget” (PMT Revenue Offset).

As a result of the changes to the payroll mobility tax in the December Legislation, the Governor’s Memorandum in Support of the December Legislation projects a reduction in revenues collected from the payroll mobility tax. On an annualized basis, the State estimates this reduction to be \$310 in 2012. Since the December Legislation’s employer-related provisions did not take effect until April 1, 2012, the 2012 calendar year impact is projected to be \$250. The December Legislation and the 2012-13 New York State Executive Budget provided for such reductions to be offset through alternative sources to be included in New York State’s 2012-13 budget (PMT Revenue Offset). See “Enacted New York State 2012-13 Budget” below in this heading.

- **Diversion of State Aid.** The December Legislation also amended the Executive Law to prohibit the Director of the Budget from diverting revenues constituting State aid to the MTA, derived from taxes and fees paid into any fund, including the Mass Transportation Operating Assistance Fund (the source of MMTOA operating aid to the MTA), the Dedicated Mass Transportation Trust Fund (the source of DTF funding), and the fund into which the payroll mobility tax receipts and related taxes and fees are paid, into the State’s general fund or any other fund, except upon the declaration by the Governor of a fiscal emergency and the enactment of legislation authorizing the otherwise prohibited diversion. This amendment, colloquially referred to as the “Lock-Box” bill, was signed into law on December 16, 2011 (Executive Law, Section 182).
- **2011 General Reserve.** The November Plan left \$8 in the MTA’s General Reserve for 2011 to mitigate potential unfavorable financial impacts from the October severe weather event described above and other potential storms through the remainder of the year. The December Plan released the rest of that reserve, improving the cash carryover into 2012 by \$8.
- **2012 General Reserve.** The November Plan recognized the risks posed by a tenuous economic recovery. This risk was one reason that the cash reserve for 2012 was increased to \$125,

approximately 1% of the MTA's operating budget. Since the reduced MMTOA estimate is one of the risks cited in the November Plan, and that risk has now been quantified and incorporated into the adopted Plan, the December Plan lowered the 2012 General Reserve by \$25 to partially cover the MMTOA shortfall. Out-year reserve levels will not be adjusted.

- *Deficit Reduction Measures.* The use of reserves offsets some but not all of the above unfavorable subsidy re-estimate. In order to eliminate the remaining 2012 shortfall and to offset the net subsidy reduction in the out-years, the December Plan requires the implementation of \$35 in recurring deficit reduction measures that currently are unspecified. These measures will be identified early in 2012 and be incorporated into the July 2012 Financial Plan.
- *Cash Balances.* The December Plan projected ending cash balances of \$200 in 2011, \$1 in 2012, and \$80 in 2013 with projected cash deficits of \$141 in 2014 and \$211 in 2015. Compared with the November Plan, the forecast of Net Cash Balances is \$21 higher in 2011 and flat in 2012. Projections for 2013 through 2015 are slightly worse than November by \$16, \$19, and \$5, respectively.

**February Modifications to the December Plan.** The February Financial Plan includes certain technical adjustments that do not materially impact the December Plan. Unlike the July and November Plans, the February Financial Plan does not include any new proposals. The February Financial Plan projects ending balances of \$192 in 2011, \$1 in 2012 and \$80 in 2013 with projected cash deficits of \$137 in 2014 and \$204 in 2015. These represent very minor changes from the December Plan. The implementation of technical changes resulted in the need to increase the amount of the annual unspecified deficit reduction from \$35 to \$40.

**Risks to the February Financial Plan.** Despite an improved outlook relative to July, significant budgetary risks remain. The regional economy remains weak, and the MTA has limited financial reserves to offset lower-than-expected operating revenues and dedicated taxes. The February Financial Plan assumes that State budget actions will reflect full remittance to the MTA of all resources collected on the MTA's behalf; however, recent reports from the New York State Division of the Budget and the Office of the State Comptroller highlight potential weakness in State revenue collections, which may present challenges to full and timely remittance to the MTA. The February Financial Plan further assumes that fare and toll increases will be implemented as forecasted and that labor settlements will include three years of "net zero" wage growth.

Another risk to the MTA is finalizing the Federal Railroad Rehabilitation & Improvement Financing Program ("RRIF") loan funding for the East Side Access project in MTA's 2010-2014 Capital Program. The February Financial Plan includes capital pay-as-you-go which will be re-budgeted to repay the RRIF loan and to pay debt service on new bonds to fully fund capital commitments in the last three years of the MTA 2010-2014 Capital Program. If the \$2.2 billion RRIF loan application is denied, MTA would anticipate seeking modification of the Program to finance this amount through bond financing, with any resultant shortfalls being made up through either greater efficiency savings or program reductions. MTA management is developing management strategies that can be implemented should any of the foregoing risks to the February Financial Plan assumptions occur.

**Enacted New York State 2012-13 Budget.** On April 1, 2012 the New York State Legislature enacted its 2012-13 budget (Enacted State Budget). The Enacted State Budget provides for State subsidy appropriations to MTA as reflected in MTA's February Plan. See a summary below of the applicable provisions in the Enacted State Budget:

- *MMTOA*. The Enacted State Budget included a split in the transmission tax component of the MMTOA taxes between the upstate Public Transportation Systems Operating Assistance Account (“PTOA”) and MMTOA account. Of the eighty percent of the transportation and transmission taxes that previously flowed into the MMTOA account, twenty-six percent has been diverted to the upstate PTOA account and fifty-four percent remains in the MMTOA account. The MTA February Financial Plan forecasts the transfer will be approximately \$21.5. This provision sunsets in one year, however; there can be no assurance that the Legislature will not enact a similar sharing of such revenues in future years.
- *Payroll Mobility Tax*. The Enacted State Budget includes an appropriation of \$250 to MTA for the PMT Revenue Offset.
- *Capital Plan Funding*. The Enacted State Budget includes a provision for new capital financing for the MTA in the amount of \$770.
- *Statutory Debt Ceiling*. The MTA statutory debt ceiling was raised by \$7 billion over the next three years as follows: \$2.334 billion in the first year, \$2.333 billion in the second year and \$2.333 billion in the third year.
- *Rockaway Resident Toll Rebate Program*. The Enacted State Budget expressly provides for the State to pay the MTA the costs associated with restoration of the Rockaway Resident Toll Rebate Program to its prior level and appropriates to the MTA sufficient funds, estimated at \$3.9, to restore the rebate for tolls incurred on the first two trips made by eligible participants across the Cross Bay Bridge within a calendar day (using the same E-ZPass tag). In March 2012 the MTA Board authorized appropriate officers of the MTA and MTA B&T to take the steps required to restore the Rebate Program to its prior level, retroactive to April 1, subject to the express condition that providing this rebate is contingent upon having sufficient funds to do so and should the funds allocated by the Legislature be depleted before the next appropriation of such funds, the first two trips across the Cross Bay Bridge within a calendar day (using the same E-ZPass tag) will cease to be subject to the rebate and the customer will be charged the applicable resident discount toll for the Cross Bay Bridge.

#### ***MTA 2010-2014 Capital Program Funding Proposal Update***

The MTA Board approved the Amended Program to the MTA 2010-2014 Capital Program on December 21, 2011. The Amended Program was sent to the CPRB on February 23, 2012 for its review and approval. On March 27, 2012, the Amended Program, in accordance with State law, was deemed approved as submitted to the CPRB.

The Amended Program provides an innovative and pragmatic approach to fully fund the last three years of the MTA 2010-2014 Capital Program that recognizes the current difficult economic environment. The Amended Program will deliver critical safety and reliability investments for core infrastructure projects and fund all Second Avenue Subway contracts and most East Side Access contracts. The Amended Program will accomplish these benefits without raising taxes or fares and tolls beyond what has been planned.

There are four key elements to the Amended Program:

- Delivering projects more efficiently and reforming processes to assure better bids (with a total program reduction of \$4 billion, \$2 billion of which is expected to be achieved over the last three years of the Amended Program without deferring projects).

- Applying for a loan under an innovative federal loan program, the RRIF program administered by the Federal Railroad Administration. MTA expects to repay the loan obligation on parity with Transportation Revenue Bonds.
- Adopting a pragmatic financing approach by reallocating revenues currently in the February Financial Plan for capital pay-as-you-go to repay the RRIF loan and to support additional debt without increasing the burden on the operating budget.
- Re-establishing the MTA's historic funding partnerships with the State and the City.

**East Side Access Project.** The budget and schedule for the East Side Access project are currently being reevaluated by the MTA.

#### ***Payroll Mobility Tax Litigation***

The MTA, along with the State of New York and various officials of the State of New York (the State Defendants), has been defending several actions commenced in New York State Supreme Court challenging the constitutionality of legislation that enacted the payroll mobility tax (Chapter 25 of the Laws of 2009). The plaintiffs include five counties — Suffolk, Nassau, Westchester, Rockland and Putnam — a number of towns and villages, a public school district, and certain private plaintiffs. The actions are: *Hampton Transportation Ventures, Inc. v. Silver*; *Town of Southampton and Town of Southold v. Silver*; *Town of Brookhaven v. Silver*; *Town of Huntington v. Silver*; *William Floyd Union Free School District v. State of New York*; *Mangano and County of Nassau v. Silver*; *Vanderhoef and County of Rockland v. Silver*; and *Town of Smithtown v. Silver*.

Summary judgments have been granted to the MTA and the State Defendants ordering dismissal of four of the lawsuits which had been pending in Supreme Court, Albany County. Three of the proceedings were dismissed by Justice Connolly on September 15, 2011: *Town of Brookhaven v. Silver*; *Town of Huntington v. Silver*; and *Town of Southampton and Town of Southold v. Silver*. The Towns of Brookhaven and Huntington are appealing the orders dismissing their lawsuits; the Towns of Southampton and Southold are not. The *Vanderhoef/County of Rockland* action was dismissed by Justice McNamara on April 12, 2012. In addition, stipulations to discontinue their actions with prejudice were filed on October 21, 2011 in the *Hampton Transportation Ventures* action which had been pending in Supreme Court, Albany County and on January 19, 2012 in the *William Floyd Union Free School District* action which was pending in Supreme Court, New York County.

Nassau County has served a motion for summary judgment in Supreme Court, Nassau County, which is now returnable May 23, 2012. All of the other plaintiffs have made similar motions of their own or joined in Nassau County's motion. MTA intends to oppose those motions and to file a cross-motion for summary judgment against all plaintiffs which will also be returnable May 23, 2012.

The MTA and the State Defendants have appealed the denial of their motions to change the venue of the County of Nassau and Town of Smithtown actions from Nassau County to Albany County. The Counties of Nassau, Suffolk, and Westchester and several other plaintiffs have filed responses to the appeal, and the MTA and the State Defendants have filed replies. The Town of Smithtown is expected to respond to the appeal in mid-April, with MTA to submit its reply at the end of April 2012.

The MTA, based upon its review of the claims asserted, believes all of these noted lawsuits challenging the constitutionality and legality of Chapter 25 of the Laws of 2009 lack merit, and the MTA intends to continue to defend vigorously against the remaining actions, the outcomes of which must await further determinations by the courts.

**1. BASIS OF PRESENTATION**

**Reporting Entity** — The Metropolitan Transportation Authority (“MTA”) was established in 1965, under Section 1263 of the New York Public Authorities Law, and is a public benefit corporation and a component unit of the State of New York (“NYS”) whose mission is to continue, develop and improve public transportation and to develop and implement a unified public transportation policy in the New York metropolitan area.

These consolidated financial statements are of the Metropolitan Transportation Authority (“MTA”), including its related groups (collectively, the “MTA Group”) as follows:

**Metropolitan Transportation Authority and Related Groups**

- Metropolitan Transportation Authority Headquarters (“MTAHQ”) provides support in budget, cash management, finance, legal, real estate, treasury, risk and insurance management, and other services to the related groups listed below.
- The Long Island Rail Road Company (“MTA Long Island Rail Road”) provides passenger transportation between New York City (“NYC”) and Long Island.
- Metro-North Commuter Railroad Company (“MTA Metro-North Railroad”) provides passenger transportation between NYC and the suburban communities in Westchester, Dutchess, Putnam, Orange, and Rockland counties in NYS and New Haven and Fairfield counties in Connecticut.
- Staten Island Rapid Transit Operating Authority (“MTA Staten Island Railway”) provides passenger transportation on Staten Island.
- Metropolitan Suburban Bus Authority (“MTA Long Island Bus”) provides public bus service in NYC and Nassau County, New York. The Authority’s Lease and Operating Agreement with Nassau County, dated as of January 15, 1973, as amended was terminated effective December 31, 2011. The remaining assets are mostly intercompany receivables and cash. They will be collected by the Authority in 2012. The remaining liabilities are comprised of accrued expenses that the Authority will pay in 2012 and long term liabilities which are Postemployment Benefits Other Than Pensions and Estimated Liability arising from injuries to persons will be funded by the MTA.
- First Mutual Transportation Assurance Company (“FMTAC”) provides primary insurance coverage for certain losses, some of which are reinsured, and assumes reinsurance coverage for certain other losses.
- MTA Capital Construction Company (“MTA Capital Construction”) provides oversight for the planning, design and construction of current and future major MTA system-wide expansion projects.

- MTA Bus Company (“MTA Bus”) operates certain bus routes in areas previously served by private bus operators pursuant to franchises granted by the City of New York. .
- MTAHQ, MTA Long Island Rail Road, MTA Metro-North Railroad, MTA Staten Island Railway, MTA Long Island Bus, FMTAC, MTA Capital Construction, and MTA Bus, collectively are referred to herein as MTA. MTA Long Island Rail Road and MTA Metro-North Railroad are referred to collectively as the Commuter Railroads.
- New York City Transit Authority (“MTA New York City Transit”) and its subsidiary, Manhattan and Bronx Surface Transit Operating Authority (“MaBSTOA”), provide subway and public bus service within the five boroughs of New York City.
- Triborough Bridge and Tunnel Authority (“MTA Bridges and Tunnels”) operates seven toll bridges, two tunnels, and the Battery Parking Garage, all within the five boroughs of New York City.

MTA New York City Transit and MTA Bridges and Tunnels are operationally and legally independent of the MTA. These related groups enjoy certain rights typically associated with separate legal status including, in some cases, the ability to issue debt. However, they are included in the MTA’s consolidated financial statements because of the MTA’s financial accountability for these entities and they are under the direction of the MTA Board (a reference to “MTA Board” means the board of MTAHQ and/or the boards of the other MTA Group entities that apply in the specific context, all of which are comprised of the same persons). Under accounting principles generally accepted in the United States of America (“GAAP”), the MTA is required to include these related groups in its financial statements. While certain units are separate legal entities, they do have legal capital requirements and the revenues of all of the related groups of the MTA are used to support the organization as a whole. The components do not constitute a separate accounting entity (fund) since there is no legal requirement to account for the activities of the components as discrete accounting entities. Therefore, the MTA financial statements are presented on a consolidated basis with segment disclosure for each distinct operating activity.

Although the MTA Group collect fares for the transit and commuter service they provide and receive revenues from other sources such as the leasing out of real property assets and the licensing of advertising, such revenues, including forecast increased revenues from fare increases, are not sufficient to cover all operating expenses associated with such service. Therefore, to maintain a balanced budget, the members of the MTA Group providing transit and commuter service rely on operating surpluses transferred from MTA Bridges and Tunnels, operating subsidies provided by NYS and certain local governmental entities in the MTA commuter district, and service reimbursements from certain local governmental entities in the MTA commuter district and from the State of Connecticut. Operating subsidies to the MTA Group for transit and commuter service in the current year totaled \$4.8 billion.

## **2. SIGNIFICANT ACCOUNTING POLICIES**

**Basis of Accounting** — The accompanying financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

In accordance with GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Fund Accounting*, the MTA applies all applicable GASB pronouncements as well as Financial Accounting Standards Board (“FASB”) Statements and Interpretations issued on or before November 30, 1989, that do not conflict with GASB pronouncements. The MTA has elected not to apply FASB Standards issued after November 30, 1989.

**New Accounting Standards** — The MTA has completed the process of evaluating GASB Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*. This statement establishes accounting and financial reporting standards for all governments that report governmental funds. It establishes criteria for classifying fund balances into specifically defined classifications and clarifies definitions for governmental fund types. The MTA has determined that GASB Statement No. 54 had no impact on its financial position, results of operations, and cash flows and therefore it is not applicable to its operation.

The MTA has not completed the process of evaluating the impact that will result from implementing GASB Statement No. 57, *OPEB Measurements by Agent Employers and Agent Multiple-Employer Plans*. This statement amends GASB Statement No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits other Than Pensions*, and GASB Statement No. 43, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*. This Statement clarifies actuarially determined OPEB measures reported by an agent multiple-employer OPEB plan and its participating employers. Those measures should be determined by a common date and at a minimum frequency to satisfy the agent multiple-employer OPEB plan's financial reporting requirement. The MTA is therefore unable to disclose the impact GASB Statement No. 57 will have on its financial position results of operations, and cash flows when such statement is adopted. This statement is effective for financial statements for periods beginning after June 15, 2011.

The MTA has completed the process of evaluating the impact that will result from implementing GASB Statement No. 59, *Financial Instruments Omnibus*. The Statement updates and improves existing standards regarding financial reporting of certain financial instruments and external investment pools. The MTA has determined that GASB Statement No. 59 had no impact on its financial position, results of operations, and cash flows and therefore it is not applicable to its operation at the present time.

The MTA has not completed the process of evaluating the impact that will result from implementing GASB Statement No. 60, *Accounting and Financial Reporting for Service Concession Arrangements ("SCA")*. The requirement of this statement improve financial reporting by establishing recognition, measurement and disclosure requirements for SCAs for both transferors and governmental operators, requiring governments to account for and report SCAs in the same manner, which improves the comparability of financial statements. The Statement is effective for financial statements prepared by state and local governments for periods beginning after December 15, 2011.

The MTA has not completed the process of evaluating the impact that will result from implementing GASB Statement No. 61, *The Financial Reporting Entity: Omnibus – An Amendment of GASB Statements Nos. 14 and 34*. The requirements of this Statement result in financial reporting entity financial statements being more relevant by improving guidance for including, presenting and disclosing information about component units and equity interest transactions of a financial reporting entity. The Statement is effective for financial statements prepared by state and local governments for periods beginning after December 15, 2011.

The MTA has not completed the process of evaluating the impact of GASB Statement No. 62, *Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 1989 FASB and AICPA Pronouncements*. The Statement objective is to incorporate pronouncements that do not contradict or conflict with GASB pronouncements. This Statement is effective for financial statements for periods beginning after December 15, 2011.

The MTA has not completed the process of evaluating the impact of GASB Statement No. 63, *Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position*. The Statement objective is to provide a new statement of net position format to report all assets, deferred outflows of resources, liabilities, deferred inflows of resources, and net position (which is the net

residual amount of the other elements). The Statement requires that deferred outflows of resources and deferred inflows of resources be reported separately from assets and liabilities. This Statement is effective for financial statements for periods beginning after December 15, 2011.

The MTA has not completed the process of evaluating the impact of GASB Statement No. 64, *Derivative Instruments: Application of Hedge Accounting Termination Provisions*. The Statement will improve financial reporting by state and local governments by clarifying the circumstances in which hedge accounting continues to be applied when a swap counterparty, or a swap counterparty's credit support provider, is replaced. The Statement clarifies that when certain conditions are met, the use of hedge accounting should not be terminated. Those conditions are: (1) the collectability of swap payments is considered to be probable, (2) the replacement of the counterparty or credit support provider meets the criteria of an assignment or in-substance assignment as described in the Statement, and (3) the counterparty or counterparty credit support provider (and not the government) has committed the act of default or termination event. When all of these conditions exist, the GASB believes that the hedging relationship continues and hedge accounting should continue to be applied. This Statement is effective for financial statements for periods beginning after June 15, 2011.

The MTA has not completed the process of evaluating the impact of GASB Statement No. 65, *Items Previously Reported as Assets and Liabilities*. GASB Statement No. 65 reclassifies certain items currently being reported as assets and liabilities as deferred outflows of resources and deferred inflows of resources. In addition, this Statement recognizes certain items currently being reported as assets and liabilities as outflows of resources and inflows of resources. This Statement is effective for financial statements for periods beginning after December 15, 2012.

The MTA has not completed the process of evaluating the impact of GASB Statement No. 66, which amends GASB Statement No. 10, *Accounting and Financial Reporting for Risk Financing and Related Insurance Issues*, removing the provision that limits fund-based reporting of a state and local government's risk financing activities to the general fund and the internal service fund type. As a result, governments would base their decisions about governmental fund type usage for risk financing activities on the definitions in GASB Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*. This Statement also amends GASB Statement No. 62, *Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements*, by modifying the specific guidance on accounting for (1) operating lease payments that vary from a straight-line basis, (2) the difference between the initial investment (purchase price) and the principal amount of a purchased loan or group of loans, and (3) servicing fees related to mortgage loans that are sold when the stated service fee rate differs significantly from a current (normal) servicing fee rate. These changes would eliminate any uncertainty regarding the application of GASB Statement No. 13, Accounting for Operating Leases with Scheduled Rent Increases, and result in guidance that is consistent with the requirements in GASB Statement No. 48, *Sales and Pledges of Receivables and Future Revenues and Intra-Entity Transfers of Assets and Future Revenues*, respectively. The provisions of both Statements are effective for periods beginning after December 15, 2012, and would be applied on a prospective basis.

**Use of Management Estimates** — The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ significantly from those estimates.

**Principles of Consolidation** — The consolidated financial statements consist of MTAHQ, MTA Long Island Rail Road, MTA Metro-North Railroad, MTA Staten Island Railway, MTA Long Island Bus, FMTAC, MTA Bus, MTA Capital Construction, MTA New York City Transit (including its subsidiary MaBSTOA), and MTA Bridges and Tunnels. All related group transactions have been eliminated for consolidation purposes.

**Investments** — The MTA Group's investment policies comply with the New York State Comptroller's guidelines for such operating and capital policies. Those policies permit investments in, among others, obligations of the U.S. Treasury, its agencies and instrumentalities, and repurchase agreements secured by such obligations. FMTAC's investment policies comply with New York State Comptroller guidelines and New York State Department of Insurance guidelines.

Investments expected to be utilized within a year of December 31 have been classified as current assets in the financial statements.

All investments are recorded on the balance sheets at fair value and all investment income, including changes in the fair value of investments, is reported as revenue on the statement of revenues, expenses and changes in net assets. Fair values have been determined using quoted market values at December 31, 2011 and 2010.

**Materials and Supplies** — Materials and supplies are valued principally at the lower of average cost or market value, net of obsolescence reserve.

**Prepaid Expenses and Other Current Assets** — Prepaid expenses and other current assets reflect advance payment of insurance premiums as well as farecard media related with ticket machines, WebTickets and AirTrain tickets.

**Capital Assets** — Properties and equipment are carried at cost and are depreciated on a straight-line basis over estimated useful lives. Expenditures for maintenance and repairs are charged to operations as incurred. Capital assets and improvements include all land, buildings, equipment, and infrastructure of the MTA having a minimum useful life of two years and having a cost of more than \$25 thousand. Capital assets are stated at historical cost, or at estimated historical cost based on appraisals, or on other acceptable methods when historical cost is not available. Capital leases are classified as capital assets in amounts equal to the lesser of the fair market value or the present value of net minimum lease payments at the inception of the lease. Accumulated depreciation and amortization are reported as reductions of fixed assets. Depreciation is computed using the straight-line method based upon estimated useful lives of 25 to 50 years for buildings, 2 to 40 years for equipment, and 25 to 100 years for infrastructure. Capital lease assets and leasehold improvements are amortized over the term of the lease or the life of the asset whichever is less.

**Pollution remediation projects** — Effective January 1, 2008, pollution remediation costs are being expensed in accordance with the provisions of GASB Statement No. 49, *Accounting and Financial Reporting for Pollution Remediation Obligations* (See Note 12). An operating expense provision and corresponding liability measured at current value using the expected cash flow method has been recognized for certain pollution remediation obligations, which previously may not have been required to be recognized, have been recognized earlier than in the past or are no longer able to be capitalized as a component of a capital project. Pollution remediation obligations occur when any one of the following obligating events takes place: the Authority is in violation of a pollution prevention-related permit or license; an imminent threat to public health due to pollution exists; the Authority is named by a regulator as a responsible or potentially responsible party to participate in remediation; the Authority voluntarily commences or legally obligates itself to commence remediation efforts; or the Authority is named or

there is evidence to indicate that it will be named in a lawsuit that compels participation in remediation activities.

**Operating Revenues — Passenger Revenue and Tolls** — Revenues from the sale of tickets, tokens, electronic toll collection system, and farecards are recognized as income when used. Deferred revenue is recorded for the estimated amount of unused tickets, and farecards.

### **Non-operating Revenues**

*Operating Assistance* — The MTA Group receives, subject to annual appropriation, NYS operating assistance funds that are generally recognized as revenue when all applicable eligibility requirements are met. Generally, funds received under the NYS operating assistance program are fully matched by contributions from NYC and the seven other counties within the MTA's service area.

*Mortgage Recording Taxes ("MRT")* — Under NYS law, the MTA receives capital and operating assistance through a Mortgage Recording Tax ("MRT-1"), which is collected by NYC and the seven other counties within the MTA's service area, at the rate of .25 of one percent of the debt secured by certain real estate mortgages. Effective September 2005, the rate was increased from 25 cents per 100 dollars of recorded mortgage to 30 cents per 100 dollars of recorded mortgage. The MTA also receives an additional Mortgage Recording Tax ("MRT-2") of .25 of one percent of certain mortgages secured by real estate improved or to be improved by structures containing one to nine dwelling units in the MTA's service area. MRT-1 and MRT-2 taxes are recognized as revenue based upon reported amounts of taxes collected.

- MRT-1 proceeds are initially used to pay MTAHQ's operating expenses. Remaining funds, if any, are allocated 55% to certain transit operations and 45% to the commuter railroads operations. The commuter railroad portion is first used to fund the NYS Suburban Highway Transportation Fund in an amount not to exceed \$20 annually (subject to the moneys being returned under the conditions set forth in the governing statute if the Commuter Railroads are operating at a deficit). As of December 31, 2011 and 2010, the amount allocated to NYS Suburban Highway Transportation Fund was \$0 and \$0, respectively. Of the MTA New York City Transit portion, the MTA distributed \$0 and \$0 as of December 31, 2011 and 2010, respectively.
- The first \$5 of the MRT-2 proceeds is transferred to the MTA Dutchess, Orange, and Rockland ("DOR") Fund (\$1.5 each for Dutchess and Orange Counties and \$2 for Rockland County). Additionally, the MTA must transfer to each County's fund an amount equal to the product of (i) the percentage by which each respective County's mortgage recording tax payments (both MRT-1 and MRT-2) to the MTA increased over such payments in 1989 and (ii) the base amount received by each county as described above. The counties do not receive any portion of the September 1, 2005 increase in MRT-1 from 25 cents per \$100 of recorded mortgage to 30 cents. As of December 31, 2011, the MTA paid to Dutchess, Orange and Rockland Counties the 2010 excess amounts of MRT-1 and MRT-2 totaling \$2.1.
- In addition, MTA New York City Transit receives operating assistance directly from NYC through a mortgage recording tax at the rate of 0.625 of one percent of the debt secured by certain real estate mortgages and through a property transfer tax at the rate of one percent of the assessed value (collectively referred to as "Urban Tax Subsidies") of certain properties.

*Mobility tax* — In June of 2009, chapter 25 of the NYS Laws of 2009 added article 23, which establishes the Metropolitan Commuter Transportation Mobility Tax ("MCTMT"). The proceeds of this tax, administered by the New York State Tax Department, are to be distributed to the Metropolitan

Transportation Authority. This tax is imposed on certain employers and self-employed individuals engaging in business within the metropolitan commuter transportation district which includes New York City, and the counties of Rockland, Nassau, Suffolk, Orange, Putnam, Dutchess, and Westchester. This Tax imposed on certain employers that have payroll expenses within the Metropolitan Commuter Transportation District, to pay at a rate of 0.34% of an employer's payroll expenses for all covered employees for each calendar quarter. The employer is prohibited to deduct from wages or compensation of an employee any amount that represents all or any portion of the MCTMT. The effective date of this tax was March 1, 2009 for employers other than public school district; September 1, 2009 for Public school districts and January 1, 2009 for individuals.

*Supplemental Aid* — Also in 2009 several amendments to the existing tax law provided the MTA supplemental revenues to be deposited into the AID Trust Account of the Metropolitan Transportation Authority Financial Assistance Fund established pursuant to section 92 of the State Finance law. These supplemental revenues relates to: 1) supplemental learner permit/license fee in the Metropolitan Commuter Transportation District 2) supplemental registration fee 3) supplemental tax on every taxicab owner per taxicab ride on every ride that originated in the city and terminates anywhere within the territorial boundaries of the Metropolitan Commuter Transportation District 4) supplemental tax on passenger car rental. This Supplemental Aid Tax is provided to the MTA in conjunction with the Mobility Tax.

*Dedicated Taxes* — Under NYS law, subject to annual appropriation, the MTA receives operating assistance through a portion of the Dedicated Mass Transportation Trust Fund ("MTTF") and Metropolitan Mass Transportation Operating Assistance Fund ("MMTOA"). The MTTF receipts consist of a portion of the revenues derived from certain business privilege taxes imposed by the State on petroleum businesses, a portion of the motor fuel tax on gasoline and diesel fuel, and a portion of certain motor vehicle fees, including registration and nonregistration fees. Effective October 1, 2005, the State increased the amount of motor vehicle fees deposited into the MTTF for the benefit of the MTA. MTTF receipts are applied first to meet certain debt service requirements or obligations and second to pay operating and capital costs. The MMTOA receipts are comprised of 0.375 of one percent regional sales tax (which was increased effective June 1, 2005 from 0.25 of one percent), a temporary regional franchise tax surcharge, a portion of taxes on certain transportation and transmission companies, and an additional portion of the business privilege tax imposed on petroleum businesses. MMTOA receipts, to the extent that MTTF receipts are not sufficient to meet debt service requirements, will also be applied to certain debt service obligations, and secondly to operating and capital costs of the Transit System, and the Commuter Railroads.

The State Legislature enacts in an annual budget bill for each state fiscal year an appropriation to the MTA Dedicated Tax Fund for the then-current state fiscal year and an appropriation of the amounts projected by the Director of the Budget of the State to be deposited in the MTA Dedicated Tax Fund for the next succeeding state fiscal year. The assistance deposited into the MTTF is required by law to be allocated, after provision for debt service on Dedicated Tax Fund Bonds (See Note 7), 85% to certain transit operations (not including MTA Bus) and 15% to the commuter railroads operations. Revenues from this funding source are recognized based upon amounts of tax reported collected by NYS, to the extent of the appropriation.

*Build America Bond Subsidy* — The Authority is receiving cash subsidy payments from the United States Treasury equal to 35% of the interest payable on the Series of Bonds issued as "Build America Bonds" and authorized by the Recovery Act. The Internal Revenue Code of 1986 imposes requirements that MTA must meet and continue to meet after the issuance in order to receive the cash subsidy payments. The interest on these bonds is fully subject to Federal income taxation. The "Build America Bonds" program ended on December 31, 2010.

*Operating Subsidies Recoverable from Connecticut Department of Transportation (“CDOT”)* — A portion of the deficit from operations relating to MTA Metro-North Railroad’s New Haven line is recoverable from CDOT. Under the terms of a renewed Service Agreement, which began on January 1, 2000, and the 1998 resolution of an arbitration proceeding initiated by the State of Connecticut, CDOT pays 100.0% of the net operating deficit of MTA Metro-North Railroad’s branch lines in Connecticut (New Canaan, Danbury, and Waterbury), 65.0% of the New Haven mainline operating deficit, and a fixed fee for the New Haven line’s share of the net operating deficit of Grand Central Terminal (“GCT”) calculated using several years as a base, with annual increases for inflation and a one-time increase for the cost of operating GCT’s North End Access beginning in 1999. The Service Agreement also provides that CDOT pay 100% of the cost of non-movable capital assets located in Connecticut, 100% of movable capital assets to be used primarily on the branch lines and 65.0% of the cost of other movable capital assets allocated to the New Haven line. Remaining funding for New Haven line capital assets is provided by the MTA. The Service Agreement provides for automatic five-year renewals unless a notice of termination has been provided. The Service Agreement has been automatically extended for an additional five years beginning January 1, 2010 subject to the right of CDOT or MTA to terminate the agreement on eighteen month’s written notice. Capital assets completely funded by CDOT are not reflected in these financial statements, as ownership is retained by CDOT. The Service Agreement provides that final billings for each year be subject to audit by CDOT. Years 2000-2009 have been audited and are final.

*Reimbursement of Expenses* — The cost of operating and maintaining the passenger stations of the Commuter Railroads in NYS is assessable by the MTA to NYC and the other counties in which such stations are located for each NYS fiscal year ending September 30, under provisions of the NYS Public Authorities Law. This funding is recognized as revenue based upon an amount, fixed by statute, for the costs to operate and maintain passenger stations and is revised annually by the increase or decrease of the regional Consumer Price Index.

In 1995, The City ceased reimbursing the Authority for the full costs of the free/reduced fare program for students (the Student Fare Program). Beginning in 1996, the State and The City each began paying \$45 per annum to the Authority toward the cost of the Student Fare Program. In 2009, the State reduced their \$45 reimbursement to \$6.3.

The 2010 Adopted Budget proposed that the Student Fare Program be eliminated and student fares be phased in, with the first phase to commence September 1, 2010. In June 2010, following fare reimbursement commitments of \$25.3 from New York State and \$45.0 from The City, the Authority declined to proceed with the proposal to eliminate the Student Fare Program. These fare reimbursement commitments were paid to the Authority during 2010 and 2011.

Policing of the transit system is carried out by the NYC Police Department at NYC’s expense. The MTA, however, continues to be responsible for certain capital costs and support services related to such police activities, a portion of which is reimbursed by NYC. The Authority received approximately \$3.2 in 2011 and \$4.9 in 2010 from the City for the reimbursement of transit police costs.

Federal law and regulations require a paratransit system for passengers who are not able to ride the buses and trains because of their disabilities. Pursuant to an agreement between NYC and the MTA, MTA New York City Transit had assumed operating responsibility for all paratransit service required in NYC by the Americans with Disabilities Act of 1990. The services are provided by private vendors under contract with MTA New York City Transit. NYC reimburses the MTA for the lesser of 33.0% of net paratransit operating expenses defined as labor, transportation, and administrative costs less fare revenues and 6.0% of gross Urban Tax Subsidies, or an amount that is 20.0% greater than the amount paid by the NYC for the preceding calendar year. Fare revenues and the City reimbursement aggregated approximately \$126.3 and \$102.6 in the years ended December 31, 2011 and 2010, respectively.

**Grants and Appropriations** — Grants and appropriations for capital projects are recorded when requests are submitted to the funding agencies for reimbursement of capital expenditures and beginning in 2001 were recorded as nonoperating revenues in accordance with GASB Statement No. 33, *Accounting and Financial Reporting for Nonexchange Transactions*. These amounts are reported separately after Total Nonoperating Revenues in the Statements of Revenues, Expenses, and Changes in Net Assets.

**Operating and Non-operating Expenses** — Operating and non-operating expenses are recognized in the accounting period in which the liability is incurred. All expenses related to operating the Authority (e.g. salaries, insurance, depreciation, etc.) are reported as operating expenses. All other expenses (e.g. interest on long-term debt, subsidies paid to counties, etc.) are reported as non-operating expenses.

**Liability Insurance** — FMTAC, an insurance captive subsidiary of MTA, operates a liability insurance program (“ELF”) that insures certain claims in excess of the self-insured retention limits of the agencies on both a retrospective (claims arising from incidents that occurred before October 31, 2003) and prospective (claims arising from incidents that occurred on or after October 31, 2003) basis. For claims arising from incidents that occurred on or after November 1, 2006, but before November 1, 2009, the self-insured retention limits are: \$8 for MTA New York City Transit, MaBSTOA, MTA Bus, MTA Long Island Rail Road, and MTA Metro-North Railroad; \$2.3 for MTA Long Island Bus and MTA Staten Island Railway; and \$1.6 for MTAHQ and MTA Bridges and Tunnels. Effective November 1, 2009, the self-insured retention limits for ELF were increased to the following amounts: \$9 for MTA New York City Transit, MaBSTOA, MTA Bus, MTA Long Island Rail Road and MTA Metro-North Railroad; \$2.6 for MTA Long Island Bus and MTA Staten Island Railway; and \$1.9 for MTAHQ and MTA Bridges and Tunnels. The maximum amount of claims arising out of any one occurrence is the total assets of the program available for claims, but in no event greater than \$50. The retrospective portion contains the same insurance agreements, participant retentions, and limits as existed under the ELF program for occurrences happening on or before October 30, 2003. On a prospective basis, FMTAC issues insurance policies indemnifying the other MTA Group entities above their specifically assigned self-insured retention with a limit of \$50 per occurrence with a \$50 annual aggregate. FMTAC charges appropriate annual premiums based on loss experience and exposure analysis to maintain the fiscal viability of the program. As of December 31, 2011, the balance of the assets in this program was \$64.6.

MTA also maintains an All-Agency Excess Liability Insurance Policy that affords the MTA Group additional coverage limits of \$350 for a total limit of \$400 (\$350 excess of \$50). In certain circumstances, when the assets in the program described in the preceding paragraph are exhausted due to payment of claims, the All-Agency Excess Liability Insurance will assume the coverage position of \$50.

On March 1, 2011, the “nonrevenue fleet” automobile liability policy program was renewed. This program provides third-party auto liability insurance protection for the MTA Group with the exception of MTA New York City Transit and MTA Bridges and Tunnels. The policy provides \$9 per occurrence limit with a \$0.5 per occurrence deductible for MTA Long Island Rail Road, MTA Staten Island Rapid Transit Operating Authority, MTA Police and MTA Metro-North Railroad; \$2.6 per occurrence limit with a \$0.5 per occurrence deductible for MTA Long Island Bus, Office of the MTA Inspector General and MTA Headquarters. FMTAC renewed its deductible buy back policy, where it assumes the liability of the agencies for their deductible.

On March 1, 2011, the “Access-A-Ride” automobile liability policy program was renewed. This program provides third-party auto liability insurance protection for the MTA New York City Transit’s Access-A-Ride program, including the contracted operators. This policy provides a \$3 per occurrence limit with a \$1 per occurrence deductible.

On December 15, 2011, FMTAC renewed the primary coverage on the Station Liability and Force Account liability policies \$9 per occurrence loss for MTA Metro-North Railroad and MTA Long Island Rail Road.

**Property Insurance** — Effective May 1, 2011, FMTAC renewed the all-agency property insurance program. For the period May 1, 2011 to May 1, 2012 at 12:00 AM, FMTAC directly insures property damage claims of the other MTA Group entities in excess of a \$25 per occurrence self-insured retention (“SIR”), subject to an annual \$75 aggregate. Losses occurring after the retention aggregate is exceeded are subject to a deductible of \$7.5 per occurrence. The total program limit has been maintained at \$1.075 billion per occurrence covering property of the related entities collectively. With the exception of acts of terrorism (both domestic and foreign), FMTAC is reinsured in the domestic, Asian, London, European and Bermuda marketplaces for this coverage.

The property insurance policy provides replacement cost coverage for all risks of direct physical loss or damage to all real and personal property, with minor exceptions. The policy also provides extra expense and business interruption coverage.

With respect to acts of terrorism, FMTAC is reinsured by the United States Government for 85% of “certified” losses, as covered by the Terrorism Risk Insurance Act (“TRIA”) of 2007 (originally introduced in 2002). Under the 2007 extension, terrorism acts sponsored by both foreign and domestic organizations are covered. Until 2007, the Act only provided coverage for acts sponsored by foreign organizations. The remaining 15% of MTA Group losses would be covered under an additional policy described below. Additionally, no federal compensation will be paid unless the aggregate industry insured losses exceed \$100 (“trigger”).

To supplement the reinsurance to FMTAC through the 2007 Terrorism Risk Insurance Program Reauthorization Act (“TRIPRA”) program, the MTA obtained an additional commercial reinsurance policy with various reinsurance carriers in the domestic, London and European marketplaces. That policy provides coverage for (1) 15% of any “certified” act of terrorism — up to a maximum recovery of \$161.25 for any one occurrence and in the annual aggregate, (2) the TRIPRA FMTAC captive deductible (per occurrence and on an aggregated basis) that applies when recovering under the 15%“certified” acts of terrorism insurance or (3) 100% of any “certified” terrorism loss which exceeds \$5 and less than the \$100 TRIPRA trigger — up to a maximum recovery of \$100 for any occurrence and in the annual aggregate. This coverage expires at midnight on May 1, 2012. Recovery under this policy is subject to a retention of \$25 per occurrence and \$75 in the annual aggregate — in the event of multiple losses during the policy year. Should the MTA Group’s retention in any one year exceed \$75 future losses in that policy year are subject to a retention of just \$7.5.

**Pension Plans** — In November 1994, GASB issued Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers*, which establishes standards for measurement, recognition, and display of pension expense and the related accounting for assets, liabilities, disclosures, and required supplementary information, if applicable. The Authority has adopted this standard for its pension plans. Pension cost is required to be measured and disclosed using the accrual basis of accounting. Annual pension cost should be equal to the annual required contributions (“ARC”) to the pension plan, calculated in accordance with certain parameters.

**Postemployment Benefits Other Than Pensions** — In June 2004, the GASB issued Statement No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*. This Statement establishes standards for the measurement, recognition, and display of OPEB expense/expenditures and related liabilities (assets), note disclosures, and if applicable, required supplementary information (“RSI”) in the financial reports of state and local governmental employers. In June 2005, GASB issued Statement No. 47, *Accounting for Termination Benefits*. This statement

establishes accounting standards for termination benefits. For termination benefits provided through an existing defined benefit OPEB plan, the provisions of this Statement should be implemented simultaneously with the requirements of Statement 45. The Authority has adopted these standards for its Postemployment Benefits Other Than Pensions.

### 3. CASH AND INVESTMENTS

The Bank balances are insured up to \$250 thousand in the aggregate by the Federal Deposit Insurance Corporation (“FDIC”) for each bank in which funds are deposited. Cash, including deposits in transit, consists of the following at December 31, 2011 and 2010 (in millions):

	December 2011		December 2010	
	Carrying Amount	Bank Balance	Carrying Amount	Bank Balance
FDIC insured or collateralized deposits	\$ 107	\$ 99	\$ 132	\$ 145
Uninsured and not collateralized	<u>96</u>	<u>47</u>	<u>68</u>	<u>48</u>
	<u><u>\$ 203</u></u>	<u><u>\$ 146</u></u>	<u><u>\$ 200</u></u>	<u><u>\$ 193</u></u>

All collateralized deposits are held by the MTA or its agent in the MTA's name.

The MTA, on behalf of the Transit operations, MTA Bridges and Tunnels, MTA Long Island Bus, and MTA Bus operations, invests funds which are not immediately required for the MTA's operations in securities permitted by the New York State Public Authorities Law, including repurchase agreements collateralized by U.S. Treasury securities, U.S. Treasury notes, and U.S. Treasury zero coupon bonds.

The MTA's uninsured and uncollateralized deposits are primarily held by commercial banks in the metropolitan New York area and are subject to the credit risks of those institutions.

MTA holds most of its investments at a custodian bank. The custodian must meet certain banking institution criteria enumerated in MTA's Investment Guidelines. The Investment Guidelines also require the Treasury Division to hold at least \$100 of its portfolio with a separate emergency custodian bank. The purpose of this deposit is in the event that the MTA's main custodian cannot execute transactions due to an emergency outside of the custodian's control, the MTA has an immediate alternate source of liquidity.

Investments, at fair value, consist of the following at December 31, 2011 and December 31, 2010 (in millions):

	December 2011	December 2010
Repurchase agreements	\$ 308	\$ 730
Commercial paper	47	250
Federal Agencies due 2012	847	843
U.S. Treasuries due 2012–2021	2,058	1,424
Investments restricted for capital lease obligations:		
US Treasury Notes due 2012-2033	190	165
Short-Term Investment Fund	76	77
Federal Agencies due 2013-2034	166	117
Other Agencies due 2030	<u>778</u>	<u>764</u>
Sub-total	<u>1,210</u>	<u>1,123</u>
Other Agencies due 2012-2030	107	135
Asset & Mortgage Back Securities*	26	14
Commercial Mortgage Backed Securities*	46	39
Corporate Bonds*	116	130
Foreign Bonds*	32	31
Equities*	<u>12</u>	<u>16</u>
Total	<u>\$ 1,210</u>	<u>\$ 4,809</u>
	<u><u>\$ 1,123</u></u>	<u><u>\$ 4,735</u></u>

\*These securities are only included in the FMTAC portfolio

Fair values include accrued interest to the extent that interest is included in the carrying amounts. Accrued interest on investments other than Treasury bills and coupons is included in other receivables on the balance sheet. The MTA's investment policy states that securities underlying repurchase agreements must have a market value at least equal to the cost of the investment.

In connection with certain lease transactions described in Note 8, the MTA has purchased securities or entered into payment undertaking, letter of credit, or similar type agreements or instruments (guaranteed investment contracts) with financial institutions, which generate sufficient proceeds to make basic rent and purchase option payments under the terms of the leases. If the obligors do not perform, the MTA may have an obligation to make the related rent payments.

All investments, other than the investments restricted for capital lease obligations, are either insured or registered and held by the MTA or its agent in the MTA's name. Investments restricted for capital lease obligations are either held by MTA or its agent in the MTA's name or held by a custodian as collateral for MTA's obligation to make rent payments under capital lease obligation. Investments had weighted average yields of 0.50% and 0.40% for the years ended December 31, 2011 and 2010, respectively.

Of the above cash and investments, amounts designated for internal purposes by management were as follows at December 31, 2011 and, 2010 (in millions):

	December 2011	December 2010
Construction or acquisition of capital assets	\$ 1,275	\$1,847
Funds received from affiliated agencies for investment	662	331
Debt service	441	441
Payment of claims	471	457
Restricted for capital leases	1,213	1,125
Other	<u>635</u>	<u>568</u>
 Total	 <u>\$ 4,697</u>	 <u>\$4,769</u>

**Credit Risk** — At December 31, 2011 and 2010, the following credit quality rating has been assigned to MTA investments by a nationally recognized rating organization (in millions):

Quality Rating Moody's	December 31, 2011	Percent of Portfolio	December 31, 2010	Percent of Portfolio
A-1+	\$ 575	14.00 %	\$ 849	21.16 %
AAA	69	2.00	582	14.51
AA+	576	14.00	-	-
AA	38	1.00	44	1.10
A	86	2.00	87	2.17
BB	1	-	2	0.05
BBB	39	1.00	39	0.97
Not rated	420	10.00	744	18.54
Government	<u>2,274</u>	<u>56.00</u>	<u>1,665</u>	<u>41.50</u>
 Total	 4,078	 <u>100.00</u> %	 4,012	 <u>100.00</u> %
 Capital leases	 <u>731</u>	 <u>723</u>		
 Total investment	 <u>\$ 4,809</u>		 <u>\$ 4,735</u>	

**Interest Rate Risk** — Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of the investment. Duration is a measure of interest rate risk. The greater the duration of a bond or portfolio of bonds, the greater its price volatility will be in response to a change in interest rate risk and vice versa. Duration is an indicator of bond price's sensitivity to a 100 basis point change in interest rates.

(In millions) Securities	December 2011		December 2010	
	Fair Value	Duration	Fair Value	Duration

MTA is a public benefit corporation established under the New York Public Authorities Law. MTA's Treasury Division is responsible for the investment management of the funds of the Related Entities. The investment activity covers all operating and capital funds, including bond proceeds, and the activity is governed by State statutes, bond resolutions and the Board-adopted investment guidelines (the "Investment Guidelines"). The MTA Act currently permits the Related Entities to invest in the following general types of obligations:

- obligations of the State or the United States Government;
- obligations the principal and interest of which are guaranteed by the State or the United States government;
- obligations issued or guaranteed by certain Federal agencies;

- repurchase agreements fully collateralized by the obligations of the foregoing United States Government and Federal agencies;
- certain certificates of deposit of banks or trust companies in the State;
- certain banker's acceptances with a maturity of 90 days or less;
- certain commercial paper;
- certain municipal obligations; and
- certain mutual funds up to \$10 in the aggregate.

The MTA adopted NYS Statutory Requirements with respect to credit risk of its investments, which include, but not limited to the following sections:

- i) Public authorities Law Sections 1265(4) (MTA), 1204(19) (Transit Authority) and 553(21) (TBTA);
- ii) Public Authorities Law Section 2925 Investment of funds by public authorities and public benefit corporations; general provisions
- iii) State Finance Law Article 15 – EXCELSIOR LINKED DEPOSIT ACT

MTA Investment Guidelines limit the dollar amount invested in banker acceptances, commercial paper, and obligations issued or guaranteed by certain Federal agencies to \$250 at cost. There are no dollar limits on the purchase of obligations of the United States government, the State or obligations the principal and interest of which are guaranteed by the State or the United States government. Investments in collateralized repurchase agreements are limited by dealer or bank's capital. MTA can invest no greater than \$300 with a bank or dealer rated in Tier 1 (i.e. \$1 billion or more of capital).

FMTAC is created as a MTA subsidiary and is licensed as a captive direct insurer and reinsurer by the New York State Department of Insurance. As such, FMTAC is responsible for the investment management of its funds. The investment activity is governed by State statutes and the FMTAC Board adopted investment guidelines. The minimum surplus to policyholders and reserve instruments are invested in the following investments:

- obligations of the United States or any agency thereof provided such agency obligations are guaranteed as to principal and interest by the United States;
- direct obligations of the State or of any county, district or municipality thereof;
- any state, territory, possession or any other governmental unit of the United States;
- certain bonds of agencies or instrumentalities of any state, territory, possession or any other governmental unit of the United States;
- the obligations of a solvent American institution which are rated investment grade or higher (or the equivalent thereto) by a securities rating agency; and
- certain mortgage backed securities in amounts no greater than five percent of FMTAC's admitted assets.

FMTAC may also invest non-reserve instruments in a broader range of investments including the following general types of obligations:

- certain equities; and
- certain mutual funds.

FMTAC is prohibited from making the following investments:

- Investment in an insolvent entity;
- Any investment as a general partner; and
- Any investment found to be against public policy.

FMTAC investment guidelines do include other investments, but FMTAC has limited itself to the above permissible investments at this time.

#### **4. EMPLOYEE BENEFITS**

Substantially all of the MTA Group entities, related groups and pension plans have separately issued financial statements that are publicly available and contain descriptions and supplemental information regarding employee benefit plans. These statements may be obtained by contacting the administrative office of the respective related group.

**Pension Plans** — The MTA Group entities sponsor and participate in a number of pension plans for their employees. These plans are not component units of the MTA and are not included in the combined financial statements.

##### **Defined Benefit Pension Plans**

###### *Single-Employer Pension Plans*

###### *MTA Long Island Rail Road Plan for Additional Pensions*

*Plan Description* — The Long Island Rail Road Plan for Additional Pensions (“the LIRR Plan”) is a single-employer defined benefit pension plan that provides retirement, disability and death benefits to plan members and beneficiaries. Members include employees hired prior to January 1, 1988. The LIRR Plan is administered by the MTA Defined Benefit Pension Plan Board of Managers of Pensions. The LIRR Board has the authority to establish or amend obligations to the LIRR Plan. The LIRR Plan is a governmental plan and accordingly, is not subject to the funding and other requirements of the Employee Retirement Income Security Act of 1974 (“ERISA”). The pension plan has a separately issued financial statement that is publicly available and contains required descriptions and supplemental information regarding the employee benefit plan. The statements may be obtained by writing to, Long Island Rail Road, Comptroller, 92-02 Sutphin Boulevard, Jamaica, New York 11435.

*Funding Policy* — The LIRR Plan has both non-contributory and contributory requirements. Participants who entered qualifying service before July 1, 1978 are not required to contribute. Participants who entered qualifying service on or after July 1, 1978 contribute 3% of their wages. The MTA Long Island Rail Road contributes additional amounts based on actuarially determined amounts that are designed to accumulate sufficient assets to pay benefits when due. The current rate is 123.98% of annual covered payroll.

The funded status of the LIRR Plan as of January 1, 2011 the most recent actuarial valuation date is as follows (in millions):

	<b>2011</b>	<b>2010</b>
Annual required contribution (“ARC”)	\$ 108.9	\$ 107.3
Interest on net pension obligation	3.1	3.1
Adjustment to ARC	<u>(3.7)</u>	<u>(3.8)</u>
Annual pension cost	108.3	106.6
Actual contributions made	<u>(108.3)</u>	<u>(119.6)</u>
(Decrease)/increase in net pension obligation	0.0	(13.0)
Net pension obligation beginning of year	<u>38.5</u>	<u>51.5</u>
Net pension obligation end of year	<u>\$ 38.5</u>	<u>\$ 38.5</u>

### Three-Year Trend Information

Actuarial Valuation Date	Actuarial Value of Assets	Unfunded Actuarial Accrued Liability “UAAL”		Funded Ratio	Covered Payroll	UAAL as % of Covered Payroll
		Actuarial Accrued Liability “AAL”	“UAAL”			
1/1/2011	\$476.0	\$ 1,572.3	\$ 1,096.3	30.30 %	\$ 51.2	2142.94 %
1/1/2010	503.4	1,583.6	1,080.2	31.79	65.2	1,656.80
1/1/2009	483.9	1,590.5	1,106.5	30.43	72.7	1,521.67
Year Ended	Annual Pension Cost “APC”	Annual Required Contribution “ARC”	Annual Contribution	ARC as a % of Covered Payroll	% of APC Contributed	Net Pension Obligation
12/31/2011	\$108.3	\$ 108.9	\$ 108.3	213.02 %	100.00 %	\$ 38.50
12/31/2010	106.6	107.3	119.6	164.50	112.17	38.50
12/31/2009	108.1	108.7	96.7	149.45	89.44	51.50

The schedule of funding progress, presented as RSI following the notes to the financial statements, presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

*Funded Status and Funding Progress* — As of January 1, 2011, the most recent actuarial valuation date, the LIRR Plan was 30.3% funded. The actuarial accrued liability for benefits was \$1,572.3, and the actuarial value of assets was \$476.0, resulting in an unfunded actuarial accrued liability (“UAAL”) of \$1,096.3. The covered payroll (annual payroll of active employees covered by the LIRR plan) was \$51.2, and the ratio of the UAAL to the covered payroll was 2,142.9%.

*Actuarial Methods and Assumptions* — Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of events far into the future and actuarially determined amounts are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future. The significant actuarial methods and assumptions used in the

LIRR Plan actuarial valuation at January 1, 2011 and 2010 were not changed from those used for the LIRR Plan at January 1, 2009 with the exception of the mortality assumption which was revised to reflect the RP-2000 Disabled Annuitant mortality table for males and females and used beginning with the January 1, 2007 Valuation. The significant actuarial methods and assumptions used in the LIRR Plan at January 1, 2011 were as follows: the actuarial cost method and amortization method used was the entry age normal cost for all periods. For January 1, 2010 the amortization period for unfunded accrued liability was 26 years, with payments a level dollar amount. The asset valuation method utilized was a 5-year smoothing method for all periods. The investment rate of return assumption was 8.0% for all periods. Investments and administrative expenses are paid from plan assets of the LIRR Plan. The remaining amortization period at December 31, 2011 was 22 years.

#### *Metro North Cash Balance Plan*

*Plan Description* — The Metro-North Commuter Railroad Company Cash Balance Plan (the “MNR Cash Balance Plan” is a single employer, defined benefit pension plan. The MNR Plan covers non-collectively bargained employees, formerly employed by Conrail, who joined MTA Metro-North Railroad as management employees between January 1 and September 30, 1983, and were still employed as of December 31, 1988. Effective January 1, 1989, these employees were covered under the Metro-North Commuter Railroad Defined Contribution Plan for Management Employees (the “Management Plan”) and the MNR Cash Balance Plan was closed to new participants. The assets of the Management Plan have been merged with the Metropolitan Transportation Authority Defined Benefit Plan for Non-Represented Employees as of the asset transfer date of July 14, 1995. The MNR Cash Balance Plan is designed to satisfy the applicable requirements for governmental plans under Section 401(a) and 501(a) of the Internal Revenue Code. Accordingly, the MNR Cash Balance Plan is tax-exempt and is not subject to the provisions of the Employee Retirement Income Security Act (“ERISA”) of 1974. This plan provides retirement and death benefits to plan members and beneficiaries.

*Funding Policy* — Funding for the MNR Cash Balance Plan is provided by MTA Metro-North Railroad which is a public benefit corporation that receives funding for its operations and capital needs from the MTA and the Connecticut Department of Transportation (“CDOT”). Certain funding by MTA is made to MTA Metro-North Railroad on a discretionary basis. The continuance of funding for the MNR Cash Balance Plan has been, and will continue to be, dependent upon the receipt of adequate funds.

MTA Metro-North Railroad’s funding policy with respect to the MNR Cash Balance Plan was to contribute the full amount of the pension benefit obligation (“PBO”) of approximately \$2.9 to the trust fund in 1989. As participants retire, distributions from the MNR Cash Balance Plan have been made by the Trustee. MTA Metro-North Railroad anticipated that no further payments would be made to the MNR Cash Balance Plan. However, over several subsequent years, actuarial valuations resulted in unfunded accrued liabilities, which were paid to the Plan. The January 1, 2009, actuarial valuation resulted in an unfunded accrued liability of \$.002 and the \$.0003 annual required contribution was paid to the Plan in 2009. The January 1, 2010, actuarial valuation resulted in an unfunded accrued liability of \$.012 and the \$.012 was paid to the Plan in 2010. Since the actuarial value of assets exceeded the actuarial liability as of January 1, 2011, no payments were required in 2011. The market value of net assets available for benefits in the trust fund at December 31, 2011, was \$1.006, which is in excess of the current PBO of \$0.975 and therefore MTA Metro-North Railroad has accrued an unfunded liability.

The funded status of the MNR Cash Balance Plan as of January 1, 2011, the most recent actuarial valuation date is as follows (in thousands):

	<b>2011</b>	<b>2010</b>
Annual required contribution	\$ 0.0	\$ 1.8
Interest on net pension obligation	(3.4)	(3.2)
Adjust to annual required contribution	<u>11.8</u>	<u>10.1</u>
Annual pension cost	8.4	8.7
Actual contributions	<u>0.0</u>	<u>(11.9)</u>
Increase /(Decrease)in net pension asset	8.4	(3.2)
Net pension asset beginning of year	<u>(68.7)</u>	<u>(65.5)</u>
Net pension asset end of year	<u>\$ (60.3)</u>	<u>\$ (68.7)</u>

### Three-Year Trend Information

(In thousands)		Actuarial		Unfunded Actuarial Accrued		UAAL as % of Covered	
Actuarial Valuation	Actuarial Value of Assets	Actuarial Accrued Liability	Liability/ (Surplus)	Funded	Covered	Covered	
Date		"AAL"	"UAAL"	Ratio	Payroll	Payroll	
1/1/2011	\$ 1,008.5	\$ 970.9	\$ (37.5)	103.90 %	\$ 0.0	0.00 %	
1/1/2010	1,074.9	1,086.7	11.9	98.91	4,496.1	0.26	
1/1/2009	1,238.8	1,241.2	2.3	99.81	5,936.3	0.04	
Year Ended		Annual Pension Cost "APC"	Annual Required Contribution "ARC"	Annual Contribution	ARC as a % of Covered Payroll	% of APC Contributed	Net Pension Asset
12/31/2011	\$ 8.4	\$ 0.0	\$ 0.0	0.00 %	0.00 %	\$ (60.3)	
12/31/2010	8.7	1.8	11.9	0.04	136.78	(68.7)	
12/31/2009	6.8	0.3	0.3	0.01	4.41	(65.5)	

The schedule of funding progress, presented as RSI following the notes to the financial statements, presents multiyear trend information about whether the actuarial value of plan assets are increasing or decreasing over time relative to the actuarial accrued liability for benefits.

*Funded Status and Funding Progress* — As of January 1, 2011, the most recent actuarial valuation date, the MNR Cash Balance Plan was 103.9% funded. The actuarial accrued liability for benefits was \$0.971, and the actuarial value of assets was \$1.009, resulting in an actuarial accrued surplus of \$(0.038). The covered payroll (annual payroll of active employees covered by the plan) was \$0, and the ratio of the UAAL to the covered payroll was 0.00%.

Further information about the MNR Plan is more fully described in the separately issued financial statements which can be obtained by writing to the MTA Metro-North Railroad Chief Financial Officer, 347 Madison Avenue, New York, New York 10017-3739.

*Actuarial Methods and Assumptions* — Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of events far into the future and actuarially determined amounts are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future.

The significant actuarial methods and assumptions used in January 1, 2011 valuation were the projected unit credit cost method and an investment rate of return of 5% per year. The accrued benefit for the unit credit cost method is defined by the plan and is usually used when the annual benefit accrual is a flat dollar amount or a constant percentage of the participant's current annual salary. The asset valuation method utilized was the market value per the Trustee. There was no projected salary increase assumptions used in the January 1, 2011 valuation as the participants of the Plan were covered under the management Plan effective January 1, 1989. For participants of the Plan eligible for additional benefits, the additional benefits were not valued as the potential liability for this benefit is de minimus.

#### *Manhattan and Bronx Surface Transit Operating Authority*

*Plan Description* — MTA New York City Transit contributes to the Manhattan and Bronx Surface Transit Operating Authority (“MaBSTOA”) Plan (the “MaBSTOA Plan”), a single employer governmental retirement plan. The MaBSTOA Plan provides retirement, disability, and death benefits to plan members and beneficiaries which are similar to those benefits provided by the New York City Employees’ Retirement System to similarly situated MTA New York City Transit employees. The Plan assigns the authority to establish and amend the benefit provisions to the MaBSTOA Board. MaBSTOA issues a publicly available financial report that includes financial statements and required supplementary information for the MaBSTOA Plan. That report may be obtained by writing to MaBSTOA Pension Plan, New York City Transit Authority, Operations Accounting, 2 Broadway, 15<sup>th</sup> Floor, New York, NY 10004.

*Funding Policy* — MaBSTOA’s funding policy requires periodic employer contributions which are actuarially determined amounts that are designed to accumulate sufficient assets to pay benefits when due. It is MaBSTOA’s policy to fund, at a minimum, the current year’s normal pension cost plus amortization of the unfunded actuarial accrued liability. For employees, the Plan has both contributory and noncontributory requirements depending on the date of entry into service. Employees entering qualifying service on or before July 26, 1976 are non-contributing. Certain employees entering qualifying service on or after July 27, 1976 are required to contribute 3% of their salary and others are required to contribute 2%. Also, certain post-July 27, 1976 employees contribute 1.85% in addition to their 3% contributions, if required. Effective 2000, certain post-July 27, 1976 employees who have been members for 10 years or have 10 years of credited service are no longer required to make the 3% contributions. MaBSTOA’s contribution rate is 32.2% of annual covered payroll. MTA New York City Transit’s contributions to the MaBSTOA Plan for the years ended December 31, 2011, 2010 and 2009 were \$186.5, \$200.6 and \$204.2, respectively, equal to the annual required contributions for each year.

The funded status of the MaBSTOA Plan as of January 1, 2011, the most recent actuarial valuation date is as follows (in millions):

	<b>2011</b>	<b>2010</b>
Annual required contribution	\$ 186.5	\$ 200.6
Interest on net pension asset	(3.3)	(3.4)
Adjust to annual required contribution	<u>5.2</u>	<u>5.1</u>
Annual pension cost	188.4	202.3
Actual contributions	<u>(186.5)</u>	<u>(200.6)</u>
Decrease in net pension asset	1.9	1.7
Net pension asset beginning of year	<u>(41.2)</u>	<u>(42.9)</u>
Net pension asset end of year	<u>\$ (39.3)</u>	<u>\$ (41.2)</u>

### Three-Year Trend Information

<b>Year Ended</b>	<b>Annual Pension Cost (APC)</b>	<b>Percentage of APC Contributed</b>		<b>Net Pension Asset</b>	
		(In millions)			
12/31/2011	\$ 188.4		99.0 %		\$ (39.3)
12/31/2010	202.3		99.2		(41.2)
12/31/2009	205.9		99.2		(42.9)
<b>Actuarial Valuation Date</b>	<b>Actuarial Value of Assets (a)</b>	<b>(AAL) Initial Entry Age (b)</b>	<b>Unfunded (AAL) (UAAL) (b-a)</b>	<b>Funded Ratio (a/b)</b>	<b>Covered Payroll (c)</b>
			(In millions)		
1/1/2011	\$ 1,527.1	\$ 2,213.3	\$ 686.2	69.00 %	\$ 579.7
1/1/2010	1,396.9	2,133.9	737.0	65.50	591.1
1/1/2009	1,190.0	1,977.4	787.4	60.20	569.4

The schedule of funding progress, presented as RSI following the notes to the consolidated financial statements, present multiyear trend information about whether the actuarial value of plan assets are increasing or decreasing over time relative to the actuarial accrued liability for benefits.

*Funded Status and Funding Progress* — As of January 1, 2011, the most recent actuarial valuation date, the MaBSTOA Plan was 69.0% funded. The actuarial accrued liability for benefits was \$2,213.3 and the actuarial value of assets \$1,527.1, resulting in an unfunded actuarial accrued liability (UAAL) of \$686.2. The covered payroll (annual payroll of active employees covered by the MaBSTOA Plan) was \$579.7, and the ratio of the UAAL to the covered payroll was 118.4%.

*Actuarial Methods and Assumptions* — Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of events far into the future and actuarially determined amounts are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future. The January 1, 2011 valuation reflects the actuarial assumptions adopted by the MTA New York City Transit based on the January 1, 2007 Experience Study effective with the valuation. These changes increased the life expectancy for members included in the valuation, incorporated future anticipated mortality improvements, decreased rates of turnover and modified rates of retirement, so fewer retirements are expected for members with less than 20 years of service and more retirements are expected for members with at least 20 years of service. These changes increased the unfunded accrued liability by \$135.5, which is being amortized over 10 years, and increased the total employer contribution by \$24.4 per year.

The assumptions included an 8.0% investment rate of return and assumed general wage increases of 3.5% to 18.0% for operating employees and 4.5% and 7.0% for non-operating employees per year, depending on years of service. This also includes an inflation component of 2.5% per year.

Annual pension costs and related information about each of the above plans follows:

### *Cost-Sharing Multiple-Employer Plans*

#### *MTA Defined Benefit Plan*

*Plan Description* — The MTA Defined Benefit Pension Plan (“MTA Plan”) is a cost sharing multiple-employer pension plan. The Plan includes certain MTA Long Island Rail Road non-represented employees hired after December 31, 1987, MTA Metro-North Railroad non-represented employees, certain MTA Long Island Bus employees hired prior to January 23, 1983, MTA Police, MTA Long Island Rail Road represented employees hired after December 31, 1987, certain MTA Metro-North Railroad represented employees, MTA Long Island Rail Road represented employees hired after December 31, 1988, employees of MTA Staten Island Railway and certain employees of the MTA Bus Company (“MTA Bus”). MTA Long Island Rail Road, MTA Metro-North Railroad, MTA, MTA Staten Island Railway and MTA Bus contribute to the MTA Plan, which offers distinct retirement, disability, and death benefits for their covered employees. Annual pension costs and related information about this plan are presented in the following table for all years presented as if the plan was a single-employer plan at the MTA level. The MTA Plan may be amended by action of the MTA Board.

A stand-alone financial report may be obtained by writing to the MTA Comptroller, 347 Madison Avenue, New York, New York, 10017.

*Funding policy* — Employer contributions are actuarially determined on an annual basis and are recognized when due. Employee contributions to the Plan are recognized in the period in which the contributions are due. There are no contributions required for the MTA Long Island Bus Employees’ Pension Plan. The current funded ratio of actuarial accrued assets over actuarial accrued liability is 87.4% of annual covered payroll. The contribution requirements of the plan members and the MTA are established and may be amended by the MTA Board. The MTA’s contributions to the Plan for the years ending December 31, 2011, 2010 and 2009 were \$166.2, \$155.3, and \$146.2, respectively, equal to the required contributions for each year.

The following summarizes the types of employee contributions made to the Plan:

Effective January 1, 1995, covered MTA Metro-North Railroad and MTA Long Island Rail Road non-represented employees are required to contribute to the Plan to the extent that their Railroad Retirement Tier II employee contribution is less than the pre-tax cost of the 3% employee contributions. Effective October 1, 2000, employee contributions, if any, were eliminated after ten years of making contributions to the Plan. MTA Metro-North Railroad employees may purchase prior service from January 1, 1983 through December 31, 1995 and MTA Long Island Rail Road employees may purchase prior service from January 1, 1988 through December 31, 1995 by paying the contributions that would have been required of that employee for the years in question, calculated as described in the first sentence, had the Plan been in effect for those years. Police Officers who become participants of the MTA Police Program prior to January 1, 2010 contribute to that program at various rates. Police Officers who become participants on or after January 1, 2010 contribute 3% up to the completion of 30 years of service, the maximum amount of service credit allowed.

Covered MTA Metro-North Railroad represented employees and MTA Long Island Rail Road represented employees who first became eligible to be Plan participants prior to January 30, 2008 and MTA Staten Island Railway employees contribute 3% of salary. MTA Long Island Rail Road represented employees who became participants after January 30, 2008 contribute 4% of salary. For the MTA Staten Island Railway employees, contributions are not required after the completion of ten years of credited service. MTA Long Island Rail Road represented employees are required to make the employee contributions for ten years. Certain Metro-North represented employees are required to make the employee contributions until January 1, 2017 and others until June 30, 2017.

Covered MTA Bus employees are required to contribute a fixed dollar amount, which varies, by depot. Currently, non-represented employees at Yonkers Depot and non-represented employees hired after June 30, 2007 at Baisley Park, College Point, Eastchester, Far Rockaway, JFK, LaGuardia, and Spring Creek Depots, contribute \$21.50 per week. Non-represented employees at Eastchester hired prior to 2007 contribute \$25 per week. Represented employees at Baisley Park, College Point, Eastchester, Far Rockaway, JFK, LaGuardia and Yonkers Depots contribute \$29.06 per week; Spring Creek represented employees contribute \$32.00 per week. Certain limited number of represented employees promoted prior to the resolution of a bargaining impasse continue to participate in the plan that was in effect before their promotion. Certain remaining non-represented employees at Baisley Park, Far Rockaway, JFK, LaGuardia and Spring Creek Depots in the pension program covering only such employees make no contributions to those programs. (Note: the dollar figures in this paragraph are in dollars, not millions of dollars).

#### *New York City Employees' Retirement System ("NYCERS")*

*Plan Description* — MTA New York City Transit and MTA Bridges and Tunnels contribute to NYCERS, a cost-sharing multiple-employer retirement system for employees of NYC and certain other governmental units. NYCERS combines features of a defined-benefit pension plan with those of a defined-contribution pension plan. NYCERS provides pension benefits to retired employees based on salary and length of service. In addition, NYCERS provides disability benefits, cost-of-living adjustments, and death benefits subject to satisfaction of certain service requirements and other provisions. The NYCERS plan functions in accordance with existing NYS statutes and NYC laws and may be amended by action of the State Legislature. NYCERS issues a publicly available comprehensive annual financial report that includes financial statements and required supplementary information. That report may be obtained by writing to the New York City Employees' Retirement System, 340 Jay Street, Brooklyn, New York 11201.

*Funding Policy* — NYCERS is a contributory plan, except for certain employees who entered prior to July 27, 1976 who make no contribution. Most employees who entered qualifying service after July 1976 contribute 3% of their salary. Certain MTA New York City Transit employees contribute 2%. Also, certain post-July 27, 1976 employees contribute 1.85% in addition to their 3% contributions, if required, and a small group of such employees contribute 3.83% in addition to the 3% contributions, if required. The State Legislature passed legislation in 2000 that suspended the 3% contribution for most employees who have been members for 10 or more years. MTA New York City Transit and MTA Bridges and Tunnels are required to contribute at an actuarially determined rate. The rates are 20.5% and 19.5%, respectively, of covered payroll. The contribution requirements of plan members and MTA New York City Transit and MTA Bridges and Tunnels are established and amended by law. MTA New York City Transit's required contributions for NYCERS fiscal years ended June 30, 2011, 2010 and 2009 were \$608.7, \$563.8, and \$532.8, respectively. MTA Bridges and Tunnels' contributions to NYCERS for the years ended December 31, 2011, 2010 and 2009 were \$27.7, \$25.5, and \$24.8, respectively. All contributions were equal to or in excess of the actuary's recommendation, plus interest.

#### *New York State and Local Employees' Retirement System ("NYSLERS")*

*Plan Description* — MTAHQ and MTA Long Island Bus employees who were hired after January 23, 1983, are members of NYSLERS. In addition, employees of the Capital Company who are on its payroll are also members of NYSLERS. NYSLERS is a cost-sharing multiple-employer plan and offers a broad spectrum of benefits, including retirement, death and disability benefits, and cost of living adjustments. Further information about the plan is more fully described in the publicly available statement of NYSLERS and may be obtained by writing to New York State and Local Retirement System, Office of the State Comptroller, 110 State Street, Albany, New York, 12244-0001.

*Funding Policy* — Employees who became members prior to July 27, 1976 make no contributions. Employees who became members after that date contribute 3% of salary. Since 2000, the 3% contribution is suspended for employees who have 10 years or more of membership. Employees who become members on or after January 1, 2010 are required to contribute for all their years of service. MTAHQ, which included the Capital Company, and MTA Long Island Bus are required to contribute at an actuarially determined rate. The current actuarial rate of annual covered payroll for MTAHQ and MTA Long Island Bus respectively is 15.7% and 11.3%. The MTAHQ NYSLERS contributions for the years ended December 31, 2011, 2010 and 2009 was approximately \$10.5, \$7.1, and \$5.7, respectively. The MTA Long Island Bus NYSLERS contributions for the years ended December 31, 2011, 2010 and 2009 were approximately \$9.8, \$7.1 and \$4.1, respectively.

#### *Defined Contribution Plans*

*Single-Employer* — The Long Island Rail Road Company Money Purchase Plan (the "Money Purchase Plan") is a defined contribution plan that covers certain represented employees who began service with MTA Long Island Rail Road after December 31, 1987. Beginning January 1, 2004, employees who were participants in the Money Purchase Plan have become participants in a New Program in the MTA Plan (the "New Program") and have similar benefits as those applicable to non-represented employees of MTA Long Island Rail Road in the MTA Plan. The MTA Board has voted to terminate the Money Purchase Plan and the Money Purchase Plan was terminated effective March 31, 2008. The Money Purchase Plan made final distributions of all participant accounts on or about January 6, 2010.

The Metro-North Commuter Railroad Company Defined Contribution Pension Plan for Agreement Employees (the "Agreement Plan"), established January 1, 1988, covers represented employees in accordance with applicable collective bargaining agreements. Under this plan, MTA Metro-North Railroad contributed an amount equal to 4% of each eligible employee's gross compensation to the Agreement Plan on that employee's behalf. For employees who have 19 or more years of service, MTA

Metro-North Railroad contributes 7%. In addition, employees may voluntarily contribute up to the amount of MTA Metro-North Railroad's contribution to the Agreement Plan, on an after-tax basis. The Agreement Plan is administered by MTA Metro-North Railroad and the Agreement Plan's Board of Managers of Pension. Effective January 1, 2004, certain employees who were participants of the Agreement Plan became participants in the New Program in the MTA Plan and have similar benefits as those applicable to non-represented employees of MTA Metro-North Railroad in the MTA Plan. In 2007, the remaining represented employees also became participants in the New Program, unless they opted-out of the New Program. The "opt-out" employees became participants of the MTA 401(k) plan with the same employer contributions as the Agreement Plan. The MTA Board has voted to terminate this Agreement Plan and the Agreement Plan was terminated effective December 16, 2008.

*Deferred Compensation Plans* — As permitted by Internal Revenue Code Section 457, the MTA has established a trust or custodial account to hold plan assets for the exclusive use of the participants and their beneficiaries. Plan assets and liabilities are not reflected on the MTA's combined balance sheets.

Certain MTA Group employees are also eligible to participate in a second deferred compensation plan established in accordance with Internal Revenue Code Section 401(k) (the "401(k) Plan"). Participation in the 401(k) Plan is available to most represented and non-represented employees. MTA Bus on behalf of certain MTA Bus employees and MTA Metro-North Railroad on behalf of those employees who opted-out of participation in the MTA Plan make contributions to the 401(k) Plan. The rate for the employer contribution varies. All amounts of compensation deferred under the 401(k) Plan, and all income attributable to such compensation, are in trust for the exclusive use of the participants and their beneficiaries. Accordingly, the 401(k) Plan is not reflected in the accompanying combined balance sheets.

## 5. OTHER POSTEMPLOYMENT BENEFITS

The MTA has implemented GASB Statement No. 45, "Accounting and Financial Reporting for Employers for Postemployment Benefits Other Than Pensions" ("GASB 45"). This Statement establishes the standards for the measurement, recognition, and display of Other Postemployment Benefits ("OPEB") expense/expenditures and related liabilities (assets), note disclosures, and, if applicable, required supplementary information ("RSI") in the financial reports of state and local governmental employers.

Postemployment benefits are part of an exchange of salaries and benefits for employee services rendered. Most OPEB have been funded on a pay-as-you-go basis and have been reported in financial statements when the promised benefits are paid. GASB 45 requires state and local government's financial reports to reflect systematic, accrual-basis measurement and recognition of OPEB cost (expense) over a period that approximates employees' years of service and provides information about actuarial accrued liabilities associated with the OPEB and to what extent progress is being made in funding the plan.

The MTA elected not to record the entire amount of the Unfunded Actuarial Accrued Liability ("UAAL") in the year ended December 31, 2011, and record the net annual OPEB obligation. The MTA also elected not to fund the UAAL more rapidly than on a pay-as-you-go basis. The UAAL relating to post-employment benefits increased from \$13.2 billion at the end of 2010 to \$17.8 billion at the end of 2011. The end of the year liability equals the amount as of the beginning of the year plus interest at 4.0% less amortization amount included in the Annual Required Contribution for the prior year less or plus assumption changes and plan changes.

**Plan Description** — The benefits provided by the MTA Group include medical, pharmacy, dental, vision, and life insurance, plus monthly supplements for Medicare Part B or Medicare supplemental plan reimbursements and welfare fund contributions. The different types of benefits provided vary by agency and employee type (represented employees versus management). All benefits are provided upon

retirement as stated in the applicable pension plan, although some agencies provide benefits to some members if terminated within 5 years of attaining retirement eligibility. Employees of the MTA Group are members of the following pension plans: the MTA Plan, the LIRR Plan, the MNR Plan, the MaBSTOA Plan, NYCERS and NYSLERS.

The MTA Group participates in the New York State Health Insurance Program (“NYSHIP”) to provide medical and prescription drug benefits, including Medicare Part B reimbursements to many of its members. NYSHIP provides a PPO plan and several HMO plans. Represented MTA New York City Transit, other MTA New York City Transit employees who retired prior to January 1, 1996 or January 1, 2001, and MTA Bus retirees do not participate in NYSHIP. These benefits are provided either through a self-insured health plan, a fully insured or an HMO.

GASB Statement No. 45 requires employers to perform periodic actuarial valuations to determine annual accounting costs, and to keep a running tally of the extent to which these amounts are over or under funded. The valuation must be performed at least biennially. The most recent biennial valuation was performed for the year ended December 31, 2011 and was performed with a valuation date of January 1, 2010. The total number of plan participants as of December 31, 2010 receiving retirement benefits was 39 thousand.

The MTA is a participating employer in NYSHIP. The NYSHIP financial report can be obtained by writing to NYS Department of Civil Service, Employee Benefits Division, Alfred E. Smith Office Building, 805 Swan Street, Albany, NY 12239.

**Annual OPEB Cost and Net OPEB Obligation** — The MTA’s annual OPEB cost (expense) represents the accrued cost for postemployment benefits under GASB 45. The cumulative difference between the annual OPEB cost and the benefits paid during a year will result in a net OPEB obligation (the “Net OPEB Obligation”), included on the balance sheet. The annual OPEB cost is equal to the annual required contribution (the “ARC”) less adjustments if a Net OPEB Obligation exists and plus the interest on Net OPEB Obligations. The ARC is equal to the normal cost plus an amortization of the unfunded frozen actuarial accrued liability.

For determining the ARC, the MTA has chosen to use Frozen Initial Liability (the “FIL Cost Method”) cost method, one of the cost methods in accordance with the parameters of GASB Statement No. 45. The initial liability is amortized over a 22-year period. The remaining amortization period at December 31, 2011 is 18 years.

In order to recognize the liability over an employee’s career, an actuarial cost method divides the present value into three pieces: the part that is attributed to past years (the “Accrued Liability” or “Past Service Liability”), the part that is being earned this year (the “Normal Cost”), and the part that will be earned in future years (the “Future Service Liability”). Under the FIL Cost Method, an initial past service liability is determined based on the Entry Age Normal (“EAN”) Cost Method and is amortized separately. This method determines the past service liability for each individual based on a level percent of pay. The Future Service Liability is allocated based on the present value of future compensation for all members combined to determine the Normal Cost. In future years, actuarial gains/losses will be incorporated into the Future Service Liability and amortized through the Normal Cost.

**Actuarial Methods and Assumptions** — The Frozen Initial Liability (“FIL”) Cost Method is used for determining the Normal Cost. The Entry Age Normal (“EAN”) Cost Method is used to determine the initial Frozen Accrued Liability as well as any subsequent changes in Accrued Liability due to changes in the plan and/or actuarial assumptions. The initial Frozen Unfunded Accrued Liability was determined as of January 1, 2006 (2007 for MTA Bus Company) to be used in the financials for the 2007 fiscal year. EAN will also be used to determine the unfunded actuarial accrued liability in the GASB

45 supplementary schedules. The EAN method determines the Accrued liability for each individual based on a level percent of pay for service accrued through the valuation date.

The Frozen Unfunded Accrued Liability is determined each year as the Frozen Unfunded Accrued Liability for the prior year, increased with interest, reduced by the end-of-year amortization payment and increased or decreased by any new bases established for the current year.

The difference between the Actuarial Present Value of Benefits and the Frozen Unfunded Accrued Liability equals the Present Value of Future Normal Cost. The Normal Cost equals the Present Value of Future Normal Cost divided by the present value of future compensation and multiplied by the total of current compensation for members less than certain retirement age.

The Annual Required Contribution (“ARC”) is equal to the sum of the Normal Cost and the amortization for the Frozen Unfunded Accrued Liability with appropriate interest adjustments. Any difference between the ARC and actual plan contributions from the prior year are considered an actuarial gain/loss and thus, are included in the development of the Normal Cost. This methodology differs from the approach used for the pension plan where the difference between the ARC and actual plan contributions from the prior year, if any, will increase or decrease the Frozen Unfunded Accrued Liability and will be reflected in future amortization payments. A different approach was applied to the OPEB benefits because these benefits are not actuarially funded.

**Valuation Date** - The valuation date is the date that all participant and other pertinent information is collected and liabilities are measured. This date may not be more than 24 months prior to the beginning of the fiscal year. The valuation date for this valuation is January 1 2010 which is 12 months prior to the beginning of the 2011 fiscal year, except for Metro-North Railroad. For this agency, the valuation date is January 1, 2011 due to the completion of the early retirement window during 2010.

**Inflation Rate** - 2.5% per annum compounded annually.

**Discount Rate** – GASB 45 provides guidance to employers in selecting the discount rate. The discount rate should be based on the estimated long-term investment yield on the investments that are expected to be used to finance the benefits. If there are no plan assets, assets of the employer should be used to derive the discount rate. This would most likely result in a lower discount rate and thus, liabilities significantly higher than if the benefits are prefunded. In recognition of the decrease in short-term investment yields, the discount rate for this valuation has been lowered from 4.2% to 4.0%.

**Healthcare Reform** - The valuation reflects the actuary understanding of the impact in future health costs due to the passage of the Patient Protection and Affordable Care Act (P.L.111-148) signed on March 23, 2010, as amended by the Health Care and Education Reconciliation Act (H.R.4872) signed on March 30, 2010. Specifically, the following assumptions have been modified:

- Reflected the potential excise tax beginning in 2018 separately for NYSHIP plans and self-insured union plans of Transit and MTA Bus Company. The excise tax equals 40% of the amount of the premium in excess of the threshold.
- Increased the dependent assumption for female members from 55% to 60% to reflect the fact that dependent children are covered until age 26.
- Increased the assumed coverage period to 7 years for all non-NYSHIP members with a dependent child.

The impact of these changes had a significant impact on the liabilities developed in this valuation. However, the actual impact on future health costs due to this legislation will depend on a number of factors, including future regulations that are not yet known.

The OPEB-specific actuarial assumptions used in the most recent biennial valuation are as follows:

Valuation date	January 1, 2010 for all agencies except Metro-North which was January 1, 2011
Actuarial cost method	Frozen Initial Liability
Discount rate	4.0%
Price inflation	2.5% per annum, compounded annually
Per-Capita retiree contributions	*
Amortization method	Frozen Initial Liability
Amortization period	18 years
Period closed or open	Closed

\* In general, all coverages are paid for by the MTA. The exceptions are for Bridges and Tunnels, where surviving spouses pay a portion of the premium (10% for single coverage, 25% for dependent coverage) and MTA Headquarters where members retired prior to 1997 pay a portion of the premium, depending on the year they retired.

Actuarial valuation involve estimates of the value of reported amounts and assumptions about the probability of events far into the future, and that actuarially determined amounts are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future.

**Per Capita Claim Costs** — For members of NYSHIP and certain MTA Staten Island Railway and MTA New York City Transit members who retired prior to NYSHIP availability, unadjusted premiums were used. The medical and pharmacy benefits provided to TWU Local 100, ATU 1056 and ATU 726 represented Transit members and represented MTA Bus Company members are self-insured as well as some Pre-NYSHIP Transit members. For these benefits, a per capita claims cost assumptions that vary by age, gender and benefit type was developed. The per capita costs assumptions reflect the change in medical carriers effective January 1, 2011 and are based on preliminary medical claims information. An assumption was made to “complete” the claims. Details on the per capita claim cost assumption as shown below.:

The Health Cost Guidelines was used to develop Per Capita Claim Costs relativity factors that varied by benefit, age and gender for retirees of the TWU Local 100, ATU Local 726, ATU Local 1056 unions and MTA Bus Company for 2011. These were then combined to match the aggregate claim experience provided by MTA. Since there was a new medical carrier, claims experience was assumed to be 85% complete, which is consistent with MTA completion rates from 2010. Pharmacy claims were increased by 1% as an incurred versus paid claim adjustment. Finally, an administrative load was applied equal to 5.8% for Empire BCBS medical benefits, 3.8% for United Healthcare medical benefits and 0.6% for pharmacy benefits.

**Medicare Part B Premiums** — The Medicare Part B premium reimbursement was included in the 2008 premium for those members covered by NYSHIP. Medicare Part B reimbursements were assumed to have an annual trend of 5.5%. These trends were combined with the adjusted Getzen model trend to determine a single weighted trend assumption. The weighting was based on an estimated liability basis.

**Medicare Part D Premiums** — GASB has issued a Technical Bulletin stating that the value of expected Retiree Drug Subsidy (“RDS”) payments to be received by an entity cannot be used to reduce the Actuarial Accrued Liability of OPEB benefits nor the Annual Required Contribution (“ARC”). Furthermore, actual contributions made (equal to the amount of claims paid in a year if the plan is not funded) will not be reduced by the amount of any subsidy payments received. Accordingly, the 2010 valuation excludes any RDS payments expected to be received by the MTA and its agencies.

**Health Care Cost Trend** - For those retirees participating in NYSHIP, the trend assumption used for 2010 and 2011 was 0% and 0.6%, respectively. The healthcare trend assumption is based on the Society of Actuaries-Getzen Model version 11.1 utilizing the baseline assumptions included in the model, except real GDP of 1.8% for medical and pharmacy benefits. Additional adjustments apply based on percentage of costs associated with administrative expenses, aging factors and potential excise taxes due to healthcare reform, separately for NYSHIP and non-NYSHIP benefits. These assumptions are combined with long-term assumptions for dental and vision benefits (4%) plus Medicare Part B reimbursements (5.5%). The NYSHIP trend reflects actual increases in premiums through 2012. The NYSHIP trend is used for six agencies plus the non-represented employees of MTA Bus. This trend also reflects dental and vision benefits plus Medicare Part B reimbursements. For NYC Transit, this trend is weighted by liability with the non-NYSHIP trend assumption. The non-NYSHIP trend is applied directly for represented employees of MTA Bus. The following lists the NYSHIP and non-NYSHIP trend assumptions along with the resulting trends assumed for Transit.

### Health Care Cost Trend Rates

Fiscal Year	NYSHIP	Non-NYSHIP		Transit	
		< 65	>=65	< 65	>=65
2010	0.0 %	8.0 %	8.0 %	8.0 %	8.0 %
2011	0.6	8.0	8.0	5.3	5.3
2012	7.4	7.2	7.2	7.3	7.3
2013	7.9	7.6	7.6	7.7	7.7
2014	6.6	6.3	6.3	6.4	6.4
2017	6.1	6.7	5.7	6.5	5.8
2022	5.8	5.8	5.5	6.3	5.6
2027	6.1	6.4	5.4	6.2	5.7
2032	6.7	6.2	5.4	6.3	5.9
2037	6.2	5.7	5.3	5.9	5.6
2042	5.9	5.5	5.2	5.6	5.5
2047	5.6	5.4	5.8	5.4	5.7

**Participation** — For members that participate in NYSHIP, 100% of eligible members, including current retirees and surviving spouses, are assumed to elect the Empire PPO Plan. For groups that do not participate in NYSHIP, various coverage election rates are used. The following table displays the election rates used for future union retirees in MTA New York City Transit:

**OPEB Participation By Agency as at January 1, 2010**

	NYC Transit	Long Island Rail Road	Metro- North Rail Road *	Bridges & Tunnels	MTAHQ	Long Island Bus	Staten Island Railway	MTA Bus Co.	Total
<b><u>Active Members</u></b>									
Number	47,417	6,828	6,013	1,733	1,629	1,028	263	3,402	68,313

Average Life Insurance Amount	\$2,895	\$23,146	\$2,667	\$5,000	\$5,000	\$7,081	\$2,553	\$5,000	\$11,392

\* MTA Metro-North Railroad as of January 1, 2011

**Dependent Coverage** — For members that participate in NYSHIP, 100% of eligible members, including current retirees and surviving spouses, are assumed to elect the Empire PPO Plan. For groups that do not participate in NYSHIP, details on coverage election rates can be found in NYC Transit and MTA Bus Company Sections IV.

Spouses are assumed to be the same age as the employee/retiree. 85% of male and 60% of female eligible members are assumed to elect family coverage upon retirement. No children are assumed. Actual family coverage elections for current retirees are used. If a current retiree's only dependent is a child, eligibility is assumed for an additional 7 years of dependent coverage if the member participates in NYSHIP (otherwise, 5 years) from the valuation date was assumed.

**Demographic Assumptions:**

**Mortality** — Preretirement and postretirement health annuitant rates are projected on a generational basis using Scale AA, as recommended by the Society of Actuaries Retirement Plans Experience Committee.

**Preretirement** — RP-2000 Employee Mortality Table for Males and Females with blue-collar adjustments. No blue-collar adjustments were used for management members of MTAHQ.

**Postretirement Healthy Lives** — RP-2000 Healthy Annuitant mortality table for males with Blue Collar adjustments and 133% of the rates from the RP-2000 Healthy Annuitant mortality table for females. No blue-collar adjustments were used for management members of MTAHQ.

**Postretirement Disabled Lives** — 75% of the rates from the RP-2000 Disabled Annuitant mortality table for males and females. At age 85 and later for males and age 77 and later for females, the disability rates are set to the male and female healthy rates, respectively.

**Turnover and retirement rates** — All demographic assumptions were based on assumptions utilized in the 2010 actuarial valuations for the pension plans, with the exception of the mortality assumption. The following is a table displaying the various sources of the assumptions utilized by group.

Group	Pension Plan
Transit – OA	MaBSTOA
Transit – TA	NYCERS – TA
TBTA	NYCERS – TBTA
LIRR Pre-1988	LIRR Plan
LIRR Post-1987	MTA DB Plan
Metro North Mgrs/Unions in DB Plan	MTA DB Plan
Metro North Other Unions	DC Plan—used same as DB Plan Union
MTA Police	MTA DB Plan
Headquarters Mgrs and IBT	NYSLERS
Long Island Bus Pre-1983	MTA DB Plan
Long Island Bus Post-1982	NYSLERS
Staten Island	MTA DB Plan
MTA Bus Companies	MTA DB Plan
College Point Depot – Non Rep	DC Plan—used same as MTA DB Non Rep

**Vestee Coverage** — For members that participate in NYSHIP, Vestees (members who have terminated, but not yet eligible to retire) are eligible for NYSHIP benefits provided by the Agency upon retirement, but must maintain NYSHIP coverage at their own expense from termination to retirement. Vestees are assumed to retire at first eligibility and would continue to maintain NYSHIP coverage based on the following percentages. This assumption is based on the Development of Recommended Actuarial Assumptions for New York State/SUNY GASB 45 Valuation report provided to Participating Employers of NYSHIP. These percentages were also applied to current vestees, which were only provided by MTAHQ and MTA Long Island Rail Road.

Age at Termination	Percent Electing
< 40	0 %
40–43	5
44	20
45–46	30
47–48	40
49	50
50–51	80
52+	100

The following table shows the elements of the MTA's annual OPEB cost for the year, the amount actually paid, and changes in the MTA's net OPEB obligation to the plan for the years ended December 31, 2011 and 2010. The portion of this actuarial present value allocated to a valuation year is called the Normal Cost. Calculations are based on the types of benefits provided under the terms of the substantive plan at the time of each valuation and on the pattern of sharing costs between the employer and plan members to that point. Calculations reflect a long-term perspective.

(In millions)	<b>December 31, 2011</b>	<b>December 31, 2010</b>
Annual required contribution ("ARC")	\$ 2,421.8	\$ 1,764.9
Interest on net OPEB obligation	196.1	156.7
Adjustment to ARC	<u>(514.7)</u>	<u>(392.9)</u>
OPEB cost	2,103.2	1,528.7
Payments made	<u>(397.4)</u>	<u>(359.0)</u>
Increase in net OPEB obligation	1,705.8	1,169.7
Net OPEB obligation — beginning of period/year	<u>4,902.7</u>	<u>3,733.0</u>
Net OPEB obligation — end of period/year	<u>\$ 6,608.5</u>	<u>\$ 4,902.7</u>

The MTA's annual OPEB cost, the percentage of annual OPEB cost contributed to, and the net OPEB obligation for the year ended December 31, 2011 is as follows (in millions):

Year Ended	Annual OPEB Cost	Percentage of Annual OPEB Cost	Net OPEB Obligation
(In Millions)			
December 31, 2011	\$ 2,103.2	18.9 %	\$ 6,608.5
December 31, 2010	1,528.6	23.5	4,902.7
December 31, 2009	1,442.3	24.1	3,733.0

The Authorities funded status of the Plan is as follows (in millions):

Year Ended (In millions)	Valuation Date *	Actuarial Value of Assets {a}	Actuarial Accrued Liability (AAL) {b}	Unfunded Actuarial Accrued Liability (UAAL) {c}={b}-{a}	Funded Ratio {a}/{c}	Covered Payroll {d}	Ratio of UAAL to Covered Payroll {c}/{d}
December 31, 2011	January 1, 2010	-	\$ 17,764	\$ 17,764	-	\$ 4,600.0	386.1 %

\* MTA Metro-North Railroad as of January 1, 2011

The required schedule of funding progress immediately following the notes to the financial statements presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

## 6. CAPITAL ASSETS

Capital assets and improvements include all land, buildings, equipment, and infrastructure of the MTA having a minimum useful life of two years and having a cost of more than \$25 thousand.

Capital assets are stated at historical cost, or at estimated historical cost based on appraisals, or on other acceptable methods when historical cost is not available. Capital leases are classified as capital assets in amounts equal to the lesser of the fair market value or the present value of net minimum lease payments at the inception of the lease.

Accumulated depreciation and amortization are reported as reductions of fixed assets. Depreciation is computed using the straight-line method based upon estimated useful lives of 25 to 50 years for buildings, 2 to 40 years for equipment, and 25 to 100 years for infrastructure. Capital lease assets and leasehold improvements are amortized over the term of the lease or the life of the asset whichever is less. Capital assets consist of the following at December 31, 2009, December 31, 2010 and December 31, 2011 (in millions):

	Balance December 31, 2009	Additions	Deletions	Balance December 31, 2010	Additions	Deletions	Balance December 31, 2011
<b>Capital assets — not being depreciated:</b>							
Land	\$ 156	\$ 14	\$ -	\$ 170	\$ 1	\$ -	\$ 171

Capital assets — net	<u>\$47,229</u>	<u>\$4,533</u>	<u>\$ 1,629</u>	<u>\$50,133</u>	<u>\$3,735</u>	<u>\$ 2,031</u>	<u>\$ 51,837</u>

Interest capitalized in conjunction with the construction of capital assets for the years ended December 31, 2011 and 2010 was \$42.2 and \$55.5, respectively.

Capital assets acquired prior to April 1982 for MTA New York City Transit were funded primarily by NYC with capital grants made available to MTA New York City Transit. NYC has title to a substantial portion of such assets and, accordingly, these assets are not recorded on the books of the MTA. Subsequent acquisitions, which are part of the MTA Capital Program, are recorded at cost by MTA New York City Transit. In certain instances, title to MTA Bridges and Tunnels' real property may revert to NYC in the event the MTA determines such property is unnecessary for its corporate purpose.

For certain construction projects, the MTA holds in a trust account marketable securities pledged by third-party contractors in lieu of cash retainages. At December 31, 2011 and 2010, these securities totaled \$202.8 and \$170.9, respectively, and had a market value of \$213.6 and \$161.6, respectively, and are not included in these financial statements.

## 7. LONG-TERM DEBT

**MTA Transportation Revenue Bonds** — Prior to 2011, MTA issued thirty one Series of Transportation Revenue Bonds secured under its General Resolution Authorizing Transportation Revenue Obligations adopted on March 26, 2002 in the aggregate principal amount of \$16,758.33. The

Transportation Revenue Bonds are MTA's special obligations payable solely from transit and commuter systems revenues and certain state and local operating subsidies.

On May 25, 2011, MTA executed a Continuing Covenants Agreement with Wells Fargo Bank N.A. to replace the expiring Dexia Credit Local, New York Branch irrevocable direct-pay letter of credit for \$200 of Transportation Revenue Refunding Bonds, Subseries 2002D-2.

On July 20, 2011 the MTA issued Transportation Revenue Bonds, Series 2011A in the amount of \$400.440. The Series 2011A bonds were issued as long-term fixed rate tax-exempt bonds, with serial bonds maturing in years 2012 thru 2031 and term bonds maturing in years 2036, 2037, 2038, 2041, and 2046. Proceeds of the issuance will be used to finance existing approved transit and commuter projects.

On September 8, 2011, Fitch Ratings acted to lower the credit rating on \$14.3 billion of then outstanding Transportation Revenue Bonds by one notch, from "A+" to "A", Fitch also changed the outlook from Negative to Stable. Fitch cited increasing costs and concerns about the Authority's financial projections as the reasons for taking the rating action. The "A" rating is the agency's sixth-highest investment grade rating.

On September 14, 2011, the MTA issued Transportation Revenue Variable Rate Bonds, Series 2011B in the amount of \$99.560. The bonds are backed by a direct-pay letter of credit from Bank of America. The proceeds of the issuance will be used to finance existing approved transit and commuter projects.

On September 27, 2011, MTA extended the Bank of Nova Scotia's direct pay letter of credit related to Transportation Revenue Variable Rate Refunding Bonds, Series 2002G-1 until October 7, 2013.

On October 21, 2011, the MTA extended for an additional 2 years the Letter of Credit and Reimbursement Agreement with Landesbank Hessen-Thüringen Girozentrale, acting through its NY Branch (Helaba Bank) supporting the Transportation Revenue Variable Rate Bonds, Subseries 2005D-1 from November 7, 2011 to November 7, 2013.

On November 10, 2011, the MTA issued Transportation Revenue Refunding Bonds, Series 2011C in the amount of \$197.95. This refunding of existing fixed-rate Transportation Revenue Bonds will make available debt service account monies to pay for a tender of 2 Broadway Certificates of Participation ("COP's), Series 2004A and a refunding of approximately \$15 of fixed rate COPs, Series 1999A and 2000A. On November 28, 2011, \$230.7 of outstanding 2 Broadway Series 2004A were tendered to MTA at a price of \$970 per \$1,000 certificates.

On November 15, 2011, the MTA remarketed \$93.5 Transportation Revenue Bonds, Series 2008B-1 from a Term Rate Mode into a Fixed Rate Mode.

On November 18, 2011, Moody's Investors Service acted to lower the credit rating on \$250 Transportation Revenue Variable Rate Bonds, Series 2005D-1 and 2005D-2 from Aa1 to Aa2 in connection with the downgrade of the letter of credit provider, Helaba Bank. The downgrade did not reflect a change in Moody's opinion of the credit quality of the MTA.

On December 7, 2011 the MTA issued Transportation Revenue Bonds, Series 2011D in the amount of \$480.165. The Series 2011D bonds were issued as long-term fixed rate tax-exempt bonds, with a final maturity of November 15, 2046. Proceeds of the issuance will be used to finance existing approved transit and commuter projects.

**MTA Bond Anticipation Notes (commercial paper program)** — From time to time, MTA issues Transportation Revenue Bond Anticipation Notes in accordance with the terms and provisions of the

General Resolution described above in the form of commercial paper to fund its transit and commuter capital needs. The interest rate payable on the notes depends on the maturity and market conditions at the time of issuance. Payment of principal and interest on the notes are additionally secured by letters of credit issued by TD Bank, N.A., Barclays Bank, Royal Bank of Canada, and Citibank, N.A. As of December 31, 2011, MTA had \$900.0 of commercial paper notes outstanding. The MTA Act requires MTAHQ to periodically (at least each five years) refund its commercial paper notes with bonds.

**MTA State Service Contract Bonds** — Prior to 2011, MTA issued two Series of State Service Contract Bonds secured under its State Service Contract Obligation Resolution adopted on March 26, 2002, in the aggregate principal amount of \$2,395. The State Service Contract Bonds are MTA's special obligations payable solely from certain payments from the State of New York under a service contract.

**MTA Dedicated Tax Fund Bonds** — Prior to 2011, MTA issued seventeen Series of Dedicated Tax Fund Bonds secured under its Dedicated Tax Fund Obligation Resolution adopted on March 26, 2002, in the aggregate principal amount of \$7,646.8. The Dedicated Tax Fund Bonds are MTA's special obligations payable solely from monies held in the Pledged Amounts Account of the MTA Dedicated Tax Fund. State law requires that the MTTF revenues and MMTOA revenues (described above in footnote 2 under "Nonoperating Revenues") be deposited, subject to appropriation by the State Legislature, into the MTA Dedicated Tax Fund.

On March 31, 2011, MTA issued \$127.4 Dedicated Tax Fund Refunding Bonds, Series 2011A. Proceeds of the issuance were used to refund \$132.08 of Dedicated Tax Fund Bonds, Series 2001A.

MTA tendered for and converted from an auction rate mode into a fixed rate mode \$294.5 of Dedicated Tax Fund Bonds, Subseries 2004-B1, B2 and B4 on April 26, April 27 and April 28 of 2011, respectively. In connection with this remarketing, MTA also terminated the existing financial guaranty insurance policy for the Subseries 2004B-1 and Subseries 2004B-4 Bonds provided by Ambac Assurance Corporation and the existing insurance policy for the Subseries 2004B-2 Bonds provided by MBIA.

On June 22, 2011, MTA substituted the original standby bond purchase agreement for the Dedicated Tax Fund Bonds, Series 2008A Bonds issued by Dexia Credit Local, New York Branch with an irrevocable direct-pay letter of credit issued by Morgan Stanley, N. A. for the \$173.8 Subseries 2008A-1 Bonds, and with an irrevocable direct-pay letter of credit issued by the Bank of Tokyo-Mitsubishi UFJ, Limited, acting through its New York Branch, for the \$173.8 Subseries 2008A-2 Bonds. As part of the substitution process, MTA also terminated the existing financial guaranty insurance policy for the Series 2008A Bonds provided by Financial Security Assurance Inc. (now known as Assured Guaranty Municipal Corp.).

On August 2, 2011, the MTA extended the stated expiration date of the irrevocable direct-pay letter of credit issued by the Bank of Nova Scotia, acting through its New York Agency, related to Dedicated Tax Fund Bonds, Series 2008B-1 from August 5, 2011 to August 15, 2013.

On August 3, 2011, \$245.175 Dedicated Tax Fund Bonds, Series 2008B were subject to mandatory tender, as the letters of credit related to the Subseries 2008B-2 Bonds, Subseries 2008B-3 Bonds and Subseries 2008B-4 Bonds were to expire by their terms. The MTA decreased the principal amount of the Subseries 2008B-2 Bonds to \$10.965 and also converted them from a weekly mode into a fixed rate mode. The MTA redesignated and increased the principal amount of the Subseries 2008B-3 Bonds to \$35.0 Subseries 2008B-3a, \$54.47 Subseries 2008B-3b, and \$44.74 Subseries 2008B-3c. All of the redesignated Subseries 2008B-3 Bonds were also converted from a weekly mode to a term mode. The MTA increased the principal amount of the Subseries 2008B-4 Bonds to \$100.00 with an irrevocable direct-pay letter of credit from KBC Bank, N.V., New York Branch expiring on August 15, 2014.

On October 27, 2011, the outstanding swap associated with DTF 2008A Bonds was novated from counterparty Citigroup Financial Products, Inc. to The Bank of New York Mellon while preserving the existing terms of the swap.

**MTA Certificates of Participation** — Prior to 2011, MTA (solely on behalf of MTA Long Island Rail Road and MTA Metro-North Railroad), MTA New York City Transit and MTA Bridges and Tunnels executed and delivered three Series of Certificates of Participation in the aggregate principal amount of \$807.3 to finance certain building and leasehold improvements to an office building at Two Broadway in Manhattan occupied principally by MTA New York City Transit, MTA Bridges and Tunnels, MTA Capital Construction, and MTAHQ. The aggregate principal amount of \$807.3 includes approximately \$357.9 of refunding bonds. The Certificates of Participation represent proportionate interests in the principal and interest components of Base Rent paid severally, but not jointly, in their respective proportionate shares by MTA New York City Transit, MTA, and MTA Bridges and Tunnels, pursuant to a Leasehold Improvement Sublease Agreement.

**MTA Bridges and Tunnels General Revenue Bonds** — Prior to 2011, MTA Bridges and Tunnels issued eighteen Series of General Revenue Bonds secured under its General Resolution Authorizing General Revenue Obligations adopted on March 26, 2002, in the aggregate principal amount of \$8,547.26. The General Revenue Bonds are MTA Bridges and Tunnels' general obligations payable generally from the net revenues collected on the bridges and tunnels operated by MTA Bridges and Tunnels.

On September 8, 2011, Fitch Ratings lowered its rating on then outstanding \$6.9 billion of MTA Bridges and Tunnels General Revenue debt from "AA" to "AA-".

On September 20, 2011, the direct pay letter of credit related to MTA Bridges and Tunnels General Revenue Variable Rate Bonds, Series 2001B from the State Street Bank and Trust was extended for three years from September 30, 2011 to September 30, 2014.

On October 13, 2011, the MTA issued MTA Bridges and Tunnels General Revenue Refunding Bonds, Series 2011A in the amount of \$609.43. Proceeds from the sale were used to currently refund certain outstanding maturities of fixed-rate MTA Bridges and Tunnels General Purpose Revenue Bonds, Series 2001A and Series 2002A.

**MTA Bridges and Tunnels Subordinate Revenue Bonds** — Prior to 2011, MTA Bridges and Tunnels issued ten Series of Subordinate Revenue Bonds secured under its 2001 Subordinate Revenue Resolution Authorizing Subordinate Revenue Obligations adopted on March 26, 2002, in the aggregate principal amount of \$2,903. The Subordinate Revenue Bonds are MTA Bridges and Tunnels' special obligations payable generally from the net revenues collected on the bridges and tunnels operated by MTA Bridges and Tunnels after the payment of debt service on the MTA Bridges and Tunnels General Revenue Bonds described in the preceding paragraph.

On September 8, 2011, in addition to taking actions with respect to MTA Transportation Revenue credit and Triborough Bridge and Tunnel General Revenue credit as described above, Fitch lowered its rating on then outstanding \$1.9 billion of Triborough Bridge and Tunnel Subordinate Revenue debt from "AA-" to "A+".

**Debt Limitation** — The New York State Legislature has imposed limitations on the aggregate amount of debt that the MTA and MTA Bridges and Tunnels can issue to fund the approved transit and commuter capital programs. The current aggregate ceiling, subject to certain exclusions, is \$34,877 compared with issuances totaling approximately \$24,053. The MTA expects that the current statutory ceiling will allow it to fulfill the bonding requirements of the approved Capital Programs.

**Bond Refundings** — From time to time, the MTA and MTA Bridges and Tunnels issue refunding bonds to achieve debt service savings or other benefits. The proceeds of refunding bonds are generally used to purchase U.S. Treasury obligations that are placed in irrevocable trusts. The principal and interest within the trusts will be used to repay the refunded debt. The trust account assets and the refunded debt are excluded from the consolidated balance sheets.

In accordance with GASB Statement No. 23, *Accounting and Financial Reporting for Refundings of Debt Reported by Proprietary Activities*, gains or losses resulting from debt refundings have been deferred and will be amortized over the lesser of the remaining life of the old debt or the life of the new debt.

At December 31, 2011 and 2010, the following amounts of MTA bonds, which have been refunded, remain valid debt instruments and are secured solely by and payable solely from their respective irrevocable trusts.

The above interest amounts include both fixed- and variable-rate calculations. The interest rate assumptions for variable rate bonds are as follows:

- *Transportation Revenue Refunding Bonds, Series 2002B* — 4.00% per annum
- *Transportation Revenue Refunding Bonds, Series 2002D* — 4.00% per annum on SubSeries 2002D-1 and 4.45% per annum on SubSeries 2002D-2 taking into account the interest rate swap
- *Transportation Revenue Refunding Bonds, Series 2002G-1* — 3.542% per annum taking into account the interest rate swap and 4.00% per annum on portions not covered by the interest rate swaps
- *Transportation Revenue Bonds, Series 2005D* — 3.561% per annum taking into account the interest rate swaps
- *Transportation Revenue Bonds, Series 2005E* — 3.561% per annum taking into account the interest rate swaps and 4.00% per annum on the unhedged portion
- *Transportation Revenue Bonds, Series 2005G* — 4.00% per annum
- *Transportation Revenue Bonds, Series 2008B* — 4.00% per annum, after the mandatory tender date
- *Transportation Revenue Bonds, Series 2011B* — 3.542% per annum taking into account the interest rate swaps and 4.00% per annum on portions not covered by the interest rate swaps
- *Dedicated Tax Fund Bonds, Series 2002B* — 4.06% per annum until September 1, 2013 based on the interest rate swap and 4.00% per annum thereafter

- *Dedicated Tax Fund Variable Rate Refunding Bonds, Series 2008A* — 3.3156% per annum on the hedged portion related to the interest rate swaps, and 4.00% per annum on the unhedged portion
- *Dedicated Tax Fund Variable Rate Refunding Bonds, Series 2008B* — 4.00% per annum
- *MTA Bridges and Tunnels Subordinate Refunding Bonds, Series 2000AB* — 6.08% per annum taking into account the interest rate swap
- *MTA Bridges and Tunnels Subordinate Refunding Bonds, Series 2000CD* — 6.07% per annum taking into account the interest rate swap
- *MTA Bridges and Tunnels General Revenue Refunding Bonds, Series 2001B and Series 2001C* — 5.777% per annum taking into account the interest rate swap and 4.00% per annum on portions not covered by the interest rate swap
- *MTA Bridges and Tunnels General Revenue Refunding Bonds, Series 2002F* — 5.404% and 3.076% per annum taking into account the interest rate swaps and 4% per annum on portions not covered by the interest rate swaps
- *MTA Bridges and Tunnels General Revenue Bonds, Series 2003B* — 3.076% and 6.07% per annum taking into account the interest rate swaps and 4.00% per annum on portions not covered by the interest rate swaps
- *MTA Bridges and Tunnels General Revenue Bonds, Series 2005A* — 3.542% and 3.076% per annum taking into account the interest rate swaps and 4.00% per annum on portions not covered by the interest rate swaps
- *MTA Bridges and Tunnels General Revenue Refunding Bonds, Series 2005B* — 3.513% per annum based on the Basis Risk Interest Rate Swap through January 1, 2012 and 3.076% per annum based on the Initial Interest Rate Swaps thereafter.
- *MTA Bridges and Tunnels General Revenue Bonds, Series 2008B* — 4.00% per annum, after the mandatory tender date
- *Certificates of Participation, Series 2004A* — 3.542% per annum taking into account the interest rate swaps

**Tax Rebate Liability** — Under the Internal Revenue Code of 1986, the MTA accrues a liability for an amount of rebateable arbitrage resulting from investing low-yielding, tax-exempt bond proceeds in higher-yielding, taxable securities. The arbitrage liability is payable to the federal government every five years. No payments were made during the years ended December 31, 2011 and 2010.

**Liquidity Facility** - MTA and MTA Bridges and Tunnels have entered into several Standby Bond Purchase Agreements (“SBPA”) and Letter of Credit Agreements (“LOC”) as listed on the table below. In addition, MTA executed a Continuing Covenants Agreement with Wells Fargo Bank N.A. for \$200 of Transportation Revenue Refunding Bonds, Subseries 2002D-2 set to expire on May 27, 2014.

Resolution	Series	Swap	Provider (Insurer)	Type of Facility	Type of Exp. Date

The fair value balances and notional amounts of derivative instruments outstanding at December 31, 2011, classified by type, and the changes in fair value of such derivative instruments from the year ended December 31, 2010 are as follows:

	Changes In Fair Value		Fair Value at December 31, 2011		Notional (in millions)
	Classification	Amount (in millions)	Classification	Amount (in millions)	
<b>Government activities</b>					
Cash Flow hedges:					
Pay-fixed interest rate swaps	Deferred outflow of resources	(\$288.740)	Debt	(\$530.202)	\$2,480.855
Forward starting swaps	Deferred outflow of resources	(70.869)	Debt	(100.347)	359.450
Basis swaps	Deferred outflow of resources	2.330	Debt	(0.323)	589.200
Swaption	Deferred outflow of resources	5.065	Debt	(80.975)	424.350
Investment hedges:					
Basis swaps	Investment Expense	\$0.776	Debt	(\$0.108)	\$196.400
Pay-fixed interest rate swaps	Investment Expense	24.088	Debt	(16.077)	117.125

For the year ended December 31, 2011, the MTA recorded \$25 as a gain related to the change in fair market value of certain investment swaps that are not accounted for as hedging activities.

For the year ended December 31, 2011, there were no derivative instruments reclassified from a hedging derivative instrument to an investment derivative instrument.

The summary above reflects a total number of twenty (20) Swap transactions reviewed for GASB Statement No. 53 Hedge Accounting treatment. Of the total number of Swaps, eighteen (18) hedges were evaluated as effective related to the methodology of Consistent Critical Terms and Quantitative Methods and two (2) were evaluated as ineffective.

In regard to the Consistent Critical Terms method, if the critical terms of the potential hedging derivative instrument and the terms of the item it is hedging are essentially same, then the potential hedging derivative instrument is presumed to be effective. Under such circumstances, any changes in the cash flows or fair value of the item being hedged is offset by changes in the cash flows or fair value of the potential hedging derivative. The three (3) hedges were deemed effective using this methodology.

For fifteen (15) hedging relationships, the Regression Method was utilized to determine effectiveness.

For a potential hedging derivative instrument to be considered effective using the Regression Method, the regression analysis must meet the following criteria:

- an R-squared of a range at least 0.80;
- an F-statistic that indicates statistical significance at the 95% confidence level; and
- a regression coefficient for the slope between -1.25 and -0.80

In accordance with GASB Statement No. 53, four of the hedging swaps are classified as swaptions for which premiums were received by MTA Bridges and Tunnel at contracts inception as shown in the Table below. MTA Bridges and Tunnel have followed the relevant accounting required treatment and are amortizing the premiums over the life of the swap agreement.

<b>Bond Resolution</b>	<b>Series</b>	<b>Premium</b>	<b>Date of the Swaption Contract</b>	<b>Premium Payment Date</b>
MTA Bridges & Tunnels-Senior	2001B & 2001C	\$19,204,000	2/24/1999	3/10/1999
MTA Bridges & Tunnels-Senior	2002F (old 2002C)	\$8,400,000	2/24/1999	3/10/1999
MTA Bridges & Tunnels-Subordinate	2000AB	\$22,740,000	8/12/1998	8/25/1998
MTA Bridges & Tunnels-Subordinate	2000CD	\$22,740,000	8/12/1998	8/25/1998
<b>Total</b>		<b>\$73,084,000</b>		

### **Swap Agreements Relating to Synthetic Fixed Rate Debt**

*Board-adopted Guidelines* — The Related Entities adopted guidelines governing the use of swap contracts to manage the interest rate exposure of their debt. The Guidelines establish specific requirements that must be satisfied for a Related Entity to enter into a swap contract, such as suggested swap terms and objectives, credit ratings of the counterparties, collateralization requirements and reporting requirements.

*Objectives of the Swaps* — In order to protect against the potential of rising interest rates, to achieve a lower net cost of borrowing, to reduce exposure to changing interest rates on a related bond issue, or, in some cases where Federal tax law prohibits an advance refunding, to achieve debt service savings through a synthetic fixed rate, MTA, MTA Bridges and Tunnels and MTA New York City Transit have entered into separate pay-fixed, receive-variable interest rate swaps at a cost anticipated to be less than what MTA, MTA Bridges and Tunnels and MTA New York City Transit would have paid to issue fixed-rate debt.

*Fair Value* — On December 31, 2011, long-term interest rates were lower than at the time of swaps execution, and consequently, the swaps had negative fair values. A negative fair value means that MTA, MTA Bridges and Tunnels and/or MTA New York City Transit would have to pay the counterparty that approximate amount to terminate the swap. In the event there is a positive fair value MTA, MTA Bridges and Tunnels and/or MTA New York City Transit would be exposed to the credit risk of the counterparties.

The fair values listed in the following tables represent the theoretical cost to terminate the swap as of the date indicated, assuming that a termination event occurred on that date. The fair values were estimated using the zero-coupon method. This method calculates the future net settlement payments required by the swap, assuming that the current forward rates implied by the yield curve correctly anticipate future spot interest rates. These payments are then discounted using the spot rates implied by the current yield curve for hypothetical zero-coupon bond due on the date of each future net settlement on the swap. See “Termination Risk” below.

*Terms and Fair Values* — The terms, fair values and counterparties of the outstanding swaps of MTA and MTA Bridges and Tunnels, as well as the swaps entered into in connection with the 2 Broadway Certificates of Participation refunding, are reflected in the following tables. The MTA swaps are reflected in separate tables for the Transportation Revenue Bonds and Dedicated Tax Fund Bonds. The MTA Bridges and Tunnels swaps are reflected in separate tables for the senior lien and subordinate revenue bonds.

MTA TRANSPORTATION REVENUE BONDS							
Associated Bond Issue	Notional Amounts as of 12/31/11 (in millions)	Effective Date	Fixed Rate Paid	Variable Rate Received	Fair Values as of 12/31/11 (in millions)	Swap Termination Date	Counterparty

Total	\$1,166.365				\$ (344.638)		

(1) London Interbank Offered Rate.

(2) On November 28, 2011, MTA Variable Rate Certificates of Participation, Series 2004A associated with the swap in connection with Series 2004A Bonds, were redeemed. Notional amounts from the Series 2004A swap were reassigned to MTA Transportation Revenue Variable Rate Bonds, Series 2002G-1 and Series 2011B; and MTA Bridges and Tunnels General Revenue Variable Rate Bonds, Series 2005A.

(3) Under the Series 2012 swaps, JPMorgan Chase Bank, NA has an option to cancel the swaps on June 15, 2012 prior to the effective date listed above. In the event the swap is canceled, JPMorgan Chase Bank, NA is required to make monthly cancellation payments to the MTA commencing on December 1, 2012 and ending on November 1, 2032.

Series 2000CD <sup>(14)</sup>	100.850	01/01/01	6.070	SIFMA <sup>(4)</sup> minus 15 basis points <sup>(15)</sup>	(21.222)	01/01/19	Citigroup Financial Products Inc.
Total	\$247.050				\$ (51.274)		

(10) On April 9, 2009, \$50 of MTA Bridges and Tunnels Subordinate Revenue Bonds, Series 2000CD has been refunded. A portion of the swap associated with the aforementioned bonds has been reassigned to MTA Bridges and Tunnels General Revenue Variable Rate Bonds, Series 2003B.

(11) For the purpose of mitigating the basis risk during the escrow period with respect to the \$797.2 notional amount swaps entered into in connection with the Series 2005B Bonds, MTA Bridges and Tunnels will pay 67% of one-month LIBOR plus 43.7 basis points to the UBS AG and receive a variable rate equal to the SIFMA Index minus 10 basis points.

(12) In accordance with a swaption entered into on February 24, 1999 with each Counterparty, and then amended and restated as of October 1, 2008, Citigroup Financial Products Inc. declared that an Alternative Floating Rate Event occurred on December 1, 2008 and as a result, the calculation for the Variable rate MTA Bridges and Tunnels to received was changed from the Actual Bond Rate to SIFMA Municipal Swap Index minus 15 basis points.

(13) In accordance with a swaption entered into on August 12, 1998 with each Counterparty paying to MTA Bridges and Tunnels a premium of \$22,740,000.

(14) On April 9, 2009, \$50 of MTA Bridges and Tunnels Subordinate Revenue Bonds, Series 2000CD has been refunded. A portion of the swap associated with the aforementioned bonds has been reassigned to MTA Bridges and Tunnels General Revenue Variable Rate Bonds, Series 2003B.

(15) In accordance with the swaption entered into on August 12, 1998, Citigroup Financial Products Inc. declared that an Alternative Floating Rate Event occurred on November 5, 2008 and as a result, the calculation for the Variable Rate MTA Bridges and Tunnels is to receive was changed from the Actual Bond Rate to SIFMA Municipal Swap Index minus 15 basis points. The Alternate Floating Rate Event was triggered due to the purchase without resale of Series 2000CD bonds by the liquidity provider, Lloyds TS

## **2 Broadway Certificates of Participation Swaps**

In addition to the foregoing, MTA, MTA New York City Transit and MTA Bridges and Tunnels entered into separate ISDA Master Agreements with UBS AG relating to the \$357.925 Variable Rate Certificates of Participation, Series 2004A (Auction Rate Securities) in connection with the refunding of certain certificates of participation originally executed to fund certain improvements to the office building located at 2 Broadway in Manhattan. The 2 Broadway swaps have (1) an effective date of September 22, 2004, (2) a fixed rate paid of 3.092%, (3) a variable rate received of the lesser of (a) the actual bond rate, or (b) 67% of one-month LIBOR minus 45 basis points, and (4) a termination date of January 1, 2030.

On November 28, 2011, certain portions of these swaps were re-associated with other floating rate bonds, including the MTA Bridges and Tunnels General Revenue Bonds, Series 2005A and the Transportation Revenue Bonds Series 2002G-1 and Series 2011B. The portion remaining that is still associated with the 2004A Certificates of Participation is \$117.125 as of December 31, 2011, of which MTA New York City Transit is responsible for \$80.450, MTA for \$24.585, and MTA Bridges and Tunnels for \$12.090. As of December 31, 2011, the fair value of the remaining portion associated with the 2004A COPs was (\$16.077).

### **Counterparty Ratings**

The current ratings of the counterparties are as follows as of December 31, 2011:

Counterparty	Ratings of the Counterparty or its Credit Support Provider		
	S&P	Moody's	Fitch
AIG Financial Products Corp.	A-	Baa1	BBB
Ambac Financial Services, L.P.	NR	WR	NR
Bank of New York Mellon	AA-	Aaa	AA-
BNP Paribas North America, Inc.	AA-	Aa3	A+
Citibank, N.A.	A	A1	A
Citigroup Financial Products Inc.	A-	A3	A
JPMorgan Chase Bank, NA	A+	Aa1	AA-
Morgan Stanley Capital Services Inc.	A-	A2	A
UBS AG	A	Aa3	A

Except as set forth below, the notional amounts of the swaps match the principal amounts of the associated bonds. The following table sets forth the notional amount and the outstanding principal amount as of December 31, 2011 for the swap where the notional amount does not match the outstanding principal amount of the associated bonds.

<b>Associated Bond Issue</b>	<b>Principal Amount of Bonds (in millions)</b>	<b>Notional Amount (in millions)</b>
MTA Bridges and Tunnels General Revenue Variable Rate Refunding Bonds, Series 2001B and 2001C	\$238.140	\$177.300
MTA Bridges and Tunnels General Revenue Variable Rate Refunding Bonds, Series 2002F	\$216.400	\$222.900
MTA Bridges and Tunnels General Revenue Variable Rate Bonds, Series 2003B	\$206.190	\$59.550
MTA Bridges and Tunnels General Revenue Variable Rate Bonds, Series 2005A	\$132.770	\$23.760
MTA Dedicated Tax Fund Variable Rate Refunding Bonds, Series 2008A	\$347.715	\$338.530
MTA Transportation Revenue Variable Rate Bonds, Series 2005E	\$250.000	\$150.000
MTA Transportation Revenue Variable Rate Bonds, Series 2011B	\$99.560	\$6.915

Except as discussed below under the heading “*Rollover Risk*,” the swap agreements contain scheduled reductions to outstanding notional amounts that are expected to approximately follow scheduled or anticipated reductions in the principal amount of the associated bonds.

### **Risks Associated with the Swap Agreements**

From MTA’s, MTA Bridges and Tunnels’ and MTA New York City Transit’s perspective, the following risks are generally associated with swap agreements:

- Credit Risk – The counterparty becomes insolvent or is otherwise not be able to perform its financial obligations. In the event of deterioration in the credit ratings of the counterparty or MTA/MTA Bridges and Tunnels/MTA New York City Transit, the swap agreement may require that collateral be posted to secure the party’s obligations under the swap agreement. See “*Collateralization*” below. Further, ratings deterioration by either party below levels agreed to in each transaction could result in a termination event requiring a cash settlement of the future value of the transaction. See “*Termination Risk*” below.
- Basis Risk – The variable interest rate paid by the counterparty under the swap and the variable interest rate paid by MTA, MTA Bridges and Tunnels or MTA New York City Transit on the associated bonds may not be the same. If the counterparty’s rate under the swap is lower than the bond interest rate, then the counterparty’s payment under the swap agreement does not fully reimburse MTA, MTA Bridges and Tunnels or MTA New York City Transit for its interest payment on the associated bonds. Conversely, if the bond interest rate is lower than the counterparty’s rate on the swap, there is a net benefit to MTA, MTA Bridges and Tunnels or MTA New York City Transit.
- Termination Risk – The swap agreement will be terminated and MTA, MTA Bridges and Tunnels or MTA New York City Transit will be required to make a termination payment to the counterparty and, in the case of a swap agreement which was entered into for the purpose of creating a synthetic fixed rate for an advance refunding transaction may also be required to take action to protect the tax exempt status of the related refunding bonds.

- Rollover Risk – The notional amount under the swap agreement terminates prior to the final maturity of the associated bonds on a variable rate bond issuance, and MTA, MTA Bridges and Tunnels or MTA New York City Transit may be exposed to then market rates and cease to receive the benefit of the synthetic fixed rate for the duration of the bond issue.

*Credit Risk.* The following table shows, as of December 31, 2011, the diversification, by percentage of notional amount, among the various counterparties that have entered into ISDA Master Agreements with MTA and/or MTA Bridges and Tunnels, or in connection with the 2 Broadway Certificates of Participation refunding. The notional amount totals below include all five swaps (including the UBS basis risk swap) in connection with the MTA Bridges and Tunnels General Revenue Variable Rate Refunding Bonds, Series 2005B. The counterparties have the ratings set forth above.

Counterparty	Notional Amount (in thousands)	% of Total Notional Amount
UBS AG	\$1,629,800	39.11%
JPMorgan Chase Bank, NA	902,050	21.65
Morgan Stanley Capital Services Inc.	440,000	10.56
The Bank of New York Mellon	338,530	8.12
Citigroup Financial Products Inc.	323,500	7.76
Citibank, N.A.	196,400	4.71
BNP Paribas North America, Inc.	196,400	4.71
AIG Financial Products Corp.	100,000	2.40
Ambac Financial Services, L.P.	40,700	0.98
Total	\$4,167,380	100.00%

The ISDA Master Agreements entered into with the following counterparties provide that the payments under one transaction will be netted against other transactions entered into under the same ISDA Master Agreement:

- JPMorgan Chase Bank, NA with respect to the MTA Bridges and Tunnels Subordinate Revenue Variable Rate Refunding Bonds, Series 2000AB,
- Citigroup Financial Products Inc. with respect to the MTA Bridges and Tunnels Subordinate Revenue Variable Rate Refunding Bonds, Series 2000CD,
- Citigroup Financial Products Inc. with respect to the MTA Bridges and Tunnels General Revenue Variable Rate Refunding Bonds, Series 2001B and 2001C, and
- Ambac Financial Services, L.P. with respect to the MTA Bridges and Tunnels General Revenue Variable Rate Refunding Bonds, Series 2002F (currently only one transaction outstanding under that Master Agreement),
- JPMorgan Chase Bank, NA with respect to the MTA Transportation Revenue Variable Rate Refunding Bonds, Series 2002D-2 and Series 2012.

Under the terms of these agreements, should one party become insolvent or otherwise default on its obligations, close-out netting provisions permit the nondefaulting party to accelerate and terminate all outstanding transactions and net the transactions' fair values so that a single sum will be owed by, or owed to, the nondefaulting party.

The fair market value of MTA's interest rate swaps changes daily primarily as a result of capital markets changes. Factors that influence LIBOR are interest rates, banks expectations of future rate movements,

liquidity in the capital markets or changes in the value of the dollar. The relative financial health of MTA's counterparties do not directly impact the fair market value of the transaction.

*Collateralization.* Generally, the Credit Support Annex attached to the ISDA Master Agreement requires that if the outstanding ratings of MTA, MTA Bridges and Tunnels or MTA New York City Transit, as the case may be, or the counterparty falls to a certain level, the party whose rating falls is required to post collateral with a third-party custodian to secure its termination payments above certain threshold valuation amounts. Collateral must be cash or U.S. government or certain Federal agency securities.

The following tables set forth the ratings criteria and threshold amounts relating to the posting of collateral set forth for MTA, MTA Bridges and Tunnels or MTA New York City Transit, as the case may be, and the counterparty for each swap agreement. In most cases, the Counterparty does not have a Fitch rating on its long-term unsecured debt, so that criteria would not be applicable in determining if the Counterparty is required to post collateral.

MTA Transportation Revenue Bonds		
Associated Bond Issue	If the highest rating of the related MTA bonds or the counterparty's long-term unsecured debt falls to	Then the downgraded party must post collateral if its estimated termination payments are in excess of

Series 2000AB	N/A – Because MTA Bridges and Tunnels' swap payments are insured, MTA Bridges and Tunnels is not required to post collateral, but JP Morgan Chase Bank is required to post collateral if its estimated termination payments are in excess of \$1,000,000.	
Series 2000CD and Series 2003B <sup>(1)</sup> (swap with Citigroup Financial Products Inc.)	N/A – Because MTA Bridges and Tunnels' swap payments are insured, MTA Bridges and Tunnels is not required to post collateral, but Citigroup Financial Products Inc. is required to post collateral if its estimated termination payments are in excess of \$1,000,000.	

(1) MTA Bridges and Tunnels Senior Lien bond.

Notwithstanding the foregoing, in the event any downgraded party is responsible for an event of default or potential event of default as defined in the ISDA Master Agreement, the downgraded party must immediately collateralize its obligations irrespective of the threshold amounts.

Under each MTA and MTA Bridges and Tunnels bond resolution, the payments relating to debt service on the swaps are parity obligations with the associated bonds, as well as all other bonds issued under that bond resolution, but all other payments, including the termination payments, are subordinate to the payment of debt service on the swap and all bonds issued under that bond resolution. In addition, MTA and MTA Bridges and Tunnels have structured each of the swaps (other than the 2 Broadway swaps) in a manner that will permit MTA or MTA Bridges and Tunnels to bond the termination payments under any available bond resolution.

The payments relating to debt service on the 2 Broadway swaps are parity obligations with respect to the sublease payments under the 2 Broadway Certificates of Participation, payable solely from available transportation revenues after the payment of the MTA's transportation revenue bonds and additional parity and subordinate bonds. All other payments, including the termination payments, are payable from substantially the same pool of available transportation revenues after the payment of the MTA's transportation revenue bonds and additional parity and subordinate bonds.

The ISDA Master Agreement sets forth certain termination events applicable to all swaps entered into by the parties to that ISDA Master Agreement. MTA, MTA Bridges and Tunnels and MTA New York City Transit have entered into separate ISDA Master Agreements with each counterparty that governs the terms of each swap with that counterparty, subject to individual terms negotiated in a confirmation.

The following table sets forth, for each swap, the additional termination events for the following associated bond issues. In certain swaps, where the counterparty has a guarantor of its obligations, the ratings criteria apply to the guarantor and not to the counterparty.

MTA Transportation Revenue	
Associated Bond Issue	Additional Termination Event(s)
Series 2002D-2, Series 2005D and Series 2005E	The ratings by S&P and Moody's of the Counterparty or the MTA Transportation Revenue Bonds falls below "BBB-" and "Baa3," respectively, or are withdrawn.
Series 2002G-1 and Series 2011B	See 2 Broadway Certificates of Participation, Series 2004A
Series 2012	The ratings by S&P and Moody's of the Counterparty or the MTA Transportation Revenue Bonds falls below "BBB-" and "Baa3," respectively, or are withdrawn.

MTA Dedicated Tax Fund	
Associated Bond Issue	Additional Termination Event(s)
Series 2002B	The ratings by S&P and Fitch of the Counterparty or the MTA Dedicated Tax Fund Bonds fall below "BBB-" or are withdrawn.
Series 2008A	The ratings by S&P or Moody's of the Counterparty fall below "BBB+" or "Baa1," respectively, or the ratings of S&P or Fitch with respect to the MTA Dedicated Tax Fund Bonds falls below "BBB" or, in either case the ratings are withdrawn.

2 Broadway Certificates of Participation		
Associated Bond Issue	Counterparty	Additional Termination Event(s)
Series 2004A	UBS AG	Negative financial events relating to the swap insurer, Ambac Assurance Corporation.

MTA Bridges and Tunnels Senior and Subordinate Revenue	
Associated Bond Issue	Additional Termination Events
<b>Senior Lien Revenue Bonds</b>	
Series 2001B and 2001C and Series 2002F (swap with Ambac Financial Services, L.P.)	<p>1. MTA Bridges and Tunnels can elect to terminate the swap relating to that Series on 10 Business Days' notice if the Series of Bonds are converted to a fixed rate, the fixed rate on the converted Bonds is less than the fixed rate on the swap and MTA Bridges and Tunnels demonstrates its ability to make the termination payments, <u>or</u> MTA Bridges and Tunnels redeems a portion of the Series of Bonds and demonstrates its ability to make the termination payments.</p> <p>2. Negative financial events relating to the related swap insurer, Ambac Assurance Corporation in case of the swap associated with Series 2002F only.</p>
Series 2005A	See 2 Broadway Certificates of Participation, Series 2004A
Series 2005B interest rate swap and basis risk swap, Series 2002 F (swap with Citibank, N.A.) and Series 2003 B (swap with Citibank, N.A.)	The ratings by S&P or Moody's of the Counterparty fall below "BBB+" or "Baa1," respectively, or the ratings of S&P or Moody's with respect to the MTA Bridges and Tunnels Senior Lien Revenue Bonds falls below "BBB" or "Baa2," respectively, or , in either case the ratings are withdrawn.
<b>Subordinate Revenue Bonds</b>	
Series 2000AB and 2000CD and Series 2003B <sup>(1)</sup> (swap with Citigroup Financial Products Inc.)	<p>1. MTA Bridges and Tunnels can elect to terminate the swap relating to that Series on 10 Business Days' notice if the Series of Bonds are converted to a fixed rate, the fixed rate on the converted Bonds is less than the fixed rate on the swap and MTA Bridges and Tunnels demonstrates its ability to make the termination payments, <u>or</u> MTA Bridges and Tunnels redeems a portion of the Series of Bonds and demonstrates its ability to make the termination payments.</p> <p>2. Negative financial events relating to the related swap insurer, Financial Security Assurance Inc.</p>

<sup>(1)</sup>MTA Bridges and Tunnels Senior Lien bond.

*Rollover Risk.* MTA and MTA Bridges and Tunnels are exposed to rollover risk on swaps that mature or may be terminated prior to the maturity of the associated debt. When these swaps terminate, MTA or MTA Bridges and Tunnels may not realize the synthetic fixed rate offered by the swaps on the underlying debt issues. The following debt is exposed to rollover risk:

<b>Associated Bond Issue</b>	<b>Bond Maturity Date</b>	<b>Swap Termination Date</b>
MTA Dedicated Tax Fund Variable Rate Bonds, Series 2002B	November 1, 2022	September 1, 2013
MTA Bridges and Tunnels General Revenue Variable Rate Refunding Bonds, Series 2001B and 2001C	January 1, 2032	January 1, 2019
MTA Bridges and Tunnels General Revenue Variable Rate Refunding Bonds, Series 2002F (swap with Ambac Financial Services, L.P.)	November 1, 2032	January 1, 2013
MTA Bridges and Tunnels General Revenue Variable Rate Refunding Bonds, Series 2002F (swap with Citibank, N.A.)	November 1, 2032	January 1, 2032
MTA Bridges and Tunnels General Revenue Variable Rate Bonds, Series 2003B (swap with Citibank, N.A.)	January 1, 2033	January 1, 2032
MTA Transportation Revenue Variable Rate Bonds, Series 2011B	November 1, 2041	January 1, 2030
MTA Transportation Revenue Variable Rate Bonds, Series 2002G-1	November 1, 2026	January 1, 2026
MTA Bridges and Tunnels General Revenue Variable Rate Bonds, Series 2005A	November 1, 2035	January 1, 2030

*Swap payments and Associated Debt.* The following tables contain the aggregate amount of estimated variable-rate bond debt service and net swap payments during certain years that such swaps were entered into in order to: protect against the potential of rising interest rates; achieve a lower net cost of borrowing; reduce exposure to changing interest rates on a related bond issue; or, in some cases where Federal tax law prohibits an advance refunding, achieve debt service savings through a synthetic fixed rate. As rates vary, variable-rate bond interest payments and net swap payments will vary. Using the following assumptions, debt service requirements of MTA's and MTA Bridges and Tunnel's outstanding variable-rate debt and net swap payments are estimated to be as follows:

- It is assumed that the variable-rate bonds would bear interest at a rate of 4.0% per annum.
- The net swap payments were calculated using the actual fixed interest rate on the swap agreements.

MTA (in millions)				
Year Ended/Ending December 31	Variable-Rate Bonds		Net Swap Payments	Total
	Principal	Interest		
2011	\$ 2.0	\$ 59.5	\$ (2.9)	\$ 58.5
2012	2.0	59.4	(2.9)	58.5
2013	2.1	59.3	(3.0)	58.5
2014	43.1	59.0	(3.1)	98.9
2015-2019	325.6	263.8	(15.2)	574.3
2020-2024	373.4	186.2	(11.7)	547.8
2025-2029	299.9	124.6	(5.4)	419.1
2030-2034	403.5	45.8	(1.0)	448.2
2035	36.2	1.2	(0.1)	37.2

MTA Bridges and Tunnels (in millions)				
Year Ended/Ending December 31	Variable-Rate Bonds		Net Swap Payments	Total
	Principal	Interest		
2011	\$ 49.5	\$ 65.6	\$ 2.5	117.7

## 8. LEASE TRANSACTIONS

**Leveraged Lease Transactions: Subway Cars** — During 1995, MTA Bridges and Tunnels entered into a sale/leaseback transaction with a third party whereby MTA Bridges and Tunnels sold certain subway cars, which were contributed by MTA New York City Transit, for net proceeds of \$84.2. These cars were subsequently leased back by MTA Bridges and Tunnels under a capital lease. The deferred credit of \$34.2 was netted against the carrying value of the leased assets, and the assets were recontributed to the MTA New York City Transit. MTA Bridges and Tunnels transferred \$5.5 to the MTA, representing the net economic benefit of the transaction. The remaining proceeds, equal to the net present value of the lease obligation, of which \$71.3 was placed in an irrevocable deposit account at ABN AMRO Bank N.V. and \$7.5 was invested in U.S. Treasury Strips. The estimated yields and maturities of the deposit account and the Treasury Strips are expected to be sufficient to meet all of the regularly scheduled obligations under the lease as they become due, including the purchase option, if exercised. The capital lease obligation is included in other long-term liabilities. At the end of the lease term MTA Bridges and Tunnels has the option to purchase the subway cars for approximately \$106, which amount has been reflected in the net present value of the lease obligation, or to make a lease termination payment of approximately \$89.

**Leveraged Lease Transactions: Hillside Facility** — On March 31, 1997, the MTA entered into a lease/leaseback transaction with a third party whereby the MTA leased MTA Long Island Rail Road's Hillside maintenance facility to the third party. The term of the lease is 22 years, and the third party has the right to renew for a further 21.5 year term. The facility was subsequently subleased back to the MTA as a capital lease, and sub-subleased by the MTA to MTA Long Island Rail Road.

Under the terms of the lease/leaseback agreement, the MTA initially received \$314, which was utilized as follows. The MTA paid \$266 to Coöperatieve Centrale Raiffeisen-Boerenleenbank B.A. (Rabobank Nederland), an affiliate of the third party's lender, which has the obligation to pay to the MTA an amount equal to the rent obligations under the sublease attributable to the debt service on the loan from the third party's lender. The MTA used \$21 to purchase Treasury securities, which are pledged as collateral to the third party. The value at maturity of these Treasury securities, together with the proceeds from the aforementioned obligation of Coöperatieve Centrale Raiffeisen-Boerenleenbank B.A., is sufficient to pay all of the regularly scheduled rent obligations, including the cost of purchasing the third party's remaining rights at the end of the 22-year sublease period, if the related purchase option is exercised. A further \$0.6 was used to pay for legal and other costs of the transaction, and \$3 was used to pay the first rental

payment under the sublease. A further \$23 is the MTA's net benefit from the transaction, representing consideration for the tax benefits. MTA Bridges and Tunnels has entered into a guarantee with the third party that the sublease payments will be made. At December 31, 2011, the MTA has recorded a long-term capital obligation and capital asset of \$264 arising from the transaction.

**Leveraged Lease Transactions: Subway and Rail Cars** — On December 12, 1997, the MTA entered into two lease/leaseback transactions whereby the MTA leased certain of MTA Metro-North Railroad's rail cars to a third party and MTA New York City Transit leased certain subway maintenance cars to the same third party. MTA exercised the purchase option on the first tranche of the lease related to MTA Metro-North Railroad assets. The final installment of the purchase price was paid in December 2009.

The remaining lease tranches related to MTA Metro-North Railroad assets expire in 2013 and 2014, depending on the asset, and the lease for MTA New York City Transit's subway maintenance cars expires in 2013.

The third party has the right to renew the lease for an additional period of 12 years for MTA Metro-North Railroad cars, and a further 12 years for MTA New York City Transit's subway maintenance cars. The cars were subsequently subleased back to the MTA as a capital lease, and sub-subleased by the MTA to MTA Metro-North Railroad and MTA New York City Transit, respectively.

Under the terms of these lease/leaseback agreements, the MTA initially received \$76.6, which was utilized as follows: The MTA paid \$59.8 to an affiliate of the third party's lender, which has the obligation to pay to the MTA an amount equal to the rent obligations under the sublease attributable to the debt service on the loan from the third party's lender. The obligations of the affiliate of the third party's lender are guaranteed by American International Group, Inc. The MTA used \$12.5 to purchase a Letter of Credit from an affiliate of the third party's lender, guaranteed by American International Group, Inc. The payments to the MTA under the Letter of Credit, together with the aforementioned payments from the affiliate of the third party's lender, are sufficient to pay all of the regularly scheduled rent obligations, including the cost of purchasing the third party's remaining rights at the end of the sublease period if the related purchase options are exercised. At December 31, 2011, the MTA has recorded a long-term capital obligation and capital asset of \$30 arising from the transaction.

As a result of the downgrade of American International Group, Inc., the guarantor of the Letter of Credit, the provider of the Letter of Credit was required to pledge, and has pledged, collateral in the form of securities issued or guaranteed by the U.S. Government, including U.S. Treasury obligations and any other obligations the timely payment of principal of, and interest on, which are guaranteed by the U.S. Government and bonds, notes, debentures, obligations or other evidence of indebtedness issued and/or guaranteed by Federal National Mortgage Association, Federal Home Loan Mortgage Corporation, Government National Mortgage Association or any other agency or instrumentality of the United States of America which are rated AAA by Standard & Poor's, which collateral has a market value in excess of the accreted value of its obligations. In the event of a failure of the obligor under the Letter of Credit and American International Group, Inc., as guarantor of such obligations, to perform, the transaction documents are structured to provide recourse to the securities that have been pledged as collateral for such obligations.

MTA has pledged additional collateral in the amount of \$3 to cover the difference between the market value of the collateral provided by American International Group, Inc. and the nominal amount of the sum of MTA's rent payments plus the optional purchase option payments. As American International Group, Inc. increases the value of its collateral during the period through the remaining purchase option dates in 2013 and 2014, the MTA collateral can be released to MTA in an equivalent amount until MTA has no further collateralization obligation.

**Leveraged Lease Transactions: Subway Cars** — On September 25, 2002 and December 17, 2002 the MTA entered into four sale/leaseback transactions whereby MTA New York City Transit transferred ownership of certain MTA New York City Transit subway cars to the MTA, the MTA sold those cars to third parties, and the MTA leased those cars back from such third parties. The MTA subleased the cars to MTA New York City Transit. The four leases expire in 2032, 2034, 2033, and 2033, respectively. At the lease expiration, the MTA has the option of either exercising a fixed price purchase option for the cars or returning the cars to the third party owner.

Under the terms of the sale/leaseback agreements, the MTA initially received \$1,514.9, which was utilized as follows: The MTA paid \$1,058.6 to affiliates of certain of the lenders to the third parties, which affiliates have the obligation to pay to the MTA an amount equal to the rent obligations under the leases attributable to the debt service on the related loans. The obligations of the affiliate of the third parties' lenders are guaranteed by Financial Security Assurance, Inc. The MTA also purchased Freddie Mac, FNMA, and U.S. Treasury debt securities in amounts and with maturities, which are sufficient to make the lease rent payments equal to the debt service on the loans from the other lenders to the third parties. In the case of one of the four leases, MTAHQ also purchased Freddie Mac debt securities, the value of which at maturity, together with the aforementioned payment from the affiliate of the third party lender and the value at maturity of the Freddie Mac securities that were purchased to provide sufficient funds to make the lease rent payments equal to the debt service on the loan from the other lender to the third party, are sufficient to pay all regularly scheduled rent obligations, including the cost of purchasing the third party's remaining rights at the end of the sublease period if the related purchase options are exercised. In the case of the other three leases, the MTA entered into Equity Payment Agreements with FSA Capital Markets Services LLC (which are guaranteed by Financial Security Assurance, Inc.) whereby that entity has the obligation to provide to the MTA the amounts necessary, together with the aforementioned payments from the affiliate of the third parties' lender and the value at maturity of the Freddie Mac, FNMA, and U.S. Treasury debt securities that were purchased to provide sufficient funds to make the lease rent payments equal to the debt service on the loan from the other lenders to the third parties, are sufficient to pay all regularly scheduled rent obligations, including the cost of exercising the respective fixed price purchase options, if such purchase options are exercised. In two of the three leases in which FSA Capital Markets Services LLC is the obligor under the Equity Payment Agreements, FSA Capital Markets Services LLC is required to pledge, and has pledged, collateral in the form of securities issued or guaranteed by the United States Government, including United States Treasury obligations, publicly traded U.S. Treasury Strips, Government National Mortgage Association obligations and any other obligations the timely payment of principal and interest of which are guaranteed by the United States Government, and bonds, notes, debentures, obligations or other evidence of indebtedness issued and/or guaranteed by Federal National Mortgage Association, Federal Home Loan Mortgage Corporation or any agency or instrumentality of the United States of America, which collateral has a market value in excess of the accreted value of its obligations.

In the event of a failure to perform by FSA Capital Markets Services LLC as obligor under the Equity Payment Agreements in the three leases, and Financial Security Assurance, Inc., as guarantor of such obligations, the transaction documents for the two leases in which such obligations are collateralized are structured to provide recourse to the securities that have been pledged as collateral for such obligations. The accreted value of the Equity Payment Agreement in the transaction in which the obligation of FSA Capital Markets Services LLC, as obligor, and Financial Security Assurance, Inc., as guarantor, is uncollateralized was \$11.00 at December 31, 2011.

The amount remaining after payment of transaction expenses, \$96.2, was the MTA's net benefit from these four transactions.

**Leveraged Lease Transactions: Qualified Technological Equipment** — On December 19, 2002, the MTA entered into four sale/leaseback transactions whereby MTA New York City Transit transferred ownership of certain MTA New York City Transit qualified technological equipment (“QTE”) relating to the MTA New York City Transit automated fare collection system to the MTA. The MTA sold that equipment to third parties and the MTA leased that equipment back from such third parties. The MTA subleased the equipment to MTA New York City Transit. The four leases expire in 2022, 2020, 2022, and 2020, respectively. At the lease expiration, the MTA has the option of either exercising a fixed-price purchase option for the equipment or returning the equipment to the third-party owner.

Under the terms of the sale/leaseback agreements the MTA initially received \$507.4, which was utilized as follows: The MTA paid \$316.2 to affiliates of certain of the lenders to the third parties, which affiliates have the obligation to pay to MTA an amount equal to the rent obligations under the leases attributable to the debt service on the loan from certain of the third parties’ lenders. The MTA also purchased FNMA and U.S. Treasury debt securities in amounts and with maturities which are sufficient to make the lease rent payments equal to the debt service on the loans from the other lenders to the third parties. In the case of three of the four leases, the MTA also purchased U.S. Treasury debt securities in amounts and with maturities, which are expected to be sufficient to pay the remainder of the regularly scheduled lease rent payments under those leases and the purchase price due upon exercise by the MTA of the related purchase options if exercised. In the case of the other lease, the MTA entered into an Equity Payment Undertaking Agreement with XL Insurance (Bermuda) Ltd. (which was guaranteed by XL Financial Assurance Ltd.) whereby that entity had the obligation to provide to the MTA the amounts necessary to make the remainder of the equity portion of the basic lease rent payments under that lease and to pay the equity portion of the purchase price due upon exercise by the MTA of the purchase option if exercised. The amount remaining after payment of transaction expenses, \$57.6, was the MTA’s net benefit from these four transactions. As consideration for the cooperation of the City of New York in these transactions, including the transfer of any property interests held by the City on such equipment to MTA New York City Transit and the MTA, the MTA is obligated to pay to the City 24.11% of the net benefit received from these four QTE transactions. At December 31, 2011, the MTA had paid the City of New York \$13.7.

On February 7, 2008, the MTA learned that XL Insurance (Bermuda) Ltd. was downgraded to a level that under the applicable transaction documents required the MTA to replace the Equity Payment Undertaking Agreement with other permitted collateral. On May 2, 2008, the MTA entered into a termination agreement that terminated the QTE transaction in which the XL Insurance (Bermuda) Ltd. Equity Payment Undertaking Agreement served as equity collateral. In connection with such termination, the MTA transferred to the lessor in that transaction U.S. Treasury debt obligations, having a cost of approximately \$75, which obligations were substantially similar in amount and payment terms to the XL Insurance (Bermuda) Ltd. Equity Payment Undertaking Agreement. The MTA subsequently entered into an agreement with XL Insurance (Bermuda) Ltd. to terminate the XL Insurance (Bermuda) Ltd. Equity Payment Undertaking Agreement and XL Insurance (Bermuda) Ltd. paid the MTA \$61.

On September 16, 2008, the MTA learned that American International Group, Inc. was downgraded to a level that under the transaction documents for two of the remaining three QTE leases required the MTA to replace the applicable Equity Credit Default Option Agreement provided by AIG Financial Products Corp. and guaranteed by American International Group, Inc. MTA terminated those two leases in January, 2009 pursuant to early termination agreements with the equity investor. The MTA achieved a net gain of approximately \$3 as a result of such terminations.

**Leveraged Lease Transaction: Subway Cars** — On September 3, 2003, the MTA entered into a sale/leaseback transaction whereby MTA New York City Transit transferred ownership of certain MTA

New York City Transit subway cars to the MTA, the MTA sold those cars to a third party, and the MTA leased those cars back from such third party. The MTA subleased the cars to MTA New York City Transit. The lease expires in 2033. At the lease expiration, the MTA has the option of either exercising a fixed-price purchase option for the cars or returning the cars to the third-party owner.

Under the terms of the sale/leaseback agreement, the MTA initially received \$168.1, which was utilized as follows: The MTA paid \$126.3 to an affiliate of one of the lenders to the third party, which affiliate has the obligation to pay to the MTA an amount equal to the rent obligations under the lease attributable to the debt service on such loan from such third party's lender. The obligations of the affiliate of the third party's lender are guaranteed by American International Group, Inc. The MTA also purchased FNMA and U.S. Treasury securities in amounts and with maturities which are sufficient to make the lease rent payments equal to the debt service on the loans from the other lender to the third party and to pay the remainder of the regularly scheduled rent due under that lease and the purchase price due upon exercise by the MTA of the fixed price purchase option if exercised. The amount remaining after payment of transaction expenses, \$7.4, was the MTA's benefit from the transaction.

**Leveraged Lease Transactions: Subway Cars** — On September 25, 2003 and September 29, 2003, the MTA entered into two sale/leaseback transactions whereby MTA New York City Transit transferred ownership of certain MTA New York City Transit subway cars to the MTA, the MTA sold those cars to third parties, and the MTA leased those cars back from such third parties. The MTA subleased the cars to MTA New York City Transit. Both leases expire in 2033. At the lease expiration, MTAHQ has the option of either exercising a fixed-price purchase option for the cars or returning the cars to the third-party owner.

Under the terms of the sale/leaseback agreements, the MTA initially received \$294, which was utilized as follows: In the case of one of the leases, the MTA paid \$97 to an affiliate of one of the lenders to the third party, which affiliate has the obligation to pay to the MTA an amount equal to the rent obligations under the lease attributable to the debt service on the loan from such third party's lender. The obligations of the affiliate of such third party's lender are guaranteed by American International Group, Inc. In the case of the other lease, the MTA purchased U.S. Treasury debt securities in amounts and with maturities, which are sufficient for the MTA to make the lease rent payments equal to the debt service on the loan from the lender to that third party. In the case of both of the leases, the MTA also purchased Resolution Funding Corporation (REFCO) debt securities that mature in 2030. Under an agreement with AIG Matched Funding Corp. (guaranteed by American International Group, Inc.), AIG Matched Funding Corp. receives the proceeds from the REFCO debt securities at maturity and is obligated to pay to the MTA amounts sufficient for the MTA to pay the remainder of the regularly scheduled lease rent payments under those leases and the purchase price due upon exercise by the MTA of the purchase options if exercised. The amount remaining after payment of transaction expenses, \$24, was the MTA's net benefit from these two transactions.

On September 16, 2008, the MTA learned that American International Group, Inc. was downgraded to a level that under the terms of the transaction documents for the sale/leaseback transaction that closed on September 29, 2003, the MTA is required to replace or restructure the applicable Equity Payment Undertaking Agreement provided by AIG Financial Products Corp. and guaranteed by American International Group, Inc. On December 17, 2008, MTA terminated the Equity Payment Undertaking Agreement provided by AIG Financial Products Corp. and guaranteed by American International Group, Inc. and provided replacement collateral in the form of U.S. Treasury strips. The Resolution Funding Corporation (REFCO) debt security that was being held in pledge was released to MTA. On November 6, 2008, the MTA learned that Ambac Assurance Corp., the provider of the credit enhancement that insures the MTA's contingent obligation to pay a portion of the termination values upon an early termination in both the September 25, 2003 and September 29, 2003 transactions, was

downgraded to a level that required the provision of new credit enhancement facilities for each lease by December 21, 2008.

On December 17, 2008, MTA terminated the Ambac Assurance Corp. surety bond for the lease transaction that closed on September 25, 2003 and provided a short-term U.S. Treasury debt obligation as replacement collateral. The cost of the replacement collateral was \$32. As a result of a mark-to-market of the securities provided as collateral as of January 31, 2009, \$8 of such \$32 in collateral value was released back to MTA in February 2009. As of December 31, 2011, the market value of total collateral funds was \$34.4.

On January 12, 2009, MTA provided a short-term U.S. Treasury debt obligation as additional collateral in addition to the Ambac Assurance Corp. surety bond for the lease transaction that closed on September 29, 2003. From time to time, additional collateral has been required to be added such that the total market value of the securities being held as additional collateral. As of December 31, 2011, the market value of total collateral funds was \$42.1.

**Other Lease Transactions** — On July 29, 1998, the MTA, (solely on behalf of MTA Long Island Rail Road and MTA Metro-North Railroad, MTA New York City Transit, and MTA Bridges & Tunnels entered into a lease and related agreements whereby each agency, as subleasee, will rent, for an initial stated term of approximately 50 years, an office building at Two Broadway in lower Manhattan. The lease term expires on July 30, 2048, and, pursuant to certain provisions, is renewable for two additional 15-year terms. The lease comprises both operating (for the lease of land) and capital (for the lease of the building) elements. The total annual rental payments over the initial lease term are \$1,602 with rent being abated from the commencement date through June 30, 1999. During 2011, the MTA made rent payments of \$39. In connection with the renovation of the building and for tenant improvements, the MTA issued \$121 and \$328 in 2000 and 1999, respectively, of certificates of participation. In 2004, it issued approximately \$358 of certificates of participation that partially refunded the two previously issued certificates. As of December 31, 2011, there was \$126 in certificates of participation outstanding. (See Note 7). The office building is principally occupied by MTA New York City Transit and MTA Bridges & Tunnels.

On April 8, 1994, the MTA amended its lease for the Harlem/Hudson line properties, including Grand Central Terminal. This amendment initially extends the lease term, previously expiring in 2031, an additional 110 years and, pursuant to several other provisions, an additional 133 years. In addition, the amendment grants the MTA an option to purchase the leased property after the 25th anniversary of the amended lease. The amended lease comprises both operating (for the lease of land) and capital (for the lease of buildings and track structure) elements.

In August 1988, the MTA entered into a 99-year lease agreement with Amtrak for Pennsylvania Station. This agreement, with an option to renew, is for rights to the lower concourse level and certain platforms. The \$45 paid to Amtrak by the MTA under this agreement is included in other assets. This amount is being amortized over 30 years. In addition to the 99-year lease, MTA Long Island Rail Road entered into an agreement with Amtrak to share equally the cost of the design and construction of certain facilities at Pennsylvania Station. Under this agreement, the MTA may be required to contribute up to \$60 for its share of the cost. As of December 31, 2000, the project was closed and \$50 was included in property and equipment.

Total rent expense under operating leases approximated \$49.2 and \$45.4 for the years ended December 31, 2011 and 2010 respectively.

At December 31, 2011, the future minimum lease payments under non-cancelable leases are as follows (in millions):

	<b>Operating</b>	<b>Capital</b>
2012	\$ 48	\$ 169
2013	51	73
2014	53	77
2015	51	58
2016	50	63
2017–2021	188	413
2022–2026	222	375

## 9. FUTURE OPTION

In 2009, MTA and LIRR entered into an Air Space Parcel Purchase and Sale Agreement (“Agreement”) with Atlantic Yards Development Company, LLC (“AADC”) pursuant to which AADC has agreed to purchase fee title to six parcels of air space above the LIRR’s Atlantic Yard in Brooklyn, New York. Initial annual payments of \$2 (covering all six parcels) commence on June 1, 2012 and are due on the following three anniversaries of that date. Starting on June 1, 2016 and continuing on each anniversary thereof through and including June 1, 2031, an annual option payment in the amount of \$11.03 is due. The Agreement provides that all such payments are (i) fully earned by MTA as of the date due in consideration of the continuing grant to Developer of the rights to purchase the air space parcels, (ii) are non-refundable and (iii) shall be deemed to be payments on account of successive annual options granted to AADC.

After AADC and its affiliates have completed the new yard and transit improvements to be constructed by them at and in the vicinity of the site, AADC has the right from time to time until June 1, 2031 to close on the purchase of any or all of the six air rights parcels. The purchase price for the six parcels is an amount, when discounted at 6.5% per annum from the date of payment that equals a present value of \$80 as of January 1, 2010. The purchase price of any particular air space parcel is equal to a net present

value as of January 1, 2010 of the product of that parcel's percentage of the total gross square footage of permissible development on all six air space parcels multiplied by \$80.

## **10. ESTIMATED LIABILITY ARISING FROM INJURIES TO PERSONS**

A summary of activity in estimated liability as computed by actuaries arising from injuries to persons, including employees, and damage to third-party property, for the years ended December 31, 2011 and 2010 is presented below (in millions):

	<b>December 31, 2011</b>	<b>December 31, 2010</b>
Balance — beginning of period/year	\$ 1,700	\$ 1,485
Activity during the period/year:		
Current period/year claims and changes in estimates	509	455
Claims paid	<u>(241)</u>	<u>(240)</u>
Balance — end of period/year	1,968	1,700
Less current portion	<u>(284)</u>	<u>(255)</u>
Long-term liability	<u>\$ 1,684</u>	<u>\$ 1,445</u>

## **11. COMMITMENTS AND CONTINGENCIES**

The MTA Group monitors its properties for the presence of pollutants and/or hazardous wastes and evaluates its exposure with respect to such matters. When the expense, if any, to clean up pollutants and/or hazardous wastes is estimable it is accrued by the MTA.

Management has reviewed with counsel all actions and proceedings pending against or involving the MTA Group, including personal injury claims. Although the ultimate outcome of such actions and proceedings cannot be predicted with certainty at this time, management believes that losses, if any, in excess of amounts accrued resulting from those actions will not be material to the financial position, results of operations, or cash flows of the MTA.

## **12. POLLUTION REMEDIATION COST**

Effective 2008, pollution remediation costs are being charged in accordance with the provision of GASB Statement No. 49, *Accounting and Financial Reporting for Pollution Remediation Obligations*. The Statement establishes standards for determining when expected pollution remediation outlays should be accrued as a liability or, if appropriate, capitalized. An operating expense and corresponding liability, measured at its current value using the expected cash flow method, have been recognized for certain pollution remediation obligations that are no longer able to be capitalized as a component of a capital project. Pollution remediation obligations, which are estimates and subject to changes resulting from price increases or reductions, technology, or changes in applicable laws or regulations, occur when any one of the following obligating events takes place:

- An imminent threat to public health due to pollution exists
- MTA is in violation of a pollution prevention-related permit or license

- MTA is named by a regulator as a responsible or potentially responsible party to participate in remediation
- MTA is named or there is evidence to indicate that it will be named in a lawsuit that compels participation in remediation activities, or
- MTA voluntarily commences or legally obligates itself to commence remediation efforts

Operating expense provision and corresponding liability measured at its current value using the expected cash flow method have been recognized for certain pollution remediation obligation that previously may not have been required to be recognized, or are no longer able to be capitalized as a component of a capital project. As of December 31, 2011, the MTA has recognized a total cost of \$59 and a pollution remediation liability of \$112.

### **13. FUEL HEDGE**

MTA partially hedges its fuel cost exposure using financial hedges. All MTA fuel hedges provide for 12 monthly settlements. The table below summarizes six active ultra-low sulfur diesel (“ULSD”) hedges:

Counterparty	Deutsche Bank AG	Deutsche Bank AG	Deutsche Bank AG	J. Aron & Company	Bank of America Merrill Lynch	Bank of America Merrill Lynch
Trade Date	3/2/2011	3/8/2011	5/5/2011	5/12/2011	6/24/2011	12/22/2011
Effective Date	3/1/2011	4/1/2011	6/1/2011	6/1/2011	7/1/2011	1/1/2012
Termination Date	2/29/2012	3/31/2012	5/31/2012	5/31/2012	6/30/2012	6/30/2013
Price/Gal	\$3.16	\$3.12	\$3.05	\$2.98	\$2.85	\$2.89
Notional Qnty (Gal)	6,329,112	6,417,456	6,557,376	6,711,408	3,506,311	20,076,156

In addition, on March 2, 2011, MTA executed a natural gas hedge with Deutsche Bank AG for 2,829,180 MMBtus of natural gas at a fixed price of \$4.2415/MMBtu. The natural gas hedge runs from April 1, 2011 until March 31, 2012. The monthly settlements are based on the daily prices of the respective commodities whereby MTA will either receive a payment, or make a payment to the various counterparties depending on the average monthly price of the commodities in relation to the contract prices. As at December 31, 2011, the total notional value of the ULSD contracts was 30,017,188 gallons with a fair market value of a negative \$2.13 and the total notional value of the natural gas contract was 703,430 MMBtu with a fair market value of a negative \$0.85.

## 15. SUBSEQUENT EVENTS

On January 31, 2012, MTA tendered and reissued MTA Bridges and Tunnels General Revenue Variable Rate Bonds, Series 2003B and Series 2005A, and MTA Bridges and Tunnels General Revenue Variable Rate Refunding Bonds, Subseries 2005B-2. The standby bond purchase agreements with Dexia Crédit Local associated with the above referenced variable rate demand bonds were substituted with direct-pay letters of credit from a consortium that included US Bank, N.A., CalPERS and CalSTRS. The bonds were remarketed in the following amounts: Series 2003B in the amount of \$206.2, Series 2005A in the amount of \$132.8, and Subseries 2005B-2 in the amount of \$195.6.

On February 07, 2012, MTA executed an ultra-low sulfur diesel (ULSD) fuel hedge with a notional amount of \$20. Through competitive bidding, Goldman, Sachs & Co. submitted the winning bid for an all-in cost of \$3.121/gallon. Cashflows in connection with the agreement begin on March 1 and extend for 18 months through the end of August 2013.

On March 7, 2012, MTA priced through competitive bidding \$150 of Transportation Revenue Bonds, Series 2012A and \$250 of Transportation Revenue Bonds, Series 2012B. The Series 2012A bonds were

issued as Floating Rate Notes (FRNs) in three \$50 subseries: 2012A-1, 2012A-2 and 2012A-3 maturing on November 15, 2040, November 15, 2041, and November 15, 2042, respectively. The Series 2012B bonds are tax-exempt fixed-rate bonds with a final maturity of November 15, 2039.

On March 8, 2012, a financial hedge for Ultra Low Sulfur Diesel fuel was executed through competitive bidding. The \$12 hedge contract was awarded to Deutsche Bank with a lock in price of \$3.2125/gallon. The hedge is structured as an 18-month contract covering a period of April 1, 2012 through and including September 2013.

On March 28, 2012, MTA remarketed \$150.0 Dedicated Tax Fund Bonds, Subseries 2002B-1 with an irrevocable direct-pay letter of credit issued by State Street Bank and Trust Company, which replaced the standby bond purchase agreement issued by Dexia Crédit Local, New York Branch. The insurance policy issued by Financial Security Assurance Inc. (now known as Assured Guaranty Municipal Corp.) was terminated.

On March 28, 2012, MTA remarketed \$277.85 Dedicated Tax Fund Bonds, Subseries 2002B-2 and B-3. The Subseries 2002B-2 bonds were converted from a weekly variable rate mode to a fixed rate mode, and the Subseries 2002B-3 bonds were converted from a weekly variable rate mode to a term mode (“FRN”s). As part of this transaction, MTA also has reassigned \$128.2 portion of the swap previously related to the Dedicated Tax Fund Bonds, Series 2002B to Dedicated Tax Fund Bonds, Subseries 2008B-3.

On April 5, 2012, MTA held successful bidding for an \$11 ULSD fuel hedge contact. The all-in price was \$3.161/gallon, which was submitted by Bank of America Merrill Lynch. The transaction cash flows begin May 1 and extend through October 2013.

On April 18, 2012, MTA made an OPEB Trust contribution in an amount of \$125. The trust became effective on December 24, 2009 with JP Morgan Chase Bank appointed as the designated Trustee.
