INDEPENDENT AUDITORS' REPORT

To the Members of the Board of Trustees
Dutchess County Water & Wastewater Authority
27 High Street
Poughkeepsie, New York 12601

Report on the Financial Statements

We have audited the accompanying Statements of Net Position of the Dutchess County Water & Wastewater Authority ("Authority"), a component unit of Dutchess County, as of December 31, 2012 and 2011, and the related Statement of Revenues, Expenses, and Changes in Net Position, and Cash Flows for the years then ended and the related notes to the financial statements, which collectively comprise the Authority's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

Poughkeepsie Office

2678 South Road | Suite 101 | Poughkeepsie, New York 12601

Tel: (845) 485-5510 | Fax: (845) 485-5547 | Email: info@sedoreco.com | Web: www.sedoreco.com

POUGHKEEPSIE • PORT JERVIS • FISHKILL

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the Dutchess County Water & Wastewater Authority, as of December 31, 2012 and 2011, and the respective changes in financial position and, cash flows thereof for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis, and Schedule of Funding Progress for Other Post-employment Benefits Plan listed in the Table of Contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated March 15, 2013 on our consideration of the Dutchess County Water & Wastewater Authority's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Dutchess County Water & Wastewater Authority's internal control over financial reporting and compliance.

**REPORT ON INTERNAL CONTROL OVER
FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS
BASED ON AN AUDIT OF FINANCIAL STATEMENTS
PERFORMED IN ACCORDANCE
WITH GOVERNMENT AUDITING STANDARDS**

Members of the Board of Trustees
Dutchess County Water & Wastewater Authority
27 High Street
Poughkeepsie, New York 12601

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the Dutchess County Water & Wastewater Authority, as of and for the years ended December 31, 2012 and 2011, and the related notes to the financial statements, and have issued our report thereon dated March 15, 2013.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered Dutchess County Water & Wastewater Authority's internal control over financial reporting ("internal control") to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Dutchess County Water & Wastewater Authority's internal control. Accordingly, we do not express an opinion on the effectiveness of Dutchess County Water & Wastewater Authority's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Poughkeepsie Office

2678 South Road | Suite 101 | Poughkeepsie, New York 12601

Tel: (845) 485-5510 | Fax: (845) 485-5547 | Email: info@sedoreco.com | Web: www.sedoreco.com 4

POUGHKEEPSIE • PORT JERVIS • FISHKILL

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Dutchess County Water & Wastewater Authority's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Authority's internal control or on compliance. This report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the Authority's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

DUTCHESS COUNTY WATER AND WASTEWATER AUTHORITY
DECEMBER 31, 2012
MANAGEMENT'S DISCUSSION AND ANALYSIS
(Un-audited)

The following Management Discussion and Analysis of the Dutchess County Water and Wastewater Authority's activities and financial performance provides an introduction and overview to the financial statements of the Dutchess County Water and Wastewater Authority (Authority) for the fiscal year ended December 31, 2012. This information should be considered in conjunction with the information contained in the Authority's Audited Financial Statements included with this report.

The mission of the Dutchess County Water and Wastewater Authority is to protect and enhance the health, environmental sustainability and economic stability of Dutchess County and its residents through the provision of clean drinking water and proper treatment of wastewater, acting at all times with a commitment to accountability and transparency.

The Authority was established in 1991 under the Dutchess County Water and Wastewater Authority Act. This act authorizes the Authority, among other things, to provide for the supply and sale of water for domestic, commercial and public purposes at retail to individual customers within the County or wholesale to municipalities, water districts or district corporations within the County and for the collection, treatment and disposal of sewage within the County. As of December 31, 2012, the Authority owned and operated a total of eleven water systems and three sewer systems and, in addition, operates a 13 mile water transmission line. In 2011, the Authority regionalized its operations of the previously separate Hyde Park, Staatsburg, Zone D and newly created Zone L water system to form the Hyde Park Regional Water System as a single budgeted system, while maintaining each area's current Accounts Receivable billing schedule. On August 27, 2012, the Authority acquired the Fairways Water System located in the Town of Red Hook, adding 48 additional residential water customers.

The Authority provides service in the aggregate to 2,981 separate water accounts and 1,178 separate sewer accounts. The Hyde Park Regional Water System provides water from the Authority's Hyde Park Water Treatment Plant on South Drive in the Town of Hyde Park to the Hyde Park service area (Zones A and B), the Staatsburg service area (Zone C) and the Zone D and Zone L service areas. The source of water for this conventional filtration treatment facility is the Hudson River. The remaining seven water systems, Birch Hill, Dalton Farms, Fairways, Rokeby, Schreiber, Shore Haven and Valley Dale, each utilize groundwater wells and pumping and chlorination facilities, which are located within their respective service areas, with the Dalton Farms Water and Valley Dale Water plants also having cartridge filtration systems. The Birch Hill Water System completed upgrades in 2012 that now aid in the reduction of iron, manganese and radionuclides. The three sewer systems each have rotating biological contact (RBC) treatment plants with tertiary treatment located on property within their service areas. The Central Dutchess Water Transmission Line is a 13 mile water pipeline whereby the Authority purchases water from the Poughkeepsie Joint Water Board to serve areas south to the Town of East Fishkill. The water is received at a connection point in the Town of Poughkeepsie. The Authority currently serves two customers at the southernmost end of the line, International Business Machines Corporation (IBM) and the Hopewell Glen Water District in the Town of East Fishkill. In aggregate, the two customers have "take or pay" contracts with the Authority for a total of two million fifty thousand gallons per day, with a rate accommodation for water not taken.

DUTCHESS COUNTY WATER AND WASTEWATER AUTHORITY
DECEMBER 31, 2012
MANAGEMENT'S DISCUSSION AND ANALYSIS
(Un-audited)

FINANCIAL OPERATIONS HIGHLIGHTS

Although all but one of the water systems and two of the sewer systems are billed based on water use, a large portion of the budgets (anywhere from 50-70%) is comprised of costs that would realize their budgeted expectations due to their classification as "State of Readiness" costs, regardless of customer water use. As a result, budgets are prepared based on history and a conservative expectation of the coming fiscal year; determining a fiscally sound blend of Monthly Service Charges or Minimum Use Charges, in conjunction with water or sewer use charges. Although most of the systems have single-tiered usage rates, the Rokeby Water System has a two-tiered usage rate. The Chelsea Cove Sewer System and the Valley Dale Sewer System are both billed with Flat Rate Fixed charges, as is the Shore Haven Water System. The systems which are not billed strictly on a calendar quarter (Birch Hill Water, Dalton Farms Water and Sewer, Fairways Water, Rokeby Water, Schreiber Water, Shore Haven Water, and portions of the Hyde Park Regional Water System) use estimates for those remaining months in the fiscal year which have not yet been billed. With the exception of the Birch Hill Water System, Hyde Park Zone D service area, the Shore Haven Water System and the Central Dutchess Water Transmission Line, customer rates remained at their 2011 levels for the 2012 budget year. The Shore Haven Water System 2012 budget was reduced to affect a 22.78% decrease in water rates for the fiscal year. The 2012 budgets were based on conservative numbers evaluating the average use of the prior two year's billing history and any and all other field knowledge we were able to gather concerning changes to the customer base, including an evaluation of precipitation levels which were less than normal and more than 30% less than 2011.

Water revenues increased in 2012 in the majority of the Authority systems, in spite of an economy affecting commercial use and increased vacancy in single family homes across a number of our systems, while the three sewer systems showed varied decreases. Exceptions to this were the Shore Haven and Valley Dale water systems. Particular changes that would have affected these revenue numbers vary. The Chelsea Cove Sewer System and the Valley Dale Sewer System experienced a planned decrease in penalty fees due to changes in the rate structure for late payment charges. Dalton Farms Sewer System experienced a less than 1% decrease in usage charges and penalties. The Valley Dale Water System saw a 4.4% decrease in metered use, translating to a similar decrease in sales revenues. This is a small system (164 customers), within a development that is possibly transitioning to smaller household water users. The Shore Haven Water System provides service to an area with a large proportion of seasonal and vacation homes and has seen a significant number of customer requests for seasonal turn offs. In addition, the Authority determined in 2012 to reduce budgeted expenses and hold rates at a reduced level until such time as a larger portion of the capital improvement project was completed. Revenue increases in the Schreiber Water System and the Zone L Water System were significantly higher than the prior year, the former due to a previously inaccessible customer meter that was able to be read and the latter due to 2012 being the first full year for all Zone L customers purchasing water from the Hyde Park Regional System. Although we anticipate the 2012 usage number for Zone L to continue, it is probable that the Schreiber revenue will revert closer to its 2011 levels.

DUTCHESS COUNTY WATER AND WASTEWATER AUTHORITY
DECEMBER 31, 2012
MANAGEMENT'S DISCUSSION AND ANALYSIS
(Un-audited)

2012 AUTHORITY OPERATIONS

In 2012 the Authority continued its successful management and operation of all systems.

The Authority currently provides services to over 4,159 customer accounts located in seven towns within the County. With the exception of the Shore Haven Water System, all systems were in compliance with all relevant federal, state and local laws and regulations.

The Authority uses staff for operation and maintenance of the Hyde Park Regional Water System and the Central Dutchess Water Transmission Line. Contract operators are hired for the remaining water and sewer systems. The Authority also maintains an office staff for the purpose of administration of the systems and further developmental activities. All systems' operation and maintenance expenses for 2012 ended the fiscal year within their budgeted amounts, with the exception of the Valley Dale Sewer System, with an exceedance of less than 4% which was offset by actual revenues of 3.2% over budgeted revenues and the remaining .08% by fund balance. Funds remaining were evaluated for use to either offset rate increases for 2012 or to remain in fund balance for contingency and anticipated improvement expenses.

Below are some of the system operational highlights from 2012:

- A new, third supply well was placed into service for the Shore Haven Water System to ensure sufficient capacity under all demand conditions.
- A public "Open House" was conducted to showcase the major treatment facility improvements made to the Birch Hill Water Plant over the past year and to provide an outreach opportunity to the Birch Hill water consumers to learn more about their drinking water.
- End-User paid for network and control upgrades to the CDWTL Pump Station were coordinated, significantly reducing operational and customer costs. Staff continues to monitor and upgrade the network to ensure maximum uptime and system control.
- Fourteen (14) water main leaks and nineteen (19) service line leaks throughout the system were found and repaired, or caused to be repaired by the responsible party.
- In house design, equipment procurement and contract administration for the installation of a Second Rapid Mixer at the Hyde Park Water Treatment Plant was performed.
- In house design and contract administration for the replacement of the Treatment Building and Raw Water Pump Station roofs at the Hyde Park Water Treatment Plant was performed
- In house design, equipment procurement and construction for the installation of a fast acting relief valve and vault on Hillcrest Terrace in the Staatsburg section of the Hyde Park Regional service area was performed.

DUTCHESS COUNTY WATER AND WASTEWATER AUTHORITY
DECEMBER 31, 2012
MANAGEMENT'S DISCUSSION AND ANALYSIS
(Un-audited)

- In house design and contract administration for the installation of a Well Access Roadway and Protective Berm installation for the Dalton Farms Water System was performed.
- An in house assessment of the Staatsburg Water Distribution System condition to determine prioritization of pipe replacement was performed.
- An in house evaluation of the current Dalton Farms Water System demands to determine available capacity to project future capital construction needs was performed.

MAJOR CAPITAL PROJECTS

Several major capital project initiatives were advanced during 2012:

Birch Hill Water System Treatment Improvements – The construction, testing and start up of this project was completed and placed into operation in March of 2012.

Chelsea Cove Treatment Plant – An evaluation was initiated and completed on the condition of the process equipment and in-kind replacement and recommended improvement costs.

Hyde Park Water Distribution System – Contract design, permit approvals and contract bid and award were completed.

Shore Haven Water Treatment System - The installation of a Chloramination disinfection system and related facility infrastructure to be used as a back-up, interim treatment strategy for reducing the occurrence of Disinfection By-Products was completed. In addition, we continued with the advancement of the engineering design, including a pilot study, for major water quality treatment improvements.

Valley Dale Sewer Collection System – An evaluation was initiated and completed to determine system condition as it relates to inflow and infiltration and line and manhole conditions.

NEW SYSTEM ACQUISITIONS AND SYSTEM EXPANSIONS

The Authority continues to respond to numerous requests to acquire existing or proposed systems and to expand existing systems to provide service to new areas. Active projects in 2012 included the following:

Dalton Farms Water System – Easement activities were completed for the connection of a water line between the Dalton Farms Water System and the Arlington Central School District's Beekman Elementary School as part of a project to bring safe drinking water to the school in order to resolve a Dutchess County Department of Health "Do Not Drink the Water" order.

DUTCHESS COUNTY WATER AND WASTEWATER AUTHORITY
DECEMBER 31, 2012
MANAGEMENT'S DISCUSSION AND ANALYSIS
(Un-audited)

Fairways Water System - In August 2012 we acquired this water system, located in the Town of Red Hook and serving 48 residential customers.

INTER-MUNICIPAL COOPERATION

The Authority receives annually from the Dutchess County Division of Water Resources an allocation of funds to support project initiation and community assistance activities. These funds are utilized to support activities related to regional and community water and wastewater planning, and preliminary evaluation and development of potential Authority water and wastewater projects. The project and community assistance activities in 2012 included the following:

Town of Amenia – Work continued with the Town of Amenia towards the goal of creating the Amenia Hamlet Sewer System to provide wastewater treatment capacity to properties in the business core of the Hamlet. Towards this end, Authority staff worked with the Town and its consulting engineer on a new Sewer Feasibility Study utilizing potential alternative collection and treatment technologies for the Amenia Hamlet, such as STEP (Septic Tank Effluent Pump system) and subsurface discharge for secondary treatment. A revised application for Hardship Financing through the NYS Environmental Facilities Corporation Clean Water State Revolving Loan Fund for a grant of 0% interest financing was submitted for this project.

Town of Beekman – Dialogue continued with the Town of Beekman and private developers of key properties within the proposed Beekman Town Center area about the availability of a central water supply and sewer system alternatives. An engineering study was completed on the Dalton Farms Sewer System which identified upgrades required to provide sewer service for potential development parcels.

Town of Hyde Park – Authority staff continued to work with the Town of Hyde Park and town business leaders for the purpose of developing an effective and cost conscious sewer solution that included possible alternative collection, treatment and/or disposal. In addition, Authority staff worked in partnership with Town officials to develop grant applications for a NYS Department of State Local Government Efficiency Program to provide for a detailed assessment of several Town-owned water and sewer systems, focusing on opportunities to streamline and improve service delivery including the potential for a transfer of ownership to the Authority.

Dutchess County – GIS data detailing Town and Village water and sewer infrastructure was developed through Leverage Dutchess County, in order to aid communities with their systems. This data has been incorporated into a new, secure intranet product providing essential information sharing between the Authority and County departments of Planning, Health and Office of Computer Information Services.

DUTCHESS COUNTY WATER AND WASTEWATER AUTHORITY
DECEMBER 31, 2012
MANAGEMENT'S DISCUSSION AND ANALYSIS
(Un-audited)

LONG-TERM DEBT ADMINISTRATION

The Authority has no taxing power, and its bonds are payable solely from the revenues, funds and assets pledged as security for the payment thereof, including payments from Dutchess County under the Service Agreements between the County and the Authority. These Service Fees include amounts sufficient to pay when due, all installments of principal of, premium, if any, and interest on all 1998, 1999, 2000, 2001, 2002, 2004, 2007, 2009, and 2011 Bonds issued by the Authority.

We currently have one Service Agreement with Dutchess County that covers all County Water District Zones of Assessment and three Service Agreements with the County, on behalf of Part-County Sewer Districts #1, 2 and 3 (Chelsea Cove, Valley Dale and Dalton Farms), respectively. These Service Agreements require the Authority to provide service to established Zones of Assessment within the districts. The County has covenanted and agreed during the Service Agreement Term to annually levy benefit assessments to raise monies which, together with County monies to be appropriated, are sufficient to pay all Service Fees due under the Service Agreement. The Authority, under the Service Agreement, has agreed to raise monies sufficient to pay Operating Expenses through the fixing, charging and collection of Water and Sewer Rates.

Through the establishment of the County Water District Zones of Assessment and the Part-County Sewer Districts, the County has the ability to relevy any unpaid water or sewer bills. The Authority annually provides the County with a list and dollar amount for those properties in arrears. The County then places these amounts on the property tax bills for the following fiscal year and these amounts are then paid to the Authority. This places the Authority in the position of being at 100% collection of its water and sewer sales revenues.

FINANCIAL POSITION SUMMARY

Net position can serve over time as a useful indicator of the Authority's financial position. Although we experienced a reduction in Total Assets and Total Liability over the prior year, because loan repayments which are funded by benefit assessments exceeded depreciation expense, we experienced an increase in Total Net Position. Accreted interest (accrued interest pertaining to zero coupon bonds) is being accrued but will not be due until 2021 and beyond when principal payments in similar amounts will no longer be due. As a result, we show the expense, but we are not scheduled at this time to collect the offsetting revenue.

FINANCIAL STATEMENTS

The Authority's financial statements are prepared on the accrual basis in accordance with accounting principles generally accepted in the United States of America and promulgated by the Governmental Accounting Standards Board (GASB). The Authority is structured as an Enterprise Fund. It is considered a component unit of the financial reporting entity, Dutchess County. The Authority recognizes revenues when earned, not when received and expenses when incurred, not when paid. Capital assets are recorded at cost, or if donated, at the estimated fair market value at the date of donation. The assets are then depreciated over their useful lives. See the notes to the financial statements for a summary of the significant accounting policies, descriptions of capitalized assets and outstanding debt.

In July, 2011, the New York State Environmental Facilities Corporation re-financed certain balances of its debt, resulting in the payment of the 2002G debt series with proceeds of the 2011C debt series, amounting to \$2,340,000. As these transactions were completed on the Authority's behalf, it neither received nor disbursed any cash.

DUTCHESS COUNTY WATER & WASTEWATER AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
DECEMBER 31, 2012 AND 2011

1. Organization and Purpose

Dutchess County Water & Wastewater Authority is a public benefit corporation established under Section 1123 of the New York Local Water and Sewer Act, duly enacted into law as Chapter 592 of the Laws of the State of New York. The act was requested by the Dutchess County Legislature to assist the County and its municipalities with managing water supplies and wastewater disposal. The legislation empowers the Authority to make plans and studies, develop, construct or maintain projects, acquire or lease real and personal property, to issue bonds and notes for financing and to fix rates and collect charges for the purpose of supplying and selling water and to collect, treat and discharge sewage in Dutchess County, New York.

The governing body of the Authority consists of eight members, five voting and three non-voting. Voting members serve five year terms with two members appointed by the County Executive, two appointed by the Chairman of the County Legislature and the fifth being a joint appointment confirmed by the entire Legislature. The non-voting members include the Director of the Dutchess County Environmental Management Council, the Director of the Dutchess County Soil and Water Conservation District, and the Commissioner of the Dutchess County Department of Planning and Economic Development.

The financial statements of the Authority have been prepared in conformity with generally accepted accounting principles (GAAP) as applied to government units in the United States of America. The Governmental Accounting Standards Board (GASB) is the accepted standard setting policy body for establishing governmental accounting and financial reporting principles.

2. Summary of Significant Accounting Policies

A. The Reporting Entity

The Authority is considered a component unit of the financial reporting entity known as Dutchess County. Inclusion in the financial reporting entity, Dutchess County, is determined based on financial accountability as defined by GASB Statement No. 14, "The Financial Reporting Entity". All of the Authority's Board Members are appointed by the Dutchess County Executive, and/or Members of the County Legislature, as described above. This level of control meets the criteria for financial accountability as defined by GASB Statement No. 14.

DUTCHESS COUNTY WATER & WASTEWATER AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS, (CONTINUED)
DECEMBER 31, 2012 AND 2011

2. Summary of Significant Accounting Policies (Continued)

B. Proprietary Fund Accounting

As described above, the Authority performs the function of supplying water and sewer services to areas within the County of Dutchess. Its operations are financed primarily through user charges. Under standards set by the GASB, the Authority is considered an enterprise fund, a type of proprietary fund. Proprietary fund financial statements are prepared on the accrual basis of accounting, which records the financial effects on an enterprise of transactions and other events when these transactions and events occur. The measurement focus is the flow of economic resources. This basis differs from that used by governmental funds in that the effects of transactions in government funds are recorded when revenues are measurable and available and when expenditures are incurred. The measurement focus is the flow of current transactions.

The Authority considers all revenues pertaining to the operations of the water and sewer systems as operating revenues, and other revenues and grants which finance either capital or non-system related projects are reported as non-operating revenues.

The Authority generally applies restricted resources when an expense is incurred for purposes for which both restricted and unrestricted net Position are available.

In accordance with Governmental Accounting Standards Board (GASB) No. 20 regarding proprietary fund accounting, the Authority applies all applicable GASB pronouncements as well as the following pronouncements issued on or before November 30, 1989, unless these pronouncements conflict with or contradict GASB pronouncements: Financial Accounting Standards Board (FASB) Statements and Interpretations, Accounting Principles Board Opinions, the American Institute of Certified Public Accountants (AICPA) Accounting Research Bulletins and any FASB or AICPA pronouncements made applicable by GASB Statement or Interpretation.

C. Cash, Cash Equivalents and Investments

The Authority's cash and cash equivalents are considered to be cash on hand, demand deposits and short-term investments with original maturities of three months or less from the date of inception.

DUTCHESS COUNTY WATER & WASTEWATER AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS, (CONTINUED)
DECEMBER 31, 2012 AND 2011

2. Summary of Significant Accounting Policies (Continued)

C. Cash, Cash Equivalents and Investments (continued)

State statutes govern the investment policies of the Authority. Permissible investments include obligations of the U.S. Treasury, U.S. Agencies, obligations of New York State and repurchase agreements secured by U.S. Treasury obligations. See also Note 3, Cash Equivalents and Investments.

D. Restricted Assets

Proceeds from acquisition and construction financing are set aside for completion of capital improvements and reduction of debt service. The disbursements from the restricted accounts are under the control of third party trustees.

E. Deferred Bond Financing Costs

Bond financing costs are amortized over the life of the related bond issue, using the straight-line method.

F. Fixed Assets

Property, plant and equipment are recorded at cost. Donated property, plant and equipment are recorded at the estimated fair market value at the date of donation. The cost of normal maintenance and repairs that do not add to the value of the asset or materially extend assets' lives are expensed. Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase is reflected in the capitalized value of the asset constructed, and net of interest earned on the invested proceeds over the same period. Depreciation is computed using the straight-line methods over the following estimated useful lives, beginning in the year the asset is placed in service:

<u>Assets</u>	<u>Years</u>
Buildings	20
Improvements other than Buildings	30
Machinery & Equipment	3-20
Sewage Collection System	50
Water Transmission System	50

DUTCHESS COUNTY WATER & WASTEWATER AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS, (CONTINUED)
DECEMBER 31, 2012 AND 2011

2. Summary of Significant Accounting Policies (Continued)

G. Revenues and Receivables

Revenues are derived generally from quarterly billing of user fees to customers and are considered to be operating revenues. Non-operating revenues include Dutchess County-funded revenues based on a contract with the Dutchess County Division of Water Resources to provide countywide water and wastewater planning and management. The Authority also derives revenues from Service Fee payments from the County pursuant to several Service Agreements, which are used to pay debt service and related expenses pertaining to debt obligations incurred for specific districts and/or systems.

Receivables represent outstanding user fees. The Authority has an agreement with Dutchess County that provides for collection of outstanding user fees through the real property tax levy. Therefore, the Authority has not established an allowance for uncollectible accounts.

H. Deferred Revenue

Revenues received in advance of the period to which they relate are deferred and recorded as revenue when earned. Grants and aid received for construction costs are deferred until construction is complete and the assets are placed in service.

I. Equity Classifications

Equity is classified as net position and displayed in three components:

Net investment in capital assets – Consist of capital assets, net of accumulated depreciation, reduced by the outstanding balances of bonds attributable to acquisition, construction or improvement of those assets, increased by deferred outflows of resources, costs incurred to obtain such financing and decreased by deferred inflows of resources, un-amortized cost reimbursements.

Restricted – Consist of assets with constraints placed in their use either by (1) external groups such as creditors, grantors, or laws or regulations of other governments; or (2) law through constitutional provisions or enabling legislation and reduced by liabilities related to those assets.

Unrestricted net position – Consist of the net amount of the assets that do not meet the definition of “restricted” or “net investment in capital assets”.

The Authority is required to segregate and reserve the net income generated under the service agreements between the Authority and the County and local municipalities by each service agreement area.

DUTCHESS COUNTY WATER & WASTEWATER AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS, (CONTINUED)
DECEMBER 31, 2012 AND 2011

2. Summary of Significant Accounting Policies (Continued)

J. Income Taxes

The Authority is exempt from federal income taxes under Internal Revenue Service Code Section 115.

K. Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual amounts could differ from those estimates.

3. Cash Equivalents and Investments

As described in Note 2 C above, state statutes authorize the Authority to maintain deposits with financial institutions and to invest in certificates of deposits, obligations of New York State, the United States Government and its agencies, and repurchase agreements collateralized by U.S. obligations.

In addition, the Authority, through the General Bond Resolution adopted June 1, 1998 is authorized to invest funds held under the Resolution in "Qualified Investments". Qualified Investments include the above-described investments as well as certain types of commercial paper, money market accounts and investment agreements.

Cash deposits are secured by collateral valued at market or par, whichever is lower, less the amount of Federal Deposit Insurance Corporation insurance. The Authority's deposits are categorized below to give an indication of the level of risk assumed by the Authority.

- 1) Insured or collateralized with securities held by the Authority or by its agent in the Authority's name;
- 2) Collateralized with securities held by the pledging institution's trust department or agent in the Authority's name;
- 3) Uncollateralized.

DUTCHESS COUNTY WATER & WASTEWATER AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS, (CONTINUED)
DECEMBER 31, 2012 AND 2011

3. Cash Equivalents and Investments (Continued)

Investments are categorized into these three categories of credit risk:

- 1) Insured or registered, or securities held by the Authority or its agent in the Authority's name; Included in Category 1 are funds invested in securities of the United States Government and its agencies, and repurchase agreements collateralized by U.S. obligations; or.
- 2) Uninsured and unregistered, with securities held by the counter-party's trust department or agent in the Authority's name; or,
- 3) Uninsured and unregistered, with securities held by the counter-party or by its trust department or agent, but not in the Authority's name.

	Balances as of December 31, 2012			
	Category 1	Category 2	Category 3	Total

Disclosures relating to risk and type of investments as presented above are indicative of activity and positions held during the year.

DUTCHESS COUNTY WATER & WASTEWATER AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS, (CONTINUED)
DECEMBER 31, 2012 AND 2011

4. Restricted Assets

The restricted assets of the Authority consist of unexpended bond and note proceeds, which are invested in cash funds and investments under the control of bank trustees. These assets are restricted in use by bond covenants as described below:

	2012	2011
Construction Reserve Funds	\$ 1,966,619	\$ 3,611,223
Debt Service Sinking Funds	4,348	56,557
Debt Service Reserve Funds	115,940	140,735
Current Restricted Funds	2,086,907	3,808,515
Debt Service Reserve Funds	2,701,792	2,669,597
Total	\$ 4,788,699	\$ 6,478,112

The Debt Service Reserve Funds are funded in an amount equal to an amount which is the lesser of, the maximum annual debt service required under the bond resolutions, 125% of the average annual debt service required by certain bond resolutions or the maximum amount that may be held in the Debt Service Reserve Fund without adversely affecting the tax-exempt status of bond series intended to be tax-exempt, currently 10% of the original issue amount. Since these reserves are not anticipated to be used in the subsequent year, they have been classified as restricted non-current assets on the balance sheet. Interest earnings on these reserves have been classified as current as they are available to pay current debt.

DUTCHESS COUNTY WATER & WASTEWATER AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS, (CONTINUED)
DECEMBER 31, 2012 AND 2011

5. Property, Plant and Equipment

Property, plant and equipment consisted of the following:

	Balance as of January 1, 2012	Increases	Decreases	Balance as of December 31, 2012
Land	\$ 834,808	\$ -	\$ -	\$ 834,808
Improvements	120,255	55,652	-	175,907
Buildings	12,368,977	845,610	(675)	13,213,912
Water System	49,003,594	1,183,634	-	50,187,228
Machinery and Equipment	6,289,468	640,645	-	6,930,113
Sewage Collection System	1,364,871	-	-	1,364,871
Construction in Progress	2,087,613	1,231,049	(2,619,291)	699,371
Sub-total	72,069,586	3,956,590	(2,619,966)	73,406,210
Less: Accumulated Depreciation	(17,370,319)	(4,093,555)	2,238,527	(19,225,347)
Net Property, Plant and Equipment	<u>\$ 54,699,267</u>	<u>\$ (136,965)</u>	<u>\$ (381,439)</u>	<u>\$ 54,180,863</u>

Depreciation was recorded in the amount of \$1,855,029 and \$1,735,001 respectively, less amortization of deferred revenues associated with the Central Dutchess Water Transmission Line of \$595,853 (which was put into service in 2007, see Note 9) for the years ended December 31, 2012 and 2011. The effect of netting these amounts resulted in \$1,259,176 and \$1,139,148 in depreciation expense for the years ended December 31, 2012 and 2011, respectively.

DUTCHESS COUNTY WATER & WASTEWATER AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS, (CONTINUED)
DECEMBER 31, 2012 AND 2011

6. Employee Retirement Systems

A. Plan Description

Through the acquisition of the assets and employees of the Hyde Park Fire and Water District, the Dutchess County Water and Wastewater Authority is required to participate in the New York State Local Employees' Retirement System and the Public Employees' Group Life Insurance Plan System. This is a cost sharing multiple employer retirement system. The System provides retirement benefits as well as death and disability benefits. Obligations of employers and employees to contribute and benefits to employees are governed by the New York State Retirement and Social Security Law (NYSRSSL). As set forth in the NYSRSSL, the Comptroller of the State of New York serves as sole trustee and administrative head of the System. The Comptroller shall adopt and may amend rules and regulations for the administration and transaction of the business of the System and for the custody and control of its funds. The System issues a publicly available financial report that includes an Annual Report and required supplementary information.

That report may be obtained by writing to the New York State and Local Retirement Systems, 110 State Street, Albany, New York 12236.

B. Funding Policy

The systems are generally noncontributory. Tiers I-IV are noncontributory after ten years of participation and tiers V-VI are required to contribute 3% of their salary. Under the authority of the NYSRSSL, the Comptroller shall certify annually the rates of participating employers expressed as proportions of payroll of members, which shall be used in computing the contributions required to be made by those employers to the pension accumulation fund.

The Dutchess County Water & Wastewater Authority is required to contribute to the System at an actuarially determined rate. The required contributions for the current and prior two years were \$239,994, \$179,651, and \$124,871, respectively. The Authority's contributions made to the System were equal to 100% of the contributions required for those years.

7. Post-employment Benefits

From an accrual accounting perspective, the cost of post-employment healthcare benefits, like the cost of pension benefits, generally should be associated with the periods in which the cost occurs, rather than in the future year when it will be paid.

DUTCHESS COUNTY WATER & WASTEWATER AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS, (CONTINUED)
DECEMBER 31, 2012 AND 2011

7. Post-employment Benefits (Continued)

Through implementation of the requirements of GASB Statement No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*, beginning in the year ended December 31, 2007, the Authority recognizes the cost of post-employment healthcare in the year when the employee services are received, reports the accumulated liability from prior year, and provides information useful in assessing potential demands on the Authority's future cash flows. Recognition of the liability accumulated from prior years will be phased in over 30 years, which commenced with the 2007 liability.

A. Plan Description

The Authority provides continuation of medical insurance coverage to employees that retire under the New York Retirement Systems at the same time they end their service to the Authority. Currently, there is one retiree receiving post-employment benefits. Based on the current employment policy, the retiree and his or her beneficiaries receive coverage for the life of the retiree based on the retiree's years of service at retirement. A summary of benefits is as follows:

<u>Years of Service</u>	<u>% Paid by Authority</u>	
	<u>Retiree</u>	<u>Dependent/Spouse</u>
10-14	50%	35%
15-19	60%	45%
20-24	70%	55%
25+	80%	65%

B. Funding Policy

The Authority is currently paying post-employment benefits for one individual. Although the Authority is considering the establishment of trusts that would be used to accumulate and invest assets necessary to pay for the accumulated liability, these financial statements assume that pay-as-you-go funding.

C. Annual Other Post-employment Benefit Cost

The Authority's OPEB cost (expense) amounted to \$168,375 and \$165,600 for the years ended December 31, 2012 and 2011, respectively. The Authority's OPEB cost was equal to the Annual Required Contribution (ARC), \$176,107, an amount actuarially determined in accordance with the parameters of GASB Statement 45, adjusted for interest accruing on the unpaid liability and other timing adjustments, (\$7,733). The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities over a period of 30 years.

**DUTCHESS COUNTY WATER & WASTEWATER AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS, (CONTINUED)
DECEMBER 31, 2012 AND 2011**

7. Post-employment Benefits (Continued)

C. Annual Other Post-employment Benefit Cost (continued)

Benefit Obligations at Normal Cost

Actuarial Accrued Liability (AAL)	
Retired employees (1) - Not available	\$ -
Active employees (21)	1,195,514
	1,195,514
Unfunded actuarial accrued liability (UAAL)	\$ 1,195,514

Level Dollar Amortization

Past Service Costs	\$ 40,847
Normal Costs	135,260
	176,107
Annual Required Contribution (ARC)	\$ 176,107

Percent of annual OPEB cost contributed 0%

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funding status of the plan and the annual expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, presents multi-year trend information about whether the actuarial value for plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

D. Actuarial Methods and Assumptions

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

DUTCHESS COUNTY WATER & WASTEWATER AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS, (CONTINUED)
DECEMBER 31, 2012 AND 2011

7. Post-employment Benefits (Continued)

D. Actuarial Methods and Assumptions (continued)

The December 31, 2011 actuarial valuation updated through December 31, 2012 was completed using the Alternative Measurement Method, and the liabilities were computed using the projected unit credit cost method and level per cent of payroll amortization. The actuarial assumptions utilized a 2.5% baseline discount rate. Because the plan is unfunded, reference to the general assets, which are short-term in nature (such as money market funds), was considered in the selection of the 2.5% rate. The valuation assumes an initial 10.50% healthcare cost inflation rate, reduced by decrements of .5% for the next 11 years at which time it would be 5%.

8. Long Term Obligations

A. Bonds Payable

The Authority issues revenue bonds to finance the acquisition of systems and the cost of the capital renovations to those systems and to pay costs of issuance. Such debt has been issued under the following authorizations:

Trust Indenture

As of June 1, 1995 the Authority executed a trust indenture authorizing the issuance of debt for the purpose of acquiring a sewage facility. This trust indenture was amended in 2007 to authorize debt issued for Part County Sewer Districts #1 and 2. One supplemental trust indenture was authorized under terms similar to those described in the General Bond Resolution described below.

Special Bond Resolution

As of September 30, 1997 the Authority adopted a special bond resolution authorizing debt to be sold at private sale for the purpose of acquiring a privately held water system.

General Bond Resolutions

As of June 1, 1998, the Authority adopted a General Bond Resolution which enabled the Authority to issue additional debt pursuant to supplemental resolutions without having to modify the form or general terms of the debt, referred to as additional parity debt. The Authority has issued eleven supplemental resolutions pursuant to this general bond resolution, authorizing debt issues in the years of 1998, 1999, 2000, 2001, 2004, two issues in 2002, 2007, and 2008, and one debt issue in 2009, 2010, and 2011.

As of August 1, 2004, the Authority adopted a general bond resolution pertaining to the Part County Sewer District No 3, which enabled it to issue bonds to finance the purchase of Dalton Farms Sewer System.

Totals	<u>\$30,678,751</u>	<u>\$28,317,126</u>	<u>\$58,995,877</u>

E. Re-financing, Advance Refunding and Defeasance of Debt

In July 2002, the Authority refinanced a portion of the 2001 Series (Zone D project) and a portion of the 1999 Series (Water Pollution Control) bonds in transactions accounted for as advance refunding of debt. The Authority defeased bonds by placing the proceeds of new bonds in an irrevocable trust to provide for all debt service payments on the old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the Authority's financial statements. As of December 31, 2011, the bonds were called and paid from the escrow funds.

In July 2011, the Authority participated in a refinancing initiated by the New York State Environmental Facilities Corporation on behalf of the municipalities that participated in the State Drinking Water and Clean Water Revolving Funds Series 2002G, amounting to \$2,340,000. A net present value savings of \$203,036 over the life of the new debt resulted from the refinancing transactions.

DUTCHESS COUNTY WATER & WASTEWATER AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS, (CONTINUED)
DECEMBER 31, 2012 AND 2011

8. Long-Term Obligations (Continued)

F. Bond Covenants

The Authority has agreed to maintain dedicated sources of revenues with respect to the projects financed in accordance with the State Act and in amounts such that the revenues of the Authority with respect to the financial projects shall be sufficient, together with all other funds available to the Authority for such purposes, to pay all costs of operating and maintaining the projects and to pay principal and interest requirements. The bonds payable are special obligations of the Authority, secured by the assets of the Authority and to be amortized solely from the revenues of the Authority.

The Authority has pledged its revenues, subject to the right to pay operating expenses, its interest in its Service Agreement with Dutchess County, its interest in cash and investments held by the Bond Trustee and any other property subsequently pledged.

In addition to pledging its revenues and other rights as described above, the Authority made certain covenants including that it will fix, charge and collect water rates together with other Authority revenues in amounts sufficient to provide for operating expenses as included in the Authority's budget. The Authority also pledges to maintain, in full force and effect, the service agreement with Dutchess County, as is further described in Note 12 - Economic Dependency.

9. Deferred Revenues

In June 2002, the Authority signed an agreement with Dutchess County outlining a project known as the Central Dutchess Utility Corridor (the "Corridor"), consisting of a 24" water transmission line and necessary pumping capacity for the purpose of transmission of water to serve the Hudson Valley Research Park in East Fishkill, New York and other future customers. The project was placed into service in July of 2007. The Authority had estimated the cost to be \$33,269,000, with funding coming in the form of grants from New York State, \$11,250,000, International Business Machines (IBM), \$11,375,000, the Town of East Fishkill, \$269,000 and Dutchess County, \$10,375,000. There were also interest earnings on advances and grants such that the total amount attributed to the project as of December 31, 2008 was approximately \$34,034,902, which was accounted for as deferred revenues.

DUTCHESS COUNTY WATER & WASTEWATER AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS, (CONTINUED)
DECEMBER 31, 2012 AND 2011

9. Deferred Revenues (Continued)

During 2009, the Authority returned \$4,209,736 in unused funds to Dutchess County and IBM. The Authority recognized \$595,853 in revenue for the years ended December 31, 2012 and 2011 and was recorded net of depreciation. The long term portion of deferred revenue amounted to \$25,949,145 and \$26,544,997 as of December 31, 2012 and 2011, all of which is related to the Utility Corridor. Current deferred revenue expected to be recognized in 2013 and 2012 are as follows:

	2012	2011
Current Portion of Deferred Revenues:		
Utility Corridor - Construction	\$ 595,853	\$ 595,853
Utility Corridor - Capital	151,588	126,178
Utility Corridor - Operations	48,082	47,826
Water Usage Billings Received in Advance	142,563	241,168
	938,086	1,011,025
Long-term Portion of Deferred Revenues:		
Utility Corridor - Construction	25,949,145	26,544,997
Deferred Revenues	\$ 26,887,231	\$ 27,556,022

10. Contingencies and Risk Management

The Authority is subject to various litigation and claims arising out of the course of its operations. While the results of the lawsuits cannot be predicted with certainty, management does not believe these matters will have an adverse effect on the Authority's overall financial position. The Authority assumes the liability for most risk including, but not limited to, property damage and personal injury liability. Such risks are covered by the purchase of commercial insurance. Workers compensation coverage is provided through a retrospective policy, wherein premiums are recorded based on the ultimate cost of the experience to date of workers in similar occupations. Judgments and claims are recorded when it is probable that an asset has been impaired or a liability has been incurred and the amount of loss can be reasonably estimated. The Authority has purchased insurance with limits as follows: umbrella aggregate coverage of \$20,000,000, business auto coverage of \$1,000,000 per occurrence, general liability aggregate coverage of \$3,000,000, property coverage of \$37,096,826 and workers compensation coverage of \$100,000.

DUTCHESS COUNTY WATER & WASTEWATER AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS, (CONTINUED)
DECEMBER 31, 2012 AND 2011

11. Commitments

Authorized Debt

In February 2004, the Authority authorized the issuance of up to \$625,000 in debt to fund renovations to the Fairview Pump Station. These renovations are part of the improvements needed to supply increased transmission capacity to the Dutchess Central Utility Corridor pipeline described above. No debt has been issued under this authorization, and Corridor funds were used instead.

12. Economic Dependency

As described in Note 8F - Long Term Obligations, the Authority has entered into service agreements with Dutchess County for the Water District and Part County Sewer Districts to provide water and/or sewer services and receive a service fee from Dutchess County based on a contractual formula, generally when revenues are insufficient to cover certain operating expenses and debt service requirements. The Authority also receives payments from Dutchess County for the completion of certain consulting projects. Although these payments are subject to budgetary resolutions by the Dutchess County Legislature for approval, no approvals have been withheld by the Legislature. For the years ended 2012 and 2011, the Authority recorded net revenues of \$2,797,082 and \$2,730,392, having recorded a return of \$37,672 (including savings on debt re-financing) and \$102,695 to the County during those years. Of those amounts, \$0 and \$22 was due to the County at each respective year-end. Since the Authority is a component unit of Dutchess County, these transactions are also considered related party transactions.

13. New Reporting Standards

In June 2011, the Governmental Accounting Standards Board (GASB) issued Statement 63 *Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position*. This Statement provided guidance for reporting deferred outflows and inflows of resources and net position as defined in Concepts Statement No. 4. This Statement was implemented for the year ended December 31, 2012, with 2011 amounts being presented in conformity with that statement. There was no effect on results of operations.

In March 2012, GASB issued Statement 65, *Items Previously Reported as Assets and Liabilities*. When implemented, this Statement will require the re-consideration of reporting of assets and liabilities. The Authority is required to implement this standard for the year ending December 31, 2013. The implementation of GASB Statement 65 could have a substantive effect on the Authority's net position.
